

SOP CUSTOMER CARE

STANDARD OPERATING PROCEDURE (SOP)

DEPARTMENT: CUSTOMER CARE (POST-SALE SUPPORT)

1. INTRODUCTION: WELCOME TO THE HEART OF THE CLINIC

Welcome to the **Dharma Nutrition Customer Care Team**. While the Sales Team brings patients through the door, **you are the reason they stay**.

This document serves as your Master Playbook. It outlines the precise steps and protocols required to support patients *after* they have committed to their health journey. From guiding them through medical forms to scheduling their nutritional coaching, you are the bridge between the patient and their results.

2. THE PURPOSE OF THIS SOP

In the medical weight loss industry, a sale is not the finish line—it is the starting line. The purpose of this SOP is to ensure that every patient transitions smoothly from "New Client" to "Success Story."

Our goal is simple: **Eliminate Friction**. Whether it is a confusing medical form, a shipping delay, or a scheduling conflict, your job is to solve the problem before the patient even feels stressed. We do not just answer phones; we deliver peace of mind.

3. YOUR CORE RESPONSIBILITIES

As a Customer Care Agent, you wear three distinct hats during every shift:

- ⚡ **The Problem Solver (Support & Resolution):** You are the primary point of contact for all questions *after* the payment is made. This includes checking order status, tracking shipments, answering messages via text/email, and handling incoming support calls with patience and grace.
- 📅 **The Coordinator (Logistics & Admin):** You are the organizer behind the scenes. Your duties include:
 - **Medical Forms:** assisting patients who struggle to fill out their health history.
 - **Scheduling:** Booking Medical Consultations and Nutritional Appointments efficiently.
 - **Data Accuracy:** Maintaining our spreadsheets and CRM to ensure no patient falls through the cracks.
- 🌟 **The Experience Creator (Reputation):** You are the guardian of our brand's reputation. Every interaction is an opportunity to earn a **5-Star Google Review**. You ensure clients feel so supported and cared for that they become advocates for Dharma Nutrition.

4. THE DHARMA STANDARD

Success in this role is defined by adhering to these non-negotiable principles:

- **EMPATHY:** Many patients are nervous about starting injections or frustrated with technology. We treat every frustration with kindness, never annoyance.
- **ACCURACY:** A mistake in scheduling or a typo in a shipping address causes delays. We double-check every spreadsheet entry and appointment time.
- **THE "5-STAR" MINDSET:** We do not end a conversation until the client is satisfied. Our standard is excellence, ensuring that our Google Reviews reflect the high quality of care we provide.

Lead's channels

Master Lead Management Workflow: Sources & Tools

The Philosophy: Our leads arrive from multiple digital channels, but they all share one requirement: **Urgency**. Whether a lead comes from a TikTok video or a Facebook Ad, they must be contacted immediately.

1. Where Our Leads Come From (The Sources)

We actively generate interest across the following major platforms:

- **Meta (Facebook & Instagram):** Direct Messages (DMs) and Comments on posts/ads, WhatsApp.
- **TikTok:** Direct Messages and engagement on viral content.
- **Web Forms:** Leads who fill out surveys or quizzes on our website.

2. How We Communicate (The Platforms)

Depending on the source, we use three distinct tools to manage communication. You must be proficient in all of them.

A. Respond.io (WhatsApp & Messaging)

Primary Use: High-speed text communication.

- **Function:** This is our central hub for **WhatsApp, TikTok, Instagram and Facebook**.
- **Action:** Most social media leads are funneled here. You will use this for initial outreach, answering questions quickly, and confirming appointments via text.

B. HubSpot (CRM & Email)

Primary Use: Data management

- **Function:** HubSpot is the "brain" of our operation.
- **Action:**
 - **Inbox:** Manage messages coming directly from the website chat.
 - **Tasks:** Manage daily follow-ups and missed appointment lists.
 - **Database:** This is where you verify client status, check notes, and update deal stages.

C. Phone System (Direct Calls)

Primary Use: Inbound and outbound calls.

- **Function:** Outbound and Inbound voice calls.

While digital messaging is efficient, the phone is our primary tool for resolving issues. You are responsible for executing three specific types of outbound calls:

A. Missed Inbound Calls (Immediate Priority)

- **Definition:** Any incoming call that was not answered by an agent in real-time.
- **The Rule:** You must call back **immediately** upon seeing the missed call notification.

B. Message Follow-Ups (Stalled Conversations)

- **Definition:** Leads who started a conversation via Text/WhatsApp/DM but stopped replying before booking.
- **The Rule:** Do not just wait for a text back. If a warm lead goes silent during a conversation, pick up the phone.
- **Action:** Call them to break the silence and answer complex questions that are hard to type out.

C. No-Show Recovery

- **Definition:** Clients who had a scheduled appointment yesterday but did not attend.
- **The Rule:** These must be called **daily at the start of the shift**.
- **Action:** Follow the specific steps outlined in the **Missed Calls SOP**] (Call twice + Leave Voicemail/Text).
-

3. The Golden Rule

Regardless of the platform—**Respond.io, HubSpot, or Phone**—treat every lead with the same level of priority. A lead left waiting for more than **30 minutes** is a lead lost.

Scheduling an appointment

Appointment Scheduling Protocol

Please follow these rules to determine which team to schedule the client with and use the corresponding link:

1. **Sales Team:** Schedule with the Sales Team only if the client meets both of the following criteria:

- They have never purchased from Dharma.
- They have never had a discovery call before.

Sales

Scheduling

Link:

https://support.dharmanutritionclinic.com/sellers?hs_preview=yOrvQGsl-192775277694

2. **Customer Service Team:** If the client does not meet the above criteria (for example, if they are an existing customer or have already had a discovery call), you must book the appointment with the Customer Service Team.

Customer

Service

Scheduling

Link:

https://support.dharmanutritionclinic.com/customerservice?hs_preview=JIYcVfQF-192777235358

Please ensure all fields are completed accurately according to the guidelines below:

- **First Name / Last Name:** Enter the client's full name exactly as it appears in **Respond.io**.
- **Email:** Use the standard dummy format based on their phone number (e.g., 1234567890@dummy.com).
- **Phone Number:** Enter the client's valid US phone number.
- **Preferred Language:** Select the language the client prefers for communication.
- **State:** Select the US State where the client currently resides.
- **Agent:** Select your own name from the dropdown list.
- **Channel:** Indicate the method used to schedule the appointment (**Phone Call** or **Messages**).
- **Source:** Verify the source in Respond.io and select accordingly (e.g., **Facebook/Meta Ad** or **TikTok Ad**).
- **Type of Meeting:** Select the specific **Sales Agent** you are assigning to take this appointment.
- **Agent Notes:** Include any context that will help the closer (e.g., "Client mentioned using similar products in the past" or specific weight loss goals).

After that the shortcut Evaluation Schedule should be sent according to the client's preferred language.

- Here the name of the seller, date and time should be added. The standard format to add the information should always be in capital letters:

!(SP) Evaluation Schedule

Time*

2PM PST

Seller*

LEONARDO

Date*

HOY

Cancel

Start

Protocol for Closed Conversations: If the messaging window is closed, you cannot send standard shortcuts immediately. Please follow this order:

1. **Send Template:** Use the template `sp_open_conversation` to re-engage the client.
2. **Wait for Reply:** The client must answer this message to re-open the session.
3. **Send Info:** Once the conversation is active again, you can proceed to send the standard shortcut/information.

Double-Booking Procedure

When a seller needs two appointments at the same time, follow these steps to bypass the standard scheduling restrictions:

Step-by-Step Instructions

1. **Create a new appointment:** The new appointment will be created with a random available time and in the last page of the booking page the check box for Don't Send a notification will be selected.

2. **On Hubspot locate the Client:** Search for and open the specific **Contact Record**.
3. **Access Meetings:** Navigate to the **Meetings** tab/activity section within that contact.

4. **Initiate Edit:** Find the existing meeting and select **Edit** on the scheduled time.

5. **Adjust Schedule:** Manually change the **Date** and **Time** to match the desired slot.

- **Note:** This allows you to overlap with an existing appointment already on the seller's calendar.

6. **Commit Changes:** Click **Save** to finalize the double-booking.

- Example on how the calendar looks like once its double booked:

Analysis with Dharma Clinic - Cat	Analysis with Dharma Clinic - Dilo
Analysis with Dharma Clinic - Ilsys Mejia, 11am

Analysis with Dharma Clinic - Maria Rosillo, 2:40pm	

Missed calls

Missed Call Recovery Process

Objective: Ensure every missed call is treated as a priority task to maximize lead recovery and maintain high service standards.

1. Frequency & Routine

- **Check Schedule:** Review the missed call list in Aircall/HubSpot at the **start of every hour**.
- **Standard:** Do not leave missed calls sitting in the queue. Every missed call is an opportunity that must be actioned.

2. Outbound Protocol

Follow the specific redial steps based on how the call was disconnected:

- **Disconnected / Dropped Calls:** Attempt to call back **once** immediately.
- **Ring-outs (No Answer):**
 1. Call back immediately.
 2. If they do not answer the first time, **call back a second time** right away (Double Dial).
 3. If there is still no answer on the second attempt, **leave a voicemail**.

3. Scripts & Scenarios

Use the following scripts depending on the context of the missed call.

Scenario A: General Missed Call (Standard)

"Hi, this is [Your Name] from Dharma Nutrition Clinic. I'm calling because we see we just missed a call from you. How can we help you today?"

- **If interested in Weight Loss Treatment:** Proceed to schedule the appointment immediately.
- **If requesting General Information:**
 - Attempt to answer their question and solve the issue immediately.
 - *If you cannot solve it:* "I will need to gather that information for you. Let me check on this and I will give you a call back shortly."

Scenario B: Client Missed a Scheduled Video Call *Use this when a client had a confirmed appointment with an expert but did not answer.*

"Hi [Client Name], this is [Your Name]. I see you had a video call scheduled with our expert but were unable to connect. Would you like to reschedule that appointment now?"

- **If Yes:** Open the calendar and re-book immediately.

4. CRM & Data Integrity

- **HubSpot Updates:** If the contact appears as only a phone number in HubSpot, you must ask for their name during the call and **update the record immediately**.
- **Visual Reference:** Please refer to the screenshot below for how missed calls appear in HubSpot/Aircall.

Lead Reactivation Protocol (>24 Hours)

Lead Reactivation Protocol (>24 Hours)

1. Trigger Condition

This protocol applies when a lead from TikTok, FB, IG, or WhatsApp has not responded for more than 24 hours.

- Status: The "24-hour messaging window" is now closed.
- Restriction: You cannot send free-form text messages until the client replies again.

2. Action Required

To re-open the conversation, you must use a pre-approved template message. Follow these steps:

1. Select Template: Locate and select the following template from the list:
 - Name: **Sp_open_conversation__5**
 - Category: Utility
 - Language: Spanish
2. Customize: You must enter the client's name in the variable field to personalize the message.
3. Send: Once the template is sent, wait for the client to reply. Once they reply, the window re-opens for standard messaging.

3. Visual Reference

Step A: Adding the Client's Name *Ensure the name is entered correctly in the variable field:*

Send message template
Only message templates approved by Meta are sent to your Contacts.

Tips:
The body content can be formatted if necessary. Eg: `*bold*` `_italic_` `~strikethrough~` ````monospace````.
Type \$ and choose the appropriate contact field from the dropdown menu to populate WhatsApp variable values.

States Delivery

State Eligibility & Coverage Protocol

1. Verification Requirement Before offering or scheduling any appointments you **must** verify if the specific product is legally authorized for shipping to the client's state.

2. How to Check Refer to the "**States**" tab in the Pricing, plans & dosage Spreadsheet linked below to see the approved list for each medication.

-  Pricing, plans & dosage **Sheet:**
https://docs.google.com/spreadsheets/d/14OWImrWHSpS7mvwiVsL45NYiNAG_2xyQjr8-2LA7oj0/edit?usp=sharing

3. Universal Availability (Exceptions) The following services are available in **ALL 50 US States** and **Puerto Rico**:

-  **Supplements (La Lola and Dharma)**
-  **Nutrition Consultations**

Note: You do not need to check the spreadsheet for the two services listed above; they are always eligible.

Time Zone Guide

Time Zone Reference & Conversion

Office Location: Boca Raton - Florida (Eastern Time).

Rule of Thumb: Most states change their clocks with us, so the hourly difference remains constant. However, Arizona and Hawaii do not observe Daylight Saving Time, meaning their time difference changes depending on the season.

1. Standard Time Zones (Move WITH Florida)

For these zones, the time difference is always the same year-round.

If it is 12:00 PM in Florida	Time Zone	Difference	Key States
12:00 PM	Eastern (ET)	Same Time	NY, NJ, GA, NC, PA, OH, VA
11:00 AM	Central (CT)	-1 Hour	TX, IL, TN, MO, OK, WI, AL
10:00 AM	Mountain (MT)	-2 Hours	CO, UT, NM, WY, ID (South)
9:00 AM	Pacific (PT)	-3 Hours	CA, NV, WA, OR

2. The Exceptions (Do NOT Move with Florida)

 **Warning:** Arizona and Hawaii do not observe Daylight Saving Time. The time difference changes based on the season.

Arizona (Most of State)

- **Summer (DST):** Arizona aligns with **Pacific Time** (-3 Hours behind FL).
- **Winter (Standard):** Arizona aligns with **Mountain Time** (-2 Hours behind FL).

Hawaii (HI)

- **Summer (DST):** Hawaii is **-6 Hours** behind FL.
- **Winter (Standard):** Hawaii is **-5 Hours** behind FL.

3. The Golden Rule

Because of these variations, **always verify the local time** before calling clients in Arizona or Hawaii.

- *Action:* Simply Google "Current time in [City, State]" if you are unsure to avoid calling too early or too late.

Change time zone in google calendar

Changing Time Zone in Google Calendar

PURPOSE

This part includes a guide step by step on how to modify your Time Zone in google calendar

PROCEDURE

- Access your calendar via this [link](#), once in it go to the settings (gear symbol) located in the upper right section next to “DAY”, and then select **Settings** from the drop down menu.

- Go to the “time zone” section followed by language and region
- Click on “Primary time zone”, and it will display a dropdown list, scroll down until you locate **(GMT-05:00) Eastern Time - New York**

- Locate the option labeled “**Ask to update my primary time zone to the current zone.**” If the checkbox is selected, click to **uncheck** it.

Confirmation Calls and Messages

Pre-Appointment Confirmation Protocol

Confirmation Calls

Objective: Reduce "No-Show" rates by confirming attendance 1 hour prior to the consultation and ensuring the client receives their login details.

1. Administrative Setup & Tools

- **Data Accuracy:** The IT Department is responsible for populating the data in HubSpot. You will rely on this data for your calls.
- **Calendar View:** You must have **ALL** Sales Representatives' calendars open simultaneously in your browser. This is required to view the schedule holistically and confirm appointments hour-by-hour.

2. Workflow Requirements

- **Timing:** Calls must be executed exactly **1 hour before** the scheduled appointment time.
 - *Reason:* This ensures the client is reminded just before the meeting and allows us to fill the slot immediately if they cancel.
- **Sequence:** Always process confirmations in **chronological order** (earliest appointments first).
- **Preparation (Before Dialing):**
 - **Verify Name:** Check the correct pronunciation of the client's name.
 - **Check Context:** Briefly review the **"Deals"** section in HubSpot for any specific notes or history.
 - **Locate Number:** Retrieve the phone number from the HubSpot contact record or the Calendar invite.
- **Persistence (The Double Dial):**
 - If the client does not answer the first call, you are **required to call back immediately a second time**.
 - *Why?* Many people ignore single calls from unknown numbers but answer the second attempt, realizing it might be important.

3. The Confirmation Script

Speak clearly and enthusiastically.

"Hi, this is **[Your Name]** from Dharma Nutrition Clinic.

I'm calling just to quickly confirm your appointment with our specialist today at **[Appointment Time]**.

Please keep an eye on your messages—we will be sending you the secure link to join the video call about **20 minutes** before we start. We look forward to speaking with you soon!"

4. Outcome Logging

- **Confirmed:** Mark as confirmed in the spreadsheet/HubSpot.
- **No Answer:** Leave a voicemail (if available) and send a confirmation text via Respond.io.
- **Cancellations:** If they cancel during this call, immediately notify the Lead Management Team so they can try to fill the open slot.

5. Post-Call Actions

If the client answers and confirms they will attend:

Step 1: Update Status

- Immediately change the appointment status in **HubSpot** to **"Confirmed"** if the client confirmed the appointment and hit "Send".

CS appointment confirmation

CS appointment confirmation

Call confirmation is a process we do an hour before the appointment in order to ensure our clients are aware of the upcoming event, or in case of any unexpected situation that may lead to a cancellation or reschedule of the appointment, and allows us to fill the slot immediately if they cancel.

Objective: Reduce "No-Show" rates by confirming attendance 1 hour prior to the consultation and ensuring the client receives their login details.

Agent	Schedule Monday to Thursday	Schedule Friday	Schedule Saturday	Language	Appointments
Alice Strelow	10:40 AM - 6:40 PM	9:40 AM - 5:40 PM	9:40 AM - 2:40 PM	SP - PT	Appointments every 20 min
Brayam Zuluaga	10:40 AM - 6:40 PM	9:40 AM - 5:40 PM	9:40 AM - 2:40 PM	SP - EN	Appointments every 20 min
Arles Martinez	10:40 AM - 6:40 PM	9:40 AM - 5:40 PM	9:40 AM - 2:40 PM	SP	Appointments every 20 min
Edmilson Morales	10:40 AM - 6:40 PM	9:40 AM - 5:40 PM	9:40 AM - 2:40 PM	SP - EN	Appointments every 20 min

- **The Confirmation Script**

Speak clearly and enthusiastically.

"Hi, this is **[Your Name]** from Dharma Nutrition Clinic.

- Confirm you are speaking to the correct person by proving question "am I speaking to" **[Clients Name]**

I'm calling just to quickly confirm your appointment with our specialist today at **[Appointment Time]**.

Please keep an eye on your messages—we will be sending you the secure link to join the video call about **20 minutes**

For cancellation or rescheduling go to PART 2 of this section

TOOLS WE ARE GOING TO USE IN THIS SECTION

Google calendar:

<https://calendar.google.com/calendar>

Hubspot CS deal confirmed:

<https://app.hubspot.com/contacts/43887344/objects/0-3/views/50819214/list>

Agenda confirmation spreadsheet:

https://docs.google.com/spreadsheets/d/1D2tcUoOh0NJA6_Ktql70oH6obi_o4g1Z0DZYNPZeQF8/edit?gid=2080619933#gid=2080619933

Respond IO:

<https://app.respond.io/>

Step 1: Locating the appointment

- **In google calendar you'll see all the appointments for the whole day chronologically**
For this example we are going to use the first appointment of the day
- Bellow we can see the appointment details as well as the time and date

- Right after that we are going to copy and paste the phone number in respond IO to have a brief information if the patient is new at the clinic → after that we are going to perform the call using aircall

- If the call was confirmed, go to step 2, otherwise go to PART 2 of this section

Step 2: Hubspot update

- Go to CS deal confirmed link [here](#)
Always remember to search the client by name in hubspot

- The third column to the right is called “CALL STATUS” you must update with either “confirmed” or not confirmed”

Step 3: Spreadsheet update

- Open the spreadsheet Agenda confirmation [here](#)
- Go to the date and time of the appointment → click on the box of the appointment → and then select the best option depending if was confirmed or not

confirmed

Meeting - Maria Brieva - Analisis con Dharma hosted by Alice F
with Maria Brieva
Organized by Alice F
Attendee description
Name : Maria Brieva
Email: mbrieva25@gmail.com
Phone: [+1 908-357-9781](tel:+1908-357-9781)
Desired Treatment: Compounded Semaglutide, Compounded Tirzepatide/B12/Glycine
Agent: Laura Garcia

Need to make changes?

- Reschedule: <https://app.hubspot.com/meetings/aline-strelow?rescheduleId=f0d08c1c4f0ca8ef4950dcf429c6e996&ms=1>
- Cancel: <https://app.hubspot.com/meetings/aline-strelow?cancelId=f0d08c1c4f0ca8ef4950dcf429c6e996&ms=1>

Create Deal: Si

2. Cancellation:

→ Just as the re-scheduling process it has two ways to do it (hubspot and google calendar), first let's start with Google calendar by simply opening

the appointment details and click in “Cancel” (see picture bellow)

→ To do the process in hubspot, let's copy and paste the email address associated with the meeting to hubspot, open the contact and select meetings under activity, open meeting details and click on cancel

No show Taks

Daily Missed Appointment Recovery (No-Shows)

Objective: To re-engage potential clients who missed their scheduled consultation the previous day and immediately reschedule them while their interest is still high.

1. Schedule & Frequency

- **When:** As soon as messages are cleared from Respond.io.
- **Target List:** Filter the task on HubSpot for appointments from the **previous day** that are marked as "No-Show" or "Missed."
- **Call Frequency:** You must attempt to reach the client **twice** during this session if they do not answer the first time (Double Dial).

2. The Call Script

Use a helpful, problem-solving tone. Do not sound accusatory.

"Hi **[Client Name]**, this is **[Your Name]** from Dharma Nutrition.

I'm calling because I see we missed our consultation yesterday, and I wanted to make sure we get you taken care of.

I actually have a new opening available **[Today/Tomorrow]** at **[Time]**. Would you like to grab that spot so we can get you started?"

3. Outcome Protocols

Scenario A: Client Answers & Reschedules (YES)

1. **Book:** Secure the new time slot immediately.
2. **Confirm:** Follow all standard steps in the *Appointment Scheduling SOP* (send calendar invite, confirmation text).
3. **HubSpot:** Mark the "Missed Appointment" task as **Completed** and create the new Deal/Appointment record.

Scenario B: No Answer (After 2 Attempts)

1. **Voicemail:** Leave a brief message on the second attempt.
 - *"Hi [Name], it's [Name] from Dharma. I'm sorry we missed you yesterday. Please text or call me back so we can reschedule your session. Thank you!"*
2. **Message:** Send a text/WhatsApp via Respond.io.
 - *"Hi [Name], sorry we missed you yesterday! Do you want to reschedule your call for later today? 📱"*
3. **HubSpot:** Log the call attempts and keep the task open for the next scheduled follow-up cycle.
4. **HubSpot Visual Guide & Workflow**

Please refer to the screenshots below to ensure you are viewing and processing the tasks correctly in the system.

A. Identifying the Recovery Task *This view shows how the "Missed Appointment" task appears in your daily queue.*

Assigned to (1) × Task type ▾ Due date ▾ Queue ▾ Clear all Advanced filters

B. Verifying the "No-Show" Status *Before calling, verify the previous appointment status. It should be marked as "No Show" or "Missed" in the client's timeline.*

The screenshot displays the CRM interface for a contact named Gisela Mendoza. The left sidebar shows contact details and a list of properties. The main area is divided into three tabs: Overview, Activities, and Intelligence. The Activities tab is active, showing a list of activities. A task titled 'Task assigned to Laura Alejandra Sanchez Pinto Sanchez...' is highlighted, with a status of 'No show'. The right sidebar shows a progress bar and a list of deals, including one for 'Sellers - Gisela Mendoza'.

C. Processing the Workflow (Outcome: No Answer) *If you call and there is no answer:*

- Log Call:** Select "Call Outcome" → "No Answer."
- Complete Task:** Check the tick box to mark *this specific* follow-up task as complete.
- Next:** Move immediately to the next task in the queue.

Hubspot messages

HubSpot CRM Inbox Management

Objective: Maintain rapid communication with clients who reach out directly through the HubSpot Customer Portal or website chat.

1. Accessing the Inbox

- **Step 1:** Navigate to the main menu and click on **CRM**.
- **Step 2:** Select **Inbox** from the dropdown menu.

2. Response Time Requirement (SLA)

- **The 30-Minute Rule:** You must review and reply to all messages in the HubSpot Inbox within a **30-minute timeframe** during business hours.
- **Why this matters:** Clients messaging through the CRM are often active leads or existing patients with immediate needs. Delayed responses lead to lost opportunities.

3. Workflow

1. **Check Frequently:** Monitor the HubSpot Inbox tab throughout your shift, alongside Respond.io.
2. **Reply:** Address the client's inquiry immediately using the appropriate scripts or snippets.
3. **Log:** Ensure the conversation is properly associated with the client's Deal or Contact record.

Respond.io

Respond.io is the **centralized messaging platform** used to manage all client communications across different channels (WhatsApp, Facebook, Instagram, and TikTok).

It is used for:

- **Unified Inbox:** receiving and replying to messages from all social media platforms in one place.
- **Lead Verification:** Checking the client's name and the **Source** of the lead (e.g., verifying if they came from a Meta or TikTok ad).
- **Reactivation:** Sending approved **Templates** to re-open conversations when the 24-hour messaging window has closed.
- **Inbox Management:** Keeping the workspace organized by marking finished conversations as "Done/Closed."

Initial Message

Initial Message Protocol (Manual Fallback)

1. Automation Verification

Standard Process: Under normal circumstances, the Respond.io Bot automatically sends the initial greeting to any customer who contacts us.

Agent Responsibility: Upon opening a new conversation, you must first verify if the Bot successfully sent this message.

2. Manual Action Required

If you see that the Bot did NOT trigger (the chat history is empty or missing the greeting), you must manually send the initial response immediately.

Message 1:

Hola, mi nombre es Maria, de la clínica Dharma. 🙌

Es un placer tenerte aquí, echa un vistazo a nuestro Instagram *@dharma.clinic* 📷.

📍 Somos una empresa de telemedicina ubicada en EE.UU. y atendemos online en 43 estados.

💰 **PRECIOS DE LOS MÁS VENDIDOS:**

- **\$589** – Paquete de hasta 4 semanas de GLP-1 personalizado

- **\$299** – Acceso a prescripción de Zepbound

Tenemos tratamientos más largos para que pueda alcanzar su objetivo.

➡️ Primero realizamos una llamada de análisis **gratuita** por videollamada.

💎🎁 **OFERTA ESPECIAL SOLO HOY** 🎁💎

Message 2:

📍 En que **estado** reside para saber si podemos atenderle?

3. Review Client Response

Once the initial message has been sent, you must immediately review the client's reply to check for critical qualification data.

4. Verify Location (State)

Before proceeding, confirm if the client has mentioned which **US State** they live in. This is mandatory for service eligibility.

Scenario A: Client PROVIDED their State If the state is clearly visible in the chat:

- **Action:** Acknowledge the location and immediately pivot to offering the appointment.
- **Script:**  Tenemos un horario disponible para una llamada informativa gratuita *DATE a las TIME PM (Hora de GA)*, te funciona este horario?
 - *(Remember to adjust the time and state based on the lead's location)*

Scenario B: Client DID NOT Provide their State If the state is missing:

- **Action:** You must ask for it *before* offering the call.
- **Script:** *"To ensure we have availability in your area, could you please confirm which State you are currently located in?"*
- **Next Step:** Once they reply with the state, proceed immediately to offer the Free Discovery Call.

5. The Goal

Do not get stuck in long text conversations. As soon as the State is confirmed, your primary goal is to **schedule the Free Discovery Call**.

Snippets

What are Snippets?

Definition: Snippets are pre-saved, standardized responses used in Respond.io to ensure communication consistency and speed. Instead of typing the same message repeatedly, you can use a Snippet to insert approved text instantly.

Why we use them:

- **Speed:** Drastically reduces response time.
- **Accuracy:** Ensures clients receive the correct information (pricing, links, medical info) without typos.
- **Consistency:** Maintains the professional "Dharma Voice" across all agents.

How to use them: In the chat bar, type the **forward slash symbol (/)** followed by the keyword of the snippet you need.

- **Example:** Typing `/lejos` instantly populates a response for clients who say they cannot attend the appointment because they live too far away. This snippet clarifies that the appointment is a **video call** and can be taken from the comfort of their home.

Important Note: Snippets are different from **Templates**.

- **Snippets** are for *active* conversations (standard replies).
- **Templates** are for *re-opening* conversations after the 24-hour window has closed.

Products

GLP-1

Product Knowledge: Semaglutide & Tirzepatide

1. What are these medications?

Semaglutide and **Tirzepatide** are weekly injectable medications originally designed for blood sugar regulation but now widely used for **weight loss**. They work by mimicking natural gut hormones that control your appetite, digestion, and insulin response.

2. The Breakdown

A. Semaglutide (The Standard Option)

- **Type:** GLP-1 Agonist (Targets 1 Hormone).
- **How it works:** It mimics the GLP-1 hormone released after eating.
- **Key Actions:**
 - Significantly reduces appetite and food intake.
 - Slows down gastric emptying (makes you feel full for much longer).
 - Improves insulin sensitivity.
- **Sales Context:** This is the famous "active ingredient in Ozempic/Wegovy." It is highly effective and the most common starting point.

B. Tirzepatide (The Advanced Option)

- **Type:** Dual Agonist / GLP-1 + GIP (Targets 2 Hormones).
- **How it works:** It combines the action of Semaglutide (GLP-1) with a second hormone (GIP) for a "double-action" effect.
- **Key Actions:**
 - Provides **all** the benefits of Semaglutide.
 - **PLUS:** Further appetite suppression.
 - **PLUS:** Greater improvement in how the body handles sugar/insulin.
- **Sales Context:** This is the "active ingredient in Mounjaro/Zepbound." Because it targets two hormones instead of one, it often produces **faster and more significant weight loss**.

3. The Key Difference (How to Explain it)

Use this when a client asks: "What is the difference?"

"The main difference is the potency. **Semaglutide** targets **one** hunger hormone, making it a powerful tool for weight loss. **Tirzepatide** targets **two** hormones, making it a dual-action treatment.

Think of Tirzepatide as the 'advanced' version—it generally offers stronger appetite suppression and potentially faster results."

4. Shared Benefits

Regardless of which option the client chooses, both treatments provide:

-  **Decreased Hunger:** Drastic reduction in cravings and "food noise."
 -  **Lower Calorie Intake:** Clients naturally eat less without feeling deprived.
 -  **Prolonged Fullness:** Slower digestion means feeling satisfied with smaller portions.
 -  **Blood Sugar Control:** Improved metabolic health.
-

5. Index & Safety

Common Side Effects (*Note: Agents should mention these are usually mild and temporary*)

- Nausea
- Constipation or Diarrhea
- Fatigue
- Heartburn/Acid Reflux

Absolute Contraindications (NOT Eligible)

- Personal or family history of Medullary Thyroid Carcinoma (MTC).
- Multiple Endocrine Neoplasia syndrome type 2 (MEN 2).
- Currently pregnant or breastfeeding.
- History of Pancreatitis (requires medical clearance).

Final Reminders for Agents

- **Do not give medical advice.** You are explaining the *product*, not prescribing it.
- Always refer specific medical questions to the **Discovery Call** with the specialist.

For Prices and Treatment options please refer to Pricing, plans & dosage spreadsheet:

 Pricing, plans & dosage

NAD⁺

NAD+ Injection

Product: NAD+ (Nicotinamide Adenine Dinucleotide) **Format:** Subcutaneous Injection **Concentration:** 200mg/ml (6ml Vial)

1. What is NAD+? (The "Elevator Pitch")

NAD+ is a natural coenzyme found in every cell of your body. It is the fuel that powers energy, mental focus, and cellular repair. **The Problem:** As we age, our natural NAD+ levels drop significantly, leading to fatigue and "brain fog." **The Solution:** This treatment replenishes those levels directly, helping clients feel younger, sharper, and more energetic.

2. Main Benefits

- ⚡ **Natural Energy:** Enhances vitality and reduces chronic fatigue.
 - 🧠 **Mental Clarity:** Eliminates "brain fog" and improves focus.
 - 🧬 **Cellular Repair:** Improves metabolic function and overall well-being.
 - 🛡️ **Anti-Aging:** promotes resilience and repair at a cellular level.
-

3. Safety Protocol: Contraindications

- **Active Cancer** or history of cancer (See FAQ #2).
 - **Pregnancy or Breastfeeding** (includes those planning pregnancy).
 - **Heart/Stroke History:** History of stroke, heart attack, or uncontrolled hypertension/heart disease.
 - **Organ Issues:** Severe kidney or liver disease, Cirrhosis.
 - **Other:** Active infection, Seizure disorders, History of thromboembolism, Behçet syndrome (unless cleared).
-

4. Potential Side Effects

- **Common:** Flushing, warmth, fatigue (temporary), nausea/stomach upset.
 - **Injection Site:** Mild discomfort or muscle soreness.
 - **Serious (Rare):** Heart rate/BP fluctuations, allergic reactions.
-

5. FAQ & Scripting Guide

Follow the specific communication method (Text vs. Voice Note) for each scenario.

A. Send via Text Message 💬

Use these snippets for factual, quick answers.

Origin (Vegan Status)

"Our NAD+ is made with pharmaceutical-grade ingredients and contains no animal-derived components. While it is not labeled 'plant-based,' it is entirely free of animal products."

FDA Approval Status

"NAD+ is a natural molecule, not a specific drug, so the molecule itself is not FDA-approved. However, the treatment is safe, backed by studies, and we partner exclusively with **Strive Pharmacy**, one of the top regulated compounding pharmacies in the country."

Shipping Times

"Your NAD+ treatment will arrive at your doorstep within **7 to 10 business days** 🏠. You will receive a tracking number as soon as it ships! 🚚📦"

Side Effects

"NAD+ treatments are generally safe. Some patients experience mild, temporary side effects like headaches, dizziness, or rarely, muscle cramps."

Insurance

"We do not accept health insurance, but we do accept all major credit and debit cards. Our expert can explain payment options during your free discovery call. ➡️📱 Would you like to schedule? 📅"

Medical Interactions

- **Metformin:** "Yes, you can start NAD+ while taking Metformin."
- **Testosterone/Sermorelin:** "Yes, you can safely combine NAD+ with Testosterone or Sermorelin therapies."
- **Osteoporosis:** "Please note, NAD+ is **not** a treatment for osteoporosis."

B. Send via Voice Note 🗣️

Use voice notes for complex explanations to build trust and authority.

Cancer Survivors

"Regarding your history with cancer—your safety is our priority. We can proceed, but we strictly require a signed document from your treating oncologist confirming two things: 1) You are in complete remission, and 2) There is no active malignancy. We need this clearance before we can ship the medication."

Injections vs. IV Drip

"This is actually much more convenient than an IV. IV drips require you to sit attached to a bag for 1 to 4 hours. Our NAD+ is a subcutaneous injection—just a tiny shot under the skin that takes less than 5 minutes. You get the benefits without the wait."

Injections vs. Pills

"The main difference is absorption. When you take a pill, it has to survive your digestive system, so you lose a lot of the potency. With injections, the NAD+ goes directly into your system. That is why patients often feel the energy boost starting from the very first week."

LIPOMINO

Lipo-Mino

Product: Lipo-Mino Mix **Type:** Fat Burning & Energy Blend **Concentration:** 10 mL Vial **Key Ingredients:** Methionine, Inositol, Choline (MIC) + B1, B2, B6, B12 + L-Carnitine.

1. What is Lipo-Mino? (The "Elevator Pitch")

Lipo-Mino is a powerful "Fat Burning" injection formula. It is designed to help the body break down fat more efficiently while boosting natural energy. **How it works:** It combines "lipotropics" (fat-burners) with B-Vitamins to speed up metabolism, support liver detox, and target stubborn fat deposits.

2. Main Benefits (Selling Points)

-  **Fat Burning:** Aids in the reduction of stubborn fat storage.
 -  **Metabolism:** Boosts metabolic rate to support weight loss efforts.
 -  **Energy & Focus:** Increases natural energy and mental clarity (no jitters).
 -  **Detox:** Supports liver function to help eliminate toxins.
-

3. Safety Protocol: Contraindications

Mental Health & Neurological

- Schizophrenia or Bipolar Disorder
- Parkinson's Disease
- Seizure Disorders
- Leber's Hereditary Optic Neuropathy (LHON)

Physical Health

- **Liver or Kidney Disease** (See "Allowed Conditions" below for exceptions)
- Homocystinuria
- Trimethylaminuria
- Current or history of Metabolic Acidosis

General

- **Pregnancy or Breastfeeding** (includes planning pregnancy)
 - **Allergies** to: Methionine, Inositol, Choline, B Vitamins, or L-Carnitine.
 - **Active Cancer** (See Cancer Protocol below)
-

4. Cancer Protocol

If the client has a **History of Cancer**, they are **ONLY** eligible if they provide a signed clearance letter from their treating physician confirming:

1. Complete remission.
 2. No active cancer or malignancy.
-

5. Drug Interactions - Contraindication

- **Parkinson's/Psych Meds:** Levodopa, MAO Inhibitors (e.g., phenelzine), Mood Stabilizers (e.g., Lithium), Anticholinergics.
 - **Diabetes:** Insulin Sulfonylureas (e.g., glyburide, glipizide).
 - **Heart/Blood:** Anticoagulants (e.g., Warfarin), Nitroprusside.
 - **Thyroid:** Levothyroxine (Thyroid medication).
 - **Others:** Anticonvulsants (e.g., Valproic acid), Cholinesterase inhibitors.
-

6. Allowed Conditions (GREEN LIGHT)

- ☒ **Fatty Liver** (Hepatic Steatosis) – *Note: This is different from severe Liver Disease.*
 - ☒ **Insulin Resistance**
 - ☒ **Metabolic Syndrome**
 - ☒ **Chronic Fatigue**
 - ☒ **Use for Athletic Performance**
-

7. Potential Side Effects

Inform the client that side effects are usually mild.

- **Common:** Nausea, abdominal discomfort, diarrhea, headache, or injection site redness/itching.
 - **Specific Note:** Choline may occasionally cause a "fishy" body odor (rare, but possible).
 - **Serious (Stop immediately):** Allergic reaction, swelling, or sensory neuropathy.
-

Dharma Supplements

Dharma Supplements (Add-Ons & Alternatives)

1. The Specialist Objective

In Lead Management, your goal is to be the expert consultant. When a lead is disqualified from clinical treatments or expresses specific struggles, you use **Dharma Supplements** to bridge the gap. You must know the catalog inside and out to ensure no lead leaves without a solution.

- **Website:** <https://dharmanutritionclinic.com/collections/supplements>
 - **Primary Tool:** The "Out of State" Snippet for restricted leads.
-

2. Identifying Triggers (Pain Points & Goals)

Before offering an alternative, you must identify the lead's "Why." Use the Dharma Supplements line to address these specific needs:

- **The Goal:** What do they want? (e.g., *Weight loss, better sleep, muscle retention.*)
 - **The Pain Point:** What is stopping them? (e.g., *"I'm always hungry," "I have no energy," "My metabolism is slow."*)
-

3. Workflow: The "Out of State" Pivot

When a lead resides in a restricted state where prescribed medications cannot be shipped, follow this protocol:

1. **Acknowledge the Restriction:** Inform them of the shipping limitation using the official snippet.
 2. **Deploy the Snippet:** > OUT OF STATE
 3. **Direct to Site:** Provide the link immediately:
<https://dharmanutritionclinic.com/collections/supplements>
-

Slim Boost

Slim Boost Capsules

Goal: Ensure the Front Desk and CS team can accurately answer patient inquiries regarding the Slim Boost supplement without "selling."

1. Quick Reference "Cheat Sheet"

Keep this handy for quick answers at the desk or on the phone.

- **Product Name:** Slim Boost - Metabolism & Energy Support
- **Price:** \$89.00
- **Format:** 180 Capsules per bottle.
- **Dosage:** 3 Capsules Daily.
- **Supply Duration:** 2 Months (60 Days).
- **Main Function:** Enhances weight loss results and reduces side effects of injections.

2. What is it? (The Explanation)

If a patient asks, *"What is that bottle?"* or *"What is Slim Boost?"*, use this standard description:

"It is a supplement formulated by Dharma Nutrition specifically for patients on weight loss injections. It helps boost your metabolism and energy, and helps prevent common side effects like bloating and constipation."

3. Answering Common Patient Questions

Patients often ask questions based on their symptoms or usage. Here is how to respond informatively:

Q: "How do I take it?"

- **A:** "The recommended dosage is **3 capsules per day**."

Q: "How long does the bottle last?"

- **A:** "Since it is a large 180-count bottle, it lasts for a full **2 months** (60 days)."

Q: "Why should I take this?"

- **A:** "It is designed to maximize the benefits of your treatment. It helps control your appetite further and keeps your energy levels up while you are losing weight."

Q: "I've been feeling really bloated/constipated lately."

- **A:** "That is actually a very common side effect of the injections. This supplement is great for that because it contains Magnesium to help with digestion and bloating."

4. Ingredient Knowledge (The "How It Works")

You do not need to be a nutritionist, but you should know the **three main ingredients** and what they solve:

Ingredient	What it solves (The "Why")
Magnesium	Digestion. Helps fix constipation and reduces bloating (stomach issues).
Chromium	Fat Loss. Helps reduce body fat percentage.
Alpha-Lipoic Acid	Wellness. Boosts energy and improves skin health.

5. Who is this for? (Patient Profile)

Be aware that this product is most relevant for:

1. **Injection Patients:** Anyone currently on Semaglutide/Tirzepatide.
 2. **Tired Patients:** Patients mentioning low energy.
 3. **Stomach Issues:** Patients mentioning constipation or gut issues.
 4. **Sweet cravings:** Patients who craves sweets
-

GHK-Cu Troche

GHK-Cu Troche (Copper Peptide)

1. What is GHK-Cu? (The Elevator Pitch)

Classification: A naturally occurring **Copper Peptide** (a fragment of protein attached to a copper molecule).

- **The Science:** It is a signaling peptide found in human plasma that "reprograms" genes to a more youthful state. It acts as a "reset button" for your cells, signaling them to repair and regenerate.
- **The Problem:** As we age, our GHK levels drop by over **60%**, leading to thin skin, slow healing, and inflammation.
- **The Solution:** These troches deliver high-absorption copper peptides directly into the bloodstream to stimulate collagen and promote systemic repair.

2. Main Benefits (Why Buy It?)

Position this as the "**Cellular Regeneration**" and "**Youth Molecule**" solution.

- 🧬 **Tissue Repair:** Promotes wound healing and activates the body's natural regenerative pathways.
- ✨ **Skin Vitality:** Stimulates collagen and elastin production for firmer, younger-looking skin.
- 🛡️ **Anti-Inflammatory:** Reduces oxidative stress and protects cells from free radical damage.

3. ⚠️ Contraindications (Do Not Sell)

You **CANNOT** sell GHK-Cu if the patient reports **ANY** of the following conditions or medications:

Medical Conditions:

- Age: Under 18 years old.
- Reproductive: Pregnant, planning pregnancy, or breastfeeding.
- Oncology: Active Cancer or History of Cancer.
- Cardiac: Symptomatic heart failure (unstable/untreated)
- Cardiac: Dysrhythmia, tachycardia, or atrial fibrillation (unstable/untreated)
- Liver: Liver cirrhosis or end-stage liver disease
- Kidney: Chronic kidney disease stage 3 or greater
- Blood: Blood clotting disorder
- Recovery: Recent surgery or hospitalization

Medication Interference:

- Nitroglycerine/Nitrates or Steroids
- Blood thinners (Warfarin, Coumadin, etc.)
- Supplements: St. John's Wort, Grapefruit Seed Extract, Quercetin, or Ginseng.

4. Potential Side Effects

- **Common:** Metallic taste, mild nausea, or mouth irritation.
- **Rare:** Headaches or fatigue as the body adjusts to increased peptide levels.

Glutathione Injection

Glutathione Injection (The Master Antioxidant)

1. What is Glutathione? (The Elevator Pitch)

Classification: A **Tripeptide** made of three essential **Amino Acids** (Cysteine, Glutamate, and Glycine).

- **The Science:** Known as the body's "**Master Antioxidant**," it is found in every single cell. It protects cells from "rusting" (oxidation) and is the primary fuel for liver detoxification.
- **The Problem:** Stress, toxins, and aging deplete your glutathione stores faster than your liver can recreate them, leading to "oxidative stress."
- **The Solution:** This injection bypasses the gut—where oral glutathione is often broken down—for 100% absorption to brighten the skin and detox the blood.
- **Product Specs:** 200mg/mL | 30mL or 60mL Vials (Strive - Except CA/MS)

2. Main Benefits (Why Buy It?)

-  **Detoxification:** Flushes heavy metals and environmental toxins from the liver.
-  **Skin Brightening:** Inhibits melanin production, resulting in an even, glowing skin tone.
-  **Immune Support:** Powers the white blood cells that fight off illness.

3. Contraindications (Do Not Sell)

You **CANNOT** sell Glutathione if the patient reports **ANY** of the following:

- Age: Under 18 years old.
- Reproductive: Pregnant, planning pregnancy, or breastfeeding.
- Oncology: Active Cancer or History of Cancer.
- Cardiac: Symptomatic heart failure (unstable/untreated)
- Cardiac: Dysrhythmia, tachycardia, or atrial fibrillation (unstable/untreated)
- Liver: Liver cirrhosis or end-stage liver disease
- Kidney: Chronic kidney disease stage 3 or greater
- Blood: Blood clotting disorder
- Recovery: Recent surgery or hospitalization

Medication Interference:

- Nitroglycerine/Nitrates or Steroids
- Blood thinners (Warfarin, Coumadin, etc.)
- Supplements: St. John's Wort, Grapefruit Seed Extract, Quercetin, or Ginseng.

4. Potential Side Effects

- **Common:** Temporary sulfur odor (breath/sweat).
- **Injection Site:** Minor redness or stinging.

Sermorelin Injection

Sermorelin Injection (Growth Hormone Secretagogue)

1. What is Sermorelin? (The Elevator Pitch)

Classification: A **Peptide** (GHRH analogue) consisting of **29 Amino Acids**.

- **The Science:** Mimics the signal your brain sends to the pituitary gland. It tells your body to produce more of its own natural Growth Hormone safely.
- **Product Specs:** 1mg/mL | 9mL or 18mL (Monthly/Bi-Monthly)

2. Main Benefits (Why Buy It?)

- 🔥 **Metabolism:** Helps burn stubborn body fat and build lean muscle.
- 😴 **Deep Sleep:** Significantly improves REM and recovery sleep cycles.
- 💪 **Vitality:** Increases overall strength, stamina, and recovery speed.

3. ⚠️ Contraindications (Do Not Sell)

You **CANNOT** sell Sermorelin if the patient reports **ANY** of the following:

- **Age:** Under 18 years old.
- **Reproductive:** Pregnant, planning pregnancy, or breastfeeding.
- **Oncology:** Active malignancy or a history of cancer.
- **Hypersensitivity:** Known allergy to Sermorelin or its components.
- **Cardiovascular:** Unstable/untreated heart failure, tachycardia, atrial fibrillation, or dysrhythmia.
- **Hepatic:** Liver cirrhosis or end-stage liver disease.
- **Renal:** Chronic Kidney Disease (CKD) Stage 3 or greater.
- **Hematological:** Diagnosed blood clotting or coagulation disorders.
- **Acute Status:** Recent surgery or hospitalization.
- **Neurological:** History of idiopathic intracranial hypertension, elevated intracranial pressure, or severe papilledema.

Medication Interference:

- Nitroglycerine/Nitrates or Steroids
- Blood thinners (Warfarin, Coumadin, etc.)
- Supplements: St. John's Wort, Grapefruit Seed Extract, Quercetin, or Ginseng.

4. Potential Side Effects

- **Common:** Itching at injection site.
- **Rare:** Water retention or tingling in the fingers.

Medical Form

Post-Sale Medical Clearance Procedure

The Process Flow

To ensure timely delivery, all clients must follow this sequence immediately after a sale:

1. **Complete Medical Forms:** Necessary for doctor review.
2. **Doctor Review:** Forms are sent to the doctor for prescription approval.
3. **Pharmacy Fulfillment:** Prescription is sent to the pharmacy for shipping.

Completion Methods

Clients have two options for completing their paperwork:

- **Self-Service:** The client fills out the digital form on their own.
- **Assisted Support:** Our **Customer Service Team** provides guided support to fill out the form.

Seller Requirement (Crucial)

[IMPORTANT] **Immediate Transfer:** Sellers are required to transfer the client to the **Customer Service Team** immediately after the sale is finalized to complete the medical form.

Example :

- **Medical form for Tirzepatide 8mg:**

How it works

-  Complete a short medical survey to help us understand your health and treatment goals.
-  A licensed medical provider will review your responses and determine your treatment plan.
-  If approved, your prescription will be sent to the pharmacy and mailed discreetly to your doorstep.

Personalized Tirzepatide+ 8mg

The Instruction

Once the patient opens the link you sent, guide them through the landing screen using the following scripts.

2. Scenarios & Scripts

Scenario A: New Patients (First Time) *Explain that this step creates their secure profile.*

"On the screen, you will see a prompt to enter your email. Since this is your first time, please enter your email and create a new password. This will set up your secure account and take you directly to the medical form."

Scenario B: Existing Patients (Returning) *Clarify that they do not need to register again.*

"Since you have been with us before, you already have an account. Please simply Log In using your email and existing password to access your file."

Ensure the patient is looking at this specific screen:

Your data stays with you, always.

Email

Enter your email address

Password

Already have an account? [Log in](#)

☐ I accept the [Terms of Service](#), [Privacy Policy](#), [Returns Policy](#) and [Consent to Telehealth](#) of Dharma Nutrition Clinic. I also accept the [Privacy Policy](#) and [Terms of Service](#) of the partnering Provider Network.

Next >

- Note to Agent: If the patient is new but tries to "Log In," they will get an error. If an existing patient tries to "Sign Up" again, the system will say the email is taken. Please guide them accordingly.

Once the patient has logged in, guide them through the data entry screens using the instructions below.

Step 1: Personal Identification

- Instruction: "Please enter your full legal Name and Date of Birth exactly as they appear on your ID."

Tell us about you

This information will help your healthcare provider determine if you're eligible for treatment.

First name

Enter your first name

Last name

Enter your last name

Date of birth

mm/dd/yyyy

Next >

Step 2: Contact Information

- **Instruction:** "Enter your current Address and Phone Number. Please ensure this address is correct, as this is where we will ship your medication."

Some contact details

This information helps us ensure the accurate and timely delivery of your treatment.

Street address

Enter your address

Apartment, etc... (Optional)

Apartment number, unit...

City

City

State

ZIP code

ZIP code

+1 Phone number

Next >

Step 3: Location (Critical)

- **Instruction:** "Please select the State where you currently reside. This confirms you are within our licensed service area."

Please select your state of residence (Por favor, selecciona su Estado de residencia).

Step 4: Language Preference

- **Instruction:** "Select your preferred language (English or Spanish for example)"

Please select your preferred language for medical information communication (Por favor, seleccione su idioma preferido para recibir información médica).

☐ Arabic

☒ English

☐ French

☐ German

☐ Hindi

☐ Italian

☐ Japanese

☐ Korean

[< Previous](#)

[Next >](#)

Step 5: Goals & Biometrics

- **Weight Loss Goal:** "Select your primary motivation/goal for this treatment."

What are your primary weight loss goals? (¿Cuáles son sus principales objetivos con respecto a la pérdida de peso?)

☐ Enhanced physical appearance (Mejorar la apariencia física)

☐ Improved overall health (Mejorar la salud en general)

☐ Increased confidence (Elevar la confianza)

☐ Boost energy levels (Elevar niveles de energía)

☐ Improved chronic conditions (Mejorar condiciones crónicas)

- **Gender:** "Select your gender."

What is your gender as assigned at birth? (¿Cuál es su género asignado al nacer?)

☐ Male (Hombre)

☐ Female (Mujer)

- **Height & Weight: "Enter your accurate height and current weight."**

What is your height? (¿Cuál es su estatura?)

Please add height in feet and inches (e.g 5'9) (Por favor, ingresa tu estatura en pies y pulgadas)

Feet

Inches

What is your current weight? (¿Cuál es su peso actual?)

Weight in pounds (lbs) (Peso en libras)

150

- *System Logic:* The form automatically calculates BMI.
- IF BMI < 30: The system will prompt the patient to select a related medical condition (comorbidity) to justify eligibility.

- IF BMI > 30: The form will proceed automatically.

For patients with a BMI between 25-29 (overweight), a weight-related health condition must be present to qualify for treatment, unless you are already taking a GLP-1. Do you have any of the following medical conditions?

Para los pacientes con un IMC entre 25 y 29 (sobrepeso), debe existir una condición de salud relacionada con el peso para calificar para el tratamiento, a menos que ya estén tomando un GLP-1. ¿Presenta alguna de las siguientes condiciones médicas?

☐ High blood pressure (hypertension) (Presión sanguínea alta (hipertensión))

☐ Hyperlipidemia (high cholesterol) (Hiperlipidemia (colesterol alto))

☐ Obstructive sleep apnea (OSA) (Apnea del sueño obstructiva (ASO))

☐ Non-alcoholic fatty liver disease (NAFLD) (Enfermedad del hígado graso no alcohólico (EHNA))

☐ Osteoarthritis (Osteoarthritis)

Step 6: Medical Safety Checks (Contraindications)

- **Major Contraindications:** "Please review this list carefully. You must confirm that you do **NOT** have any of these specific conditions (e.g., Medullary Thyroid Cancer or MEN 2)."

Do you currently have or have been previously diagnosed with any of the following medical conditions? (¿Actualmente tiene o ha sido diagnosticado/a con alguna de las siguientes condiciones médicas?)

☐ Symptomatic heart failure (unstable/untreated) (Insuficiencia cardíaca sintomática (inestable/no tratada))

☐ Dysrhythmia, tachycardia or atrial fibrillation (unstable/untreated) (Disritmia, taquicardia o fibrilación auricular (inestable/no tratada))

☐ Heart failure (Fallo cardíaco)

☐ Multiple endocrine neoplasia, type 2 (MEN 2) (Neoplasia endocrina múltiple tipo 2 (NEM 2))

☐ Personal or family history of medullary thyroid cancer (Historial personal o familiar de cáncer medular de tiroides)

☐ Liver cirrhosis or end-stage liver disease (Cirrosis hepática o enfermedad del hígado en etapa terminal)

Step 7: Allergies

- **Instruction:** "Please enter **any** known allergies you have in the designated field. It is critical for your safety that you list everything here. If you have no allergies, please confirm that you have none to proceed."
- **System Logic:** If the patient selects "Yes," they will be required to type the specific allergies.

Do you have any allergies? (¿Padece usted alguna alergia?)

☐ Yes (Si)

☐ No (No)

Please list your allergies (Por favor, enumere sus alergias).

N/A

Type here

+ Add

Step 8: Current GLP-1 Usage

- **Instruction:** "Please indicate if you are currently using any GLP-1 medications (like Ozempic, Wegovy, Mounjaro, Semaglutide, Tirzepatide). If you select 'Yes,' enter your current dosage and date of last application so the doctor can adjust your treatment plan."

Are you currently taking a GLP-1 medication like Semaglutide or Tirzepatide? (¿Está tomando actualmente algún medicamento GLP-1, como Semaglutida o Tirzepatida?)

☐ Yes (Si)

☐ No (No)

What is the name of the GLP-1 you are currently taking and what's your current weekly dosage in milligrams (mg)? (¿Cuál es el nombre del medicamento GLP-1 que está tomando actualmente y cuál es su dosis semanal en miligramos?)

(Example: Wegovy 0.25mg)

Step 9: GLP-1 Allergy Verification

- **Instruction:** "Confirm whether you have any known allergies specifically to GLP-1 medications by selecting the appropriate option on the screen."

Do you have any known allergy to GLP-1 agonist medications? (¿Tiene alguna alergia a medicamentos agonistas GLP-1?)

☐ Yes (Si)

☐ No (No)

Step 10: Medication & Health History

- **Instruction:** "Review the list of restricted medications on the screen and confirm you are not taking any of them. Then, enter **all** other medications you are currently taking and list any past or present medical conditions in the fields provided."

Do you currently take any of the following medications?
(¿Actualmente toma alguno de los siguientes medicamentos?)

- ☐ Sulfonylureas including glyburide (glynase), glipizide (glucotrol), glimepiride (amaryl) (Sulfonilureas inclida glibenclamida)
- ☐ Meglitinides (repaglinide or nateglinide) (Meglitinidas)
- ☐ St. John's Wort (Mosto San Juan)
- ☐ Insulin (Insulina)
- ☐ None of the above (Ninguno de los anteriores)

Please list any medications or dietary supplements you are currently taking (Por favor, enumere cualquier medicamento o suplemento dietético que esté tomando).

REQUIRED: PLEASE ADD THE DOSES AND FREQUENCY OF EACH CURRENT MEDICATION. (REQUERIDO: POR FAVOR ENUMERE LAS DOSIS Y LA FRECUENCIA DE CADA MEDICAMENTO).

N/A

Type here

+ Add

Please list any medical conditions you are currently being treated for (Por favor, enumere las condiciones médicas por las cuales usted está siendo tratado).

N/A

Type here

Step 11: Compounding Eligibility (Mandatory)

- **Instruction:** "Select **at least one** factor from the displayed list to validate your eligibility for compounded medication. **Note:** You may select a condition even if it is **not currently active** (e.g., a past history), or general factors like 'Stress'."

Las respuestas serán revisadas como parte de su plan de atención.

☐

Blood sugar concerns or insulin resistance (Preocupaciones sobre la glucosa o resistencia a la insulina)

☐

High blood pressure (Hipertensión)

☐

Gut health issues (e.g., bloating, nausea, poor digestion)
(Problemas de salud intestinal (por ejemplo, hinchazón, náuseas, mala digestión))

☐

Daily alcohol use (Consumo diario de alcohol)

☐

Muscle cramps or spasms (Calambres o espasmos musculares)

☐

Nausea and/or vomiting (with GLP-1 therapy) (Náuseas y/o vómitos (con terapia de GLP-1))

☐

Stress, anxiety, or depression (Estrés, ansiedad o depresión)

☐ Exercise intolerance or slow recovery (Intolerancia al ejercicio o recuperación lenta)

☐ Premenstrual syndrome (PMS) (Síndrome premenstrual)

☐ Skin conditions (acne, rosacea, eczema) (Condiciones de la piel (acné, rosácea, eczema etc.))

☐ Joint pain or arthritis (Dolor en las articulaciones o artritis)

☐ Low energy or fatigue (Baja energía o fatiga)

☐ Hormonal imbalances (e.g., PCOS, thyroid issues, hormonal weight gain) (Desórdenes hormonales (por ejemplo, SOP, problemas de tiroides, aumento de peso hormonal))

☐ Nerve issues (e.g., numbness, tingling, nerve pain) (Problemas nerviosos (e.g. entumecimiento, hormigueo, dolor nervioso))

Cognitive or mood issues (e.g., brain fog, memory problems, mood

[< Previous](#)

[Next >](#)

☐ Cognitive or mood issues (e.g., brain fog, memory problems, mood swings) (Problemas cognitivos (e.g. niebla mental, problemas de memoria, cambios de humor))

METFORMIN, WEGOVY® OR ZEPBOUND® PURCHASES ONLY: I confirm that I did not select a compounded GLP-1 medication.

☐ SOLO COMPRAS DE METFORMINA, WEGOVY® O ZEPBOUND®: Confirmo que no he seleccionado un medicamento GLP-1 compuesto.

☐ None of the listed conditions currently apply to me (Ninguna de las condiciones enumeradas se aplica a mí actualmente)

[< Previous](#)

[Next >](#)

Step 12: Identity Verification

- **Instruction:** "Upload a clear, legible photo of your **Government-Issued ID** (Driver's License or Passport) to complete the verification process. It can be from your home country"

Please upload a government-issued photo ID (Por favor, suba una foto de una identificación válida emitida por el gobierno).

Such as a U.S. driver's license (not expired), a government issued ID card, U.S. passport, or passport card. (Como una licencia de conducir de U.S. (no vencida), una tarjeta de identificación emitida por el gobierno, pasaporte de U.S. o tarjeta de pasaporte.)

A few tips for taking the picture

- ✓ Ensure the room is well-lit. Natural light or bright, even lighting will help avoid shadows.
- ✓ Your image should have a good resolution and can only be .jpg, .jpeg, .png, .bmp, .pdf
- ✓ Ensure the image is clear and not blurry.

No file chosen

Step 13: Consent & Finalization

- **Instruction:** "Check the box to confirm you have read and understood the treatment information. Then, provide your **digital signature** at the bottom of the screen to authorize the consent form."

Please confirm the following to attest that all the information you have provided to us is true and complete (Por favor, confirme lo siguiente para atestiguar que toda la información que nos ha proporcionado es verdadera y completa).

CONSENT (ENGLISH)

I verify that I am the individual completing this survey and have personally answered all questions. I have carefully reviewed the content and understand the information being requested. I affirm that the information provided is truthful and complete to the best of my knowledge. I acknowledge the importance of honesty regarding my health and accept responsibility for any omissions or inaccuracies. I will not hold my healthcare provider or any associated parties liable for issues arising from information I have not disclosed. By signing below, I signify my agreement to the above statements and confirm the accuracy of the information provided.

CONSENTIMIENTO (ESPAÑOL)

Confirmo que soy la persona que está completando esta encuesta y que he respondido personalmente a todas las preguntas. He revisado cuidadosamente el contenido y entiendo la información solicitada. Afirmo que la información proporcionada es veraz y completa según mi mejor conocimiento. Reconozco la importancia de la honestidad en relación con mi salud y acepto la responsabilidad por cualquier omisión o inexactitud. No responsabilizaré a mi proveedor de atención médica ni a ninguna parte asociada por problemas que surjan debido a información que no haya revelado. Al firmar a continuación, manifiesto mi conformidad con las declaraciones anteriores y confirmo la exactitud de la información proporcionada.

☒ I have read the above, I do consent, and wish to move forward (He leído la información anterior, doy mi consentimiento, y deseo continuar)

☐ I DO NOT wish to continue (No deseo continuar)

GLP-1 Consent (Consentimiento para GLP-1)

INDICATION FOR USE (ENGLISH)

You are requesting treatment with a GLP-1 (Ozempic, Wegovy, or compounded semaglutide) or GIP/GLP-1 receptor agonist (Mounjaro, Zepbound, or compounded tirzepatide) medication as part of your treatment plan for the management of weight or obesity. These medications work by mimicking the action of incretin hormones, which help regulate blood sugar levels, promote feeling full, and reduce food intake.

POTENTIAL BENEFITS

- Weight loss or weight management
- Improved blood glucose control
- Reduced cardiovascular risk
- Potential improvement in overall metabolic health

POTENTIAL SIDE EFFECTS

While these medications can be beneficial, they may also cause side effects. Although not common, these medications can result in emergency room visits, hospitalizations, or even death. Common and serious side effects include, but are not limited to:

Common Side Effects:

- Nausea
- Vomiting
- Diarrhea
- Constipation
- Decreased appetite

[< Previous](#)

[Next >](#)

Serious Side Effects:

- Pancreatitis (inflammation of the pancreas)
- Hypoglycemia (low blood sugar), especially when used with other diabetes medications
- Gallbladder disease (e.g., gallstones)
- Kidney problems
- Allergic reactions (e.g., rash, itching, swelling)
- Gastroparesis (paralysis of the bowels)

RISKS AND CONSIDERATIONS

- Pancreatitis: There is a risk of developing pancreatitis. If you experience severe abdominal pain, nausea, or vomiting, you should contact your healthcare provider immediately.
- Thyroid Tumors: Animal studies have shown an increased risk of thyroid tumors with certain GLP-1 medications. Although this has not been confirmed in humans, please inform your healthcare provider if you have a history of thyroid cancer.
- Hypoglycemia: When taken with other diabetes medications, particularly insulin or sulfonylureas, there is a risk of low blood sugar. It is important that your provider knows if any of these medications are added to your regimen.
- Kidney Function: This medication may affect kidney function, particularly in patients with existing kidney disease. Regular monitoring of kidney function may be required.

FOR GLP-1 THERAPY USERS

By proceeding with this survey, I confirm that I have a qualifying condition that could benefit from the inclusion of Vitamin B12 (cyanocobalamin), Vitamin B6 (pyridoxine), Vitamin B3 (niacinamide), or Glucine (an amino acid), which I plan

[< Previous](#)

[Next >](#)

FOR GLP-1 THERAPY USERS

By proceeding with this survey, I confirm that I have a qualifying condition that could benefit from the inclusion of Vitamin B12 (cyanocobalamin), Vitamin B6 (pyridoxine), Vitamin B3 (niacinamide), or Glycine (an amino acid), which I plan to discuss with my doctor.

MONITORING AND CHECK-INS

You will require regular check-ins to monitor your response to the medication and to assess for any side effects. We may intermittently ask for full-body selfie images to ensure that your reported weight is consistent.

ACKNOWLEDGMENT

I acknowledge the uses, potential benefits, risks, and side effects of GLP-1 or GIP/GLP-1 receptor agonist medications. I understand the importance of regular monitoring and check-ins. I consent to the use of GLP-1 or GIP/GLP-1 receptor agonist medications as part of my treatment plan for overweight or obesity.

INDICACIÓN DE USO (ESPAÑOL)

Está solicitando tratamiento con un medicamento GLP-1 (Ozempic, Wegovy o semaglutida compuesta) o un agonista del receptor GIP/GLP-1 (Mounjaro, Zepbound o tirzepatida compuesta) como parte de su plan de tratamiento para el manejo del peso o la obesidad. Estos medicamentos funcionan imitando la acción de las hormonas incretinas, que ayudan a regular los niveles de azúcar en la sangre, promueven la sensación de saciedad y reducen la ingesta de alimentos.

[< Previous](#)

[Next >](#)

BENEFICIOS POTENCIALES:

- Pérdida de peso o manejo del peso
- Mejor control de la glucosa en sangre
- Reducción del riesgo cardiovascular
- Potencial mejora en la salud metabólica general

EFFECTOS SECUNDARIOS POTENCIALES:

Aunque estos medicamentos pueden ser beneficiosos, también pueden causar efectos secundarios. Aunque no es común, estos medicamentos pueden resultar en visitas a la sala de emergencias, hospitalizaciones o incluso la muerte. Los efectos secundarios comunes y graves incluyen, pero no se limitan a:

Efectos secundarios comunes:

- Náuseas
- Vómitos
- Diarrea
- Estreñimiento
- Disminución del apetito
- Indigestión

Efectos secundarios graves:

- Pancreatitis (inflamación del páncreas)
- Hipoglucemia (bajo nivel de azúcar en sangre), especialmente cuando se usa con otros medicamentos para la diabetes
- Enfermedad de la vesícula biliar (p. ej., cálculos biliares)
- Problemas renales
- Reacciones alérgicas (p. ej., sarpullido, picazón, hinchazón)

[< Previous](#)

[Next >](#)

EFECTOS SECUNDARIOS

- Reacciones alérgicas (p. ej., sarpullido, picazón, hinchazón)
- Gastroparesia (parálisis de los intestinos)

RIESGOS Y CONSIDERACIONES:

- Pancreatitis: Existe el riesgo de desarrollar pancreatitis. Si experimenta dolor abdominal severo, náuseas o vómitos, debe contactar a su proveedor de atención médica de inmediato.
- Tumores en la tiroides: Los estudios en animales han mostrado un mayor riesgo de tumores tiroideos con ciertos medicamentos GLP-1. Aunque esto no se ha confirmado en humanos, infórmele a su proveedor de atención médica si tiene antecedentes de cáncer de tiroides.
- Hipoglucemia: Cuando se toma con otros medicamentos para la diabetes, especialmente insulina o sulfonilureas, existe el riesgo de hipoglucemia. Es importante que su proveedor sepa si se agregan estos medicamentos a su tratamiento.
- Función renal: Este medicamento puede afectar la función renal, especialmente en pacientes con enfermedad renal preexistente. Puede ser necesario un monitoreo regular de la función renal.

PARA USUARIOS DE TERAPIA CON GLP-1

Al continuar con esta encuesta, confirmo que tengo una condición calificante que podría beneficiarse de la inclusión de la vitamina B12 (cianocobalamina), vitamina B6 (piridoxina), vitamina B3 (niacinamida) o glicina (un aminoácido), que planeo discutir con mi médico.

MONITOREO Y SEGUIMIENTO:

[< Previous](#)

[Next >](#)

necesario un monitoreo regular de la función renal.

Nutrition Guideline

Nutrition Consultations

1. Purpose & Value Proposition

Why do we require/offer this? While weight loss injections are a powerful tool, nutrition is the foundation of the process. The consultation provides the personalized roadmap patients need to achieve their specific goals.

- **The Key Differentiator:** This service separates Dharma from competitors who simply "ship medication" and leave the patient to figure it out alone. We provide comprehensive care.

2. Logistics & Format

- **Platform:** Google Meets (Video Call).
- **Duration:** 1 Hour (60 Minutes).
- **Time Zone:** All appointments and nutritionist shifts are scheduled in **Eastern Standard Time (EST)**. *Please ensure patients in other time zones are aware of this conversion.*

3. Patient Requirements

To ensure the patient gets the most value out of their hour, agents must emphasize the following when booking:

- **Environment:** The patient must be in a **quiet place with no distractions**.
- **Focus:** They cannot be driving, working, or in a loud public space during the call.

4. Suggested Scripting

How to explain the value to the patient:

"The medication is a great tool to suppress your appetite, but the nutrition plan is what actually drives your long-term results. Unlike other places that just mail you a box, we pair you with a nutritionist for a full hour on Google Meets to build a lifestyle plan that works specifically for you."

How to confirm the appointment conditions:

"Since this is a comprehensive 1-hour session with a specialist, please make sure you are in a quiet place where you can speak freely. We want to make sure you get the full benefit of the time!"

Nutritionist Schedule & Language Assignments

Objective: Ensure every patient is booked with a coach who speaks their preferred language at a time that fits their schedule.

1. Booking Rules (Language First)

- **CRITICAL:** Always verify the patient's preferred language before selecting a coach.
- **English/Portuguese Patients:** Must be booked with **Ana Sophia**.
- **Spanish Patients:** Can be booked with **Ana Sandoval, Paula, or Rosario** depending on time availability.

2. Master Schedule

Refer to this grid for standard operating hours. Times are listed in EST.

Nutritionist	Language	Mon	Tue	Wed	Thu	Fri	Sat
Ana Sandoval	 Spanish	12pm - 7pm	12pm - 7pm	12pm - 7pm	12pm - 7pm	12pm - 7pm	10am - 2pm
Ana Sophia Roman	 English /  Port.	9am - 6pm	CLOSED	CLOSED	CLOSED	9am - 6pm	9am - 1pm
Paula Alfonso	 Spanish	12pm - 7pm	9am - 4pm	12pm - 7pm	9am - 4pm	12pm - 7pm	9am - 12pm

Schedule consultations

Scheduling Nutritional Appointments

Objective: Correctly schedule the initial nutritional consultation using the dedicated booking form, ensuring data accuracy and client preparedness.

1. Preparation & System Access

- **Browser:** Always open the booking link in an Incognito Window to prevent caching errors.
- **HubSpot Check:** Before booking, review the contact in HubSpot.
 - Email Rule: You are responsible for gathering a Real Email Address.
 - *Note:* Dummy emails are placeholders. You must update the contact with their actual email for the appointment invites to work correctly.
 - No Contact Exists? Create one immediately.

2. The Booking Process

Step 1: Access the Form

- Use this specific link:
 - https://support.dharmanutritionclinic.com/form-nutritionist?hs_preview=NjZUGBYX-191436541983

Step 2: Client Information & Email Logic

- Enter ALL client information.
- If the client absolutely has no email: Use the following Dummy Email Format:
 - 1 + (Country Prefix) + (Client Phone Number) + @dummy.com
 - *Example (Colombia):* 1573145469554@dummy.com

Step 3: Nutritionist Selection & Notes

- **Language Selection:**
 - Select the specific Nutritionist requested (e.g., Ana Sophia for English).
 - Pro Tip (Spanish): You can select "RR Nutricionist Spanish" to view ALL combined open slots for Spanish speakers.
- **Mandatory Notes Format:**
 - You MUST enter the specific purchase details in the notes so the nutritionist is prepared.
 - *Format:* Purchase Type + Medication Name + Supplements/Extras

- *Example:* Single Purchase + Tirzepatide + Slimboost + Berberine

Schedule a meeting with a Nutritionist

Name* Last Name*

maria juarez

Email*

mjuarez@dharmanutritionclinic.com

Phone Number*

US +505-8489-9576

State* Agent*

Florida Maria Juarez

Nutritionist*

Paula Alfonso

Nutritionist notes*

Single Purchase + Tirzepatide. The patient refused to take slimboost as taken before. Patient has a sweet tooth and has used diets before.

Step 4: Time Selection

- Share the calendar availability with the client.
- Goal: Attempt to book the SOONEST AVAILABLE slot.
- Select the time → Re-enter client info to confirm → Check the box “Create Deal” → Click Confirm Appointment.

Meet with Paula Alfonso

Nutri confirmation

Confirm Nutrition appointments

It is essential to check all appointments scheduled for the following day, the consultations will appear the same way sellers and CS appointments are displayed in google calendar:

- **TOOLS WE ARE GOING TO USE IN THIS SECTION**

Google calendar:

<https://calendar.google.com/calendar>

Hubspot

Nutritionist

deal

confirmed:

<https://app.hubspot.com/contacts/43887344/objects/0-3/views/50819093/list>

Nutrition

consultation

control

spreadsheet:

<https://docs.google.com/spreadsheets/d/1JtpLiNmm6gBUWoWpupmRcaeQ-9oiVJwoZtDZ436NyWw/edit?gid=526806788#gid=526806788>

Step 1: Gathering the client's information:

- Open up the nutrition appointment found in google calendar, as shown bellow:

You will see meeting link, nutritionist email, client email and notes

Step 2: Confirmation through hubspot:

- Copy the Name of the patient associated with the consultation, and paste it in the Hubspot section of “**Nutrition deals confirmed**”
*“Note that the patient can only be found here by name, **not email or phone number**”*

- In the same section in hubspot, the third column will be call status where you can select either **CONFIRM** or **UNCONFIRMED**, depending on what you spoke with the client

Step 3: Confirmation through spreadsheet:

- Open up the link found at the beginning of this guide → open the second tab at the bottom named “schedule confirmation”

	CONSULTATION DATE	CONSULTATION TIME	MONTH	ASSIGNED TO	PAULA	ROSARIO
1281	1/20/2026	6:00 PM	Jan	Jean		
1282	WEDNESDAY					
1283	1/21/2026	9:30 AM	Jan	Jean		Confirmed
1284	1/21/2026	12:30 PM	Jan	Jean	Confirmed	
1285	1/21/2026	2:00 PM	Jan	Jean	Confirmed	
1286	1/21/2026	4:00 PM	Jan	Jean	Confirmed	
1287	1/21/2026	5:00 PM	Jan	Jean	Confirmed	
1288	1/21/2026	6:00 PM	Jan	Jean	Not confirmed	
1289	THURSDAY					
1290	1/22/2026	11:00 AM	Jan	Jean		Confirmed
1291	1/22/2026	2:00 PM	Jan	Jean	Confirmed	
1292	1/22/2026	3:00 PM	Jan	Jean	Confirmed	
1293	FRIDAY					
1294	1/23/2026	9:00 AM	Jan	Jean		Confirmed
1295	1/23/2026	10:00 AM	Jan	Jean		Confirmed
1296	1/23/2026	11:00 AM	Jan	Jean		Confirmed
1297	1/23/2026	12:30 PM	Jan	Jean	Confirmed	
1298	1/23/2026	2:00 PM	Jan	Jean		
1299	1/23/2026	3:00 PM	Jan	Jean	Not confirmed	
1300	1/23/2026	5:00 PM	Jan	Jean	Confirmed	
1301						
1302						
1303						

- Scroll down to the date and time of the appointment, (this information of date and time needs to be entered manually) → then select the box of the time and the nutritionist of the appointment that you confirmed, in the example below it's Ana Sandoval at 4:00 PM EST.

When the box is opened, a dropdown list of different options will appear (**Cancelled, confirmed, rescheduled and not confirmed**), select the most appropriate for your case

	CONSULTATION DATE	CONSULTATION TIME	MONTH	ASSIGNED TO	PAULA	ROSARIO	ANA SOPHIA	ANA SANDOVAL
1281	1/20/2026	6:00 PM	Jan	Jean				Confirmed
1282	WEDNESDAY

1284	1/21/2026	12:30 PM	Jan	Jean	Confirmed			
1285	1/21/2026	2:00 PM	Jan	Jean	Confirmed			
1286	1/21/2026	4:00 PM	Jan	Jean	Confirmed			
1287	1/21/2026	5:00 PM	Jan	Jean	Confirmed			
1288	1/21/2026	6:00 PM	Jan	Jean	Not confirmed			
1289	THURSDAY							
1290	1/22/2026	11:00 AM	Jan	Jean		Confirmed		
1291	1/22/2026	2:00 PM	Jan	Jean	Confirmed			
1292	1/22/2026	3:00 PM	Jan	Jean	Confirmed			
1293	FRIDAY							
1294	1/23/2026	9:00 AM	Jan	Jean		Confirmed		
1295	1/23/2026	10:00 AM	Jan	Jean		Confirmed		
1296	1/23/2026	11:00 AM	Jan	Jean		Confirmed		

Purchases from day before

Purchases from day before

In this section we are going to find step by step in how to check the nutritions that were purchased the day before, in order to have a tracked and detailed report of the nutritions booked, pending or any other action required on them.

TOOLS WE ARE GOING TO USE IN THIS SECTION

Patient portal:

[Nutrition Consultation - Control](#)

[Report dashboard in hubspot](#)

Step 1:

- Access report dashboard link, you'll see a list of all the nutritions from the day before → Copy the phone number of the client and paste it in the spreadsheet
You'll find different columns (**Name, purchase date, date of contact, observation, outcome, booked via, renewals, comments, consultation date, time, language, nutritionist**)

Meal plans verification

Meal plans verification

GENERAL GUIDELINE

Meal plans are sent directly to patients to the email address registered in our system, nutritionist have a 3 business days timeframe to send the corresponding plans, our nutritionist have the responsibility to make a copy to the admin email in order to check when it was sent, quality of the PDF and make sure the name on the PDF matches the email of the client.

TOOLS WE ARE GOING TO USE IN THIS SECTION

Respond IO:

<https://app.respond.io/>

Nutrition

consultation

control

spreadsheet:

<https://docs.google.com/spreadsheets/d/1JtpLiNmm6gBUWoWpupmRcaeQ-9oiVJwoZtDZ436NyWw/edit?gid=526806788#gid=526806788>

Step 1: VERIFICATION OF THE CLIENT WE ARE DOING THE RESEARCH

- We need to go to the spreadsheet and confirm which clients that already had the consultations are pending for the meal plan. ***For this explanation we are going as an example this client:***

14154107628	Irlanda Gutierrez
-------------	-------------------

- This client had the consultation with Ana Sandoval on 1/19 at 1:00 PM EST

SCHEDULE_2						
16093321010	NAME	CONSULTATION DATE	CONSULTATION TIME	LANGUAGE	NUTRITIONIST	
14154107628	Irlanda Gutierrez	1/19/2026	1:00 PM	Spanish	Ana Sandoval	

Step 2: RESPOND GMAIL

- With this information we go to Respond and select the GMAIL ADMIN inbox on the left

- (1) We select the inbox of the nutritionist the client had the consultation with → (2) and scroll until we locate the email with the client's name

(1)

(2)

Step 3: UPDATE IN THE NUTRITION SPREADSHEET

- The columns P and Q of the spreadsheet are respectively “Diet sent” and “Diet sent date”: The column diet sent is just a checkmark, select it when if the diet was sent → after that go to column Q and enter the date the diet was sent

N	O	P	Q
NUTRITIONIST	ATTENDANCE	DIET SENT	DIET SENT DATE
Ana Sandoval	Attented	☒	1/20/2026

Patient portal

Patient portal

This system serves as the primary platform for managing patient-related operations. It provides controlled access to patient records, portal messaging, prescription, shipping address information, and the submission of both registered and pending medical forms.

TOOLS WE ARE GOING TO USE IN THIS SECTION

Patient portal:

<https://brand.ahco.io/login?bc=dharmanutritionclinic>

1. How to long in

- . Open the link of the patient portal and enter your credentials, you will be logged in into the dashboard in the main section

The screenshot shows the login interface of the Patient Portal. At the top, it says "Welcome Back!" followed by a "Sign in" link. Below this are three input fields: "Company code" with the value "dharmanutritionclinic", "Email" with the value "jlopez@dharmanutritionclinic.com", and "Password" with masked characters "*****" and a toggle icon. A "Forgot your password?" link is positioned below the password field. At the bottom is a dark blue "Sign in" button. A footer note states: "By signing in, I accept the Terms of Service and Privacy Policy of Architek Health."

Welcome Back!

How to check patients info

How to check patients info

TOOLS WE ARE GOING TO USE IN THIS SECTION

Patient portal:

<https://brand.ahco.io/login?bc=dharmanutritionclinic>

Step 1:

- You will be logged in to the task queue in the dashboard, found in the left bar of the screen as shown below

- (1) In order to access patient information we need to select patients→ (2) then enter name or email address of the person in the search bar

- Patient profile description**

1: This section provides all the primary information from the customer like shipping address, phone number, full name, email address, which we can edit in case is necessary by selecting the option edit in the upper right hand corner

2: this part is divided into other subcategories: **PRODUCTS, ORDERS, TASK HISTORY.**

→

Products: Here we have access all the products that the client had acquired

Orders: Based on the products the client acquired, in “order” section we can check the shipping

status of the medication (for knowledge base of tracking go to part II of this logic)

Task history: Task is related to the medical forms the client has performed, when the client finish the medical form it goes as a pending task for the doctor to review it, as soon as the review is done and everything is checked, the task turns as completed

PART II

In case the patient wants to track the medications first and most important thing is to guide them how to do it by themselves, share the patient portal [here](#) and let them know they can go to “My products” → and they will see in blue **Shipped** if the medication has a tracking number or they will see it in grey **Ordered** if the medication has not been shipped

Agent assisting the tracking to the patient

1. Check when was the medical form completed and double check if the 7-10 Business days have past, if we are still within that timeframe let the patient know the medication is still being prepared and let them know once the carrier has the medication the tracking number will appear in the patient portal

- If we have the tracking ID visible in the patient portal, click on orders

/Glycine/B12 10m

- Then select the blue shipped option to the right and go to “view tracking Details”

Medical forms

Medical forms

Medical forms are the way for the doctors to prescribe the medication to the patients, it is basically a set of personal and medical questions related to the medication.

As soon as the seller closes the payment with the shortcut, the Medical form is sent in order to complete it as fast as possible and avoid any delay regarding delivery of the medication, patient is provided with an instructive video in the shortcut

TOOLS WE ARE GOING TO USE IN THIS SECTION

Patient portal:

<https://brand.ahco.io/login?bc=dharmanutritionclinic>

Case 1: The patient says he already finished the medical form, continue with these steps, otherwise go to **PART II**

- We need to check in the patient portal if was completed, by logging in, using the link [patient portal](#)
- Go to the task queue and try to find the form under the name of the patient

- If the patient matches date and the treatment they purchased we need to confirm the delivery address by copying the name and paste it in customer option to the right

- Copy the address found in the patient's information on the left side

The screenshot shows a patient profile for Cristina Ayala. The 'Account' tab is selected. The shipping address is highlighted with a blue rectangular box. The address details are: 2323 North Arrowhead Avenue, San Bernardino, California 92405.

Account		Health	Edit
Name Cristina Ayala			
Age 46	Day of birth 11/06/1979		
Gender Female			
Preferred language English			
Shipping address 2323 North Arrowhead Avenue San Bernardino California 92405			
Phone number +1 9092763868			
Email address kittyxoxo2014@gmail.com			

- Go to respond and use the snippet **/CONFIRMACIONDIRECCION** to send the confirmation message, once the patient confirms the address, send the snippet **/TEMPOENTREGA**
- IF the address is incorrect you must update it by clicking the option edit in the patient's profile→ then fill out this logistic [form](#) → and Notify Edwin Toro through teams about that address change

The screenshot shows the same patient profile for Cristina Ayala. The 'Edit' button, located next to the 'Health' tab, is highlighted with a blue rectangular box. The address details remain the same: 2323 North Arrowhead Avenue, San Bernardino, California 92405.

Account		Health	Edit
Name Cristina Ayala			
Age 46	Day of birth 11/06/1979		
Gender Female

Email address kittyxoxo2014@gmail.com			

PART II

- If the patient has not finished either because he hasn't started or is experiencing issues at the time of completion (wrong password, page frozen), give these recommendations to the patient:

Recomendaciones:

Recuerda que debes tener los datos 5G y no desde red Wifi para que te permita avanzar de manera correcta y si lo puedes hacer desde una computadora mucho mejor 🌟

i Para estatura recuerda que es en pies por ejemplo si mides 5'0" deberás colocar en Feet 5 y en Inches 0.

i En tu peso solo debes colocar el número en libras por ejemplo

Peso 165

i Hay una parte del formulario que en la última pregunta AVISO DE ELEGIBILIDAD debes seleccionar cualquier condición que pueda aplicarse a ti, incluso si ocurre ocasionalmente (por ejemplo, sentir estrés fatiga, o baja energía algunas veces).

🌟 Inténtalo así nuevamente y me cuentas por favor. 🙏

Please note, if the patient did not fill out the medical form the same day, the following day the link will be expired, please use this [spreadsheet](#) → go to the lower tab named "surveys" → you'll find a table of all the medical form links, chose the link that the seller used to send the SC

28		Tirzepatide + Slim Boost	\$1,047.28	http

2. Once you're logged in, you'll see the option "messages" on the right side

- ### 3. (1) Once you click the messages option you'll see the name of the patients as a list to the left of the screen→ (2) when you open the conversation it will be displayed to the right of the screen.

The screenshot displays a web application interface for Dharma Nutrition. On the left is a sidebar with navigation links: Task queue, Messages (highlighted), Customers, Prescriptions, Coupons, Payments, and Team. The main content area is divided into two panels. The left panel, titled 'Messages', shows a list of conversations with a search bar and tabs for 'All' and 'Unread'. A large handwritten number '1' is placed over the list. The right panel shows a detailed view of a conversation with 'Support - Monica Tascon' (mtascon392@gmail.com). A large handwritten number '2' is placed over the conversation details. The conversation history includes messages from Monica Tascon and Support, with timestamps and a scroll bar on the right.

Today

Monica Tascon (Patient) 09:21 AM

Buen día

quiero hacer la consulta acerca de mi tratamiento, ayer me apliqué mi última dosis de 70 unidades, me quedó una pequeña cantidad del medicamento, quisiera saber ahora que puedo hacer

Support 09:27 AM

Hola, ¿cómo estás?

¡Tenemos una cita con nuestra experta *HOY* a las *1:00 PM HORA FL* para conversar sobre el próximo paso del tratamiento!

👉 Te funciona este horario?

Monica Tascon (Patient) 09:32 AM

Hola, a la 1:00 pm no podría por mi horario de trabajo, podría ser a las 3:00 pm?

Support 09:50 AM

Tengo disponible 3:20 pm funciona para ti?

Note: Use the same phraseology applied in respond to answers portal messages, you can implement emojis to make the interaction even closer to the patient

CS messages

CS messages

Our main source of messages from our patients is the platform respond, is where we have all the interactions stored from them, we received messages from all the media, tik tok, whatsapp, instagram and messenger, for Customer service team we have an inbox dedicated for those clients

Respond IO:

<https://app.respond.io/>

In the following subtabs, we are going to have a look at the most common cases handled by the customer service team explained step by step.

Dosage Assistance

Dosage Assistance

TOOLS WE ARE GOING TO USE IN THIS SECTION

Patient portal:

<https://brand.ahco.io/login?bc=dharmanutritionclinic>

Respond IO:

<https://app.respond.io/>

If we receive a message from a patient saying they received the medication

1. First step is to ask for the blue package with the white sticker in the outside, we can use the snippet in respond found as /AYUDADOSIS, or you can copy and paste this text:

Me alegra saber que ya recibiste tus inyecciones.

Para poder ayudarte mejor, ¿podrías enviarme una foto del paquete pequeño azul o blanco que tiene una etiqueta en el exterior con la dosis?

Así podré explicarte con más precisión.

¡Estoy aquí para asistirte! 💙✨

2. As soon as the patient sends the picture of the blue package, we need to confirm with them if it's the first time applying or if they have used it before, by making that probing question, if the patient answers that is the first time, go to **step 3**, otherwise go to **step 4**

3. Read the dosage printed in the package depending on the treatment they purchased, here you will see the list of dosage plans:

NAD +

Aquí tienes tu plan de dosis para NAD+, siguiendo tu prescripción:

Injectar 50 unidades (0.5 ml) por vía subcutánea tres veces por semana.

Los sitios de aplicación pueden ser: el costado de los brazos, el abdomen (a 3 dedos del ombligo) y el costado de los muslos. Es muy importante alternar las ubicaciones para evitar la irritación de la piel. 💉😊

Importante:

Injectar un día y pausar dos días antes de la siguiente aplicación.

Déjame saber si tienes alguna duda. 😊💙

STRIVE

SEMA 1MG

Aquí tienes tu plan de dosis para SEMAGLUTIDE, siguiendo tu prescripción:

Semana 1-4: Inyectar 5 unidades de semaglutide por vía subcutánea una vez a la semana.

Aplicar 1 vez a la semana, el mismo día de la semana. Los sitios de aplicación pueden ser: el costado de los brazos, el abdomen (a 3 dedos del ombligo) y el costado de los muslos. Es muy importante alternar las ubicaciones para evitar la irritación de la piel.  

Si tienes alguna duda, estoy a tu disposición para ayudarte.  

SEMA 3MG

Aquí tienes tu plan de dosis para SEMAGLUTIDE, siguiendo tu prescripción:

Semana 1-4: Inyectar 5 unidades de semaglutide por vía subcutánea una vez a la semana.

Semana 5-8: Inyectar 10 unidades de semaglutide por vía subcutánea una vez a la semana.

Aplicar 1 vez a la semana, el mismo día de la semana. Los sitios de aplicación pueden ser: el costado de los brazos, el abdomen (a 3 dedos del ombligo) y el costado de los muslos. Es muy importante alternar las ubicaciones para evitar la irritación de la piel.  

Si tienes alguna duda, estoy a tu disposición para ayudarte.  

SEMA 7MG

Aquí tienes tu plan de dosis para SEMAGLUTIDE, siguiendo tu prescripción:

Semana 1-4: Inyectar 5 unidades de semaglutide por vía subcutánea una vez a la semana.

Semana 5-8: Inyectar 10 unidades de semaglutide por vía subcutánea una vez a la semana.

Semana 9-12: Inyectar 20 unidades de semaglutide por vía subcutánea una vez a la semana.

Aplicar 1 vez a la semana, el mismo día de la semana. Los sitios de aplicación pueden ser: el costado de los brazos, el abdomen (a 3 dedos del ombligo) y el costado de los muslos. Es muy importante alternar las ubicaciones para evitar la irritación de la piel.  

Si tienes alguna duda, estoy a tu disposición para ayudarte.  

TIRZE 8MG

Aquí tienes tu plan de dosis para TIRZEPATIDE, siguiendo tu prescripción:

Semana 1-4: Inyectar 20 unidades de Tirzepatide por vía subcutánea una vez a la semana.

Aplicar 1 vez a la semana, el mismo día de la semana. Los sitios de aplicación pueden ser: el costado de los brazos, el abdomen (a 3 dedos del ombligo) y el costado de los muslos. Es muy importante alternar las ubicaciones para evitar la irritación de la piel.  

TIRZE 24MG

Aquí tienes tu plan de dosis para TIRZEPATIDE, siguiendo tu prescripción:

Semana 1-4: Inyectar 20 unidades de Tirzepatide por vía subcutánea una vez a la semana.

Semana 5-8: Inyectar 40 unidades de Tirzepatide por vía subcutánea una vez a la semana.

Aplicar 1 vez a la semana, el mismo día de la semana. Los sitios de aplicación pueden ser: el costado de los brazos, el abdomen (a 3 dedos del ombligo) y el costado de los muslos. Es muy importante alternar las ubicaciones para evitar la irritación de la piel.  

TIRZE 52MG

Aquí tienes tu plan de dosis para TIRZEPATIDE, siguiendo tu prescripción:

Semana 1-4: Inyectar 20 unidades de Tirzepatide por vía subcutánea una vez a la semana.

Semana 5-8: Inyectar 40 unidades de Tirzepatide por vía subcutánea una vez a la semana.

Semana 9-12: Inyectar 70 unidades de Tirzepatide por vía subcutánea una vez a la semana.

Aplicar 1 vez a la semana, el mismo día de la semana. Los sitios de aplicación pueden ser: el costado de los brazos, el abdomen (a 3 dedos del ombligo) y el costado de los muslos. Es muy importante alternar las ubicaciones para evitar la irritación de la piel.  

TIRZE MICRODOSIS

Aquí tienes tu plan de dosis para TIRZEPATIDE, siguiendo tu prescripción:

Semana 1-8: Inyectar 10 unidades de Tirzepatide por vía subcutánea una vez a la semana.

Aplicar 1 vez a la semana, el mismo día de la semana. Los sitios de aplicación pueden ser: el costado de los brazos, el abdomen (a 3 dedos del ombligo) y el costado de los muslos. Es muy importante alternar las ubicaciones para evitar la irritación de la piel.

Package lost

After the delivery of the medication either by (UPS or FEDEX) our patients should notify us about any issue upon delivery, we have a timeframe of 6 days to make a claim to the pharmacy about an inconvenience, here's the guide on how to guide our patients in case this happens

- First we want to make sure the patient confirmed the address as soon as the medical form was filled
- If a patient says they can't find the medication when the tracking ID status is delivered, we should try our best to make sure is 100% lost by asking probing questions like (was there a possibility that a neighbor might take it, do you have cameras around the spot of delivery)
- We must double check with the patient the POD shown in the carrier page, eg in the picture bellow, ask them if that's what the entrance, door o house look like

Tracking ID: 394831968346  

✓ Delivered

Monday, 11/3/25 at 11:51 AM

Signed for by: Signature not required

From

Gilbert,AZ US

To

ADAIRSVILLE, GA U'

- If the patient finally finds the package, CASE IS SOLVED, otherwise go to step 1

Step 1:

- Ask the patient to go to the carrier page and using the tracking number they will find an option at the bottom to “file a claim” or “report a missing package”

- As soon as the patient provides the case number, send a message to Carol using this template, informing about the situation:

  **Patient's Name:**
 **Phone Number:**
 **E-mail:**
 **Treatment:**
 **Situation:**

- Simultaneously contact Edwin Toro through teams and let him know about the situation including patients information so he can reach out to the Pharmacy
- Inform the patient that we are working on her/his case and that a resolution will be provided as soon as practicable
