

Sales SOP

STANDARD OPERATING PROCEDURE

DEPARTMENT: SALES & CLOSING TEAM

1. INTRODUCTION: THE ENGINE OF GROWTH

Welcome to the **Dharma Nutrition Clinic Sales Team**. You are the driving force behind our mission and the direct bridge between a patient's desire for change and the medical solution they need.

In this role, you are not just "taking orders." You are a **Treatment Specialist**. You are guiding people through one of the most vulnerable and important decisions of their lives: their health and body image. Your ability to build trust, educate, and close with integrity is what powers this company.

2. PURPOSE OF THIS PLAYBOOK

Talent wins games, but **systems win championships**. The purpose of this SOP is to eliminate guesswork from your sales process.

This document outlines the "Dharma Way" of selling—from the moment you start the day to the moment the payment is processed. By following these protocols, we ensure that every client receives the same high standard of care, accurate medical information, and professional service, regardless of who they speak to.

3. THE 3 PILLARS OF A DHARMA SELLER

To succeed in this role, you must master three distinct identities:

- 🧠 **The Specialist (Education):** Our clients are often confused by misinformation about GLP-1s (Semaglutide/Tirzepatide). Your job is to simplify science. You must be an expert on our products, confidently explaining how they work, the side effects, and the results they can expect.
- 🤝 **The Partner (Empathy):** Weight loss is emotional. You must listen more than you speak. Validating the client's struggle ("I understand how frustrating that is") is the key to unlocking the sale. We sell solutions, not just injections.
- 🎯 **The Closer (Execution):** Empathy without a solution is just a conversation. Your goal is **to lead the client to a decision**. You must be proficient in objection handling, price presentation, and securing the commitment efficiently.

4. OUR NON-NEGOTIABLES

High performance at Dharma Nutrition Clinic is built on these core values:

1. **Integrity First:** We **never** oversell results or downplay safety protocols to get a credit card. If a patient is not eligible, we do not sell.
2. **Speed & Precision:** You must live in the CRM (HubSpot) and Respond.io. Accurate notes, timely follow-ups, and organized pipelines are not optional—they are your job description.
3. **The "One-Call" Mindset:** We do not rely on callbacks or "thinking about it." The sale happens **now**. We stay on the line, overcome every objection, and guide the patient to a decision during the first discovery call. We do not hang up until we have secured the sale.

This SOP is your blueprint for success. Master the process, and the results will follow.

Daily Routine

Daily Sales Routine & Workflow

Objective: To maintain high energy, continuous improvement, and strict organization throughout the sales day. Discipline in this routine directly correlates to your closing rate.

1. Start of Shift: Activation & Training

- **Clock In:** Immediately start the **Hubstaff Timer** to begin your shift tracking.
- **Team Check-In:** Send a "Good Morning" message to the **Sales Team Group Chat** to signal you are online and ready.
- **Mandatory Training (First 15 Minutes):**
 - Watch 15 minutes of the **Jordan Belfort Sales Course**.
 - **Action:** Take detailed notes and add them to your personal "Training Word Document."
 - **Rule:** You are **not authorized** to begin calls until this training block and your notes are completed. This sets your mindset for the day.

2. Daily Sales Huddle (The Meeting)

After your individual training, join the team meeting.

Schedule:

- **Monday – Thursday:** 10:15 AM – 10:40 AM
- **Friday & Saturday:** 9:15 AM – 9:40 AM

Agenda:

- **Course Review:** Discuss insights from the morning's Jordan Belfort session.
- **Strategy:** align on daily goals and lead flow.
- **Roleplay:** Warm up with live scenarios to sharpen objection handling before the first real call.

3. Execution Phase: Consultations & Follow-Ups

Once the meeting ends, move immediately to your scheduled calls.

- **Punctuality:** Consultations are scheduled in **20-minute blocks**. You must call exactly at the scheduled time. Lateness leads to No-Shows.
- **Gap Management (No-Shows):**
 - If a scheduled client does not answer (after the Double Dial), do not sit idle.
 - Immediately pull up the **Follow-Up List** (leads who previously contacted us/warm leads) and dial them to fill the gap.

- **Post-Call Hygiene:**
 - After *every* call, log the outcome in **HubSpot** and update **Respond.io** immediately.
 - *Motto:* "If it isn't in HubSpot, it didn't happen." Organization is the key to closing.

4. Lunch Break Protocol

- **Duration:** You are entitled to a strict **30-minute** lunch/rest break.
- **Time Tracking:** You must **Pause** your HubSpot timer when leaving and **Resume** it immediately upon returning.
- **Hand-Off Protocol:**
 - If a call runs late and cuts into your break time, or if a client needs immediate attention while you are leaving, post the details in the **Sales + CS Group Chat**.
 - Do not leave a client waiting. Ensure a team member takes over so you can take your break.

5. End of Shift

- **Clock Out:** Stop the HubSpot Timer.
- **Sign Off:** Send a farewell message in the **Sales Team Group Chat** to confirm you are logging off.

Operational Protocols & Systems

Operational Protocols & Systems

Objective: Master the tools, tracking, and post-sale workflows required to execute a flawless sales process.

1. Communication Tech Stack

Use the right tool for the right channel. Do not mix them up.

- **Respond.io:** Used for **Text Messages & Voice Notes ONLY**.
 - *Protocol:* Before messaging, always review the chat history to avoid asking questions the client has already answered.
- **Aircall:** Used for **Voice Calls ONLY**.
- **Doxy.me:** Used for **Video Consultations ONLY**.
- **Google Calendar:** Your source of truth for checking scheduled appointment slots.

2. Lead Classification & Tracking

- **Where to find Client Info:** Review **Respond.io** history (primary source of user details) and **HubSpot** (Deals/Notes).
- **Data Entry (Critical):**
 - You must enter data into the **Sales Status Spreadsheet AND HubSpot** immediately after every call.
 - *Zero-Lag Rule:* Do not wait until the end of the shift. Data must be live.

Lead Temperature Definitions:

-  **COLD:** Extremely not interested or hostile.
-  **WARM:** Engaged, asking questions, considering the treatment, or "thinking about it."
-  **HOT:** Ready to purchase immediately but blocked *only* by financial constraints/payment timing.

3. Scheduling & Inbox Management

Inbox Hygiene (Respond.io):

- **Your Queue:** Keep only *current* clients in your Inbox (scheduled for today or future dates).
- **Unscheduled Leads:** If a patient is not scheduled for a discovery call, move them to **Front Desk**. Do not clog your sales pipe.
- **Closing Chats:** Once a call is finished, close the chat using the standard closing steps.

Scheduling Protocol:

If you need to schedule an appointment use the link to schedule it and follow the steps on the Section Scheduling an appointment:

https://support.dharmanutritionclinic.com/sellers?hs_preview=yOrvQGsl-192775277694

4. The Sales Tool (Quoting Tool)

This tool determines pricing and eligibility. Accuracy is mandatory.

- **State Selection:** Select the correct State first to ensure regulatory availability.
- **Editing Rules:** Add the weight and height in the correct field.
- **BMI Logic (25–30):** If BMI is in this range, you must select the specific medical condition to validate eligibility.
- **Upselling:** Always attempt to upsell **NAD+**.
- **Referrals:** Discount codes apply **ONLY** to the GLP-1 Standard Dose medication, not to add-ons.

5. Post-Sale Workflows (Closing)

Once the payment is secured, follow these steps immediately.

A. Medical Forms Logic *Select the correct treatment in Respond.io to trigger the correct form.*

- **Lipo-Mino + Semaglutide:** Select "Semaglutide" only. (Send both surveys).
- **Lipo-Mino + Tirzepatide:** Select "Tirzepatide" only. (Send both surveys).
- **NAD + Tirzepatide:** Select "Tirzepatide" only. (Send both surveys).
- *Note:* Ensure you send the correct link. If the medical form link is wrong, the Pharmacy **cannot** dispatch the medicine.

B. Booking the Nutritional Appointment *Book this immediately after purchase. The system times out in 2 minutes.*

- **Notes Format:** Strict format required: 1/1 [Medication] and [Booster]
 - *Example:* 1/1 Tirzepatide and Slimboost
 - *Warning:* Do not add any extra text to these notes.
- **Nutritionists:**
 - **Maria Sandoval**
 - **Paula Alfonso**

Products

Products & Treatments Overview

1. Objective

To sell effectively, you must be the expert. Clients are not just buying a medication; they are buying a **result**. This section outlines the specific tools we use—Medications, Supplements, and Nutritional Support—to help clients achieve their weight loss goals safely and sustainably.

2. Our Product Philosophy

At Dharma Nutrition Clinic, we do not believe in "magic pills." We believe in an approach that combines science with lifestyle changes.

- **The Engine:** Our GLP-1 Medications (Semaglutide/Tirzepatide) drive the weight loss.
- **The Boost:** Our Wellness Injections (Lipo Mino/NAD+) accelerate metabolism and energy.
- **The Fuel:** Our Supplements optimize digestion and health while on treatment.
- **The Steering:** Our Nutritional Coaching ensures the weight stays off long-term.

3. Quality & Safety Standard

Confidence in our product is your strongest sales tool. All our injectable medications are sourced from **FDA-monitored 503a Compounding Pharmacies** in the United States. We adhere to the highest standards of sterility and potency, ensuring our patients receive safe, effective, and high-purity treatments every time.

4. The Product Categories

In this section, we will break down:

1. **GLP-1 Injectables:** The core weight loss treatments (Semaglutide & Tirzepatide).
2. **Wellness Injections:** Specialized metabolic boosters like **Lipo Mino** (Fat Burning Mix) and **NAD+** (Cellular Repair/Anti-Aging) to enhance results.
3. **Oral Supplements:** The specific vitamins required to manage side effects and support overall health.
4. **Nutritional Plans:** The service component that ensures long-term success.

GLP-1 Medications

GLP-1 Medications (Semaglutide & Tirzepatide)

1. Overview: What are they?

Semaglutide and Tirzepatide are injectable medications used primarily for weight loss and blood sugar regulation. They work by mimicking natural gut hormones that control appetite, digestion, and insulin response.

A. Semaglutide (The Standard)

- **Common Brand Names:** Known on the market as **Ozempic®** or **Wegovy®**.
- **Mechanism:** Mimics **GLP-1**, a hormone released after eating.
- **Action:** Reduces appetite, slows gastric emptying (makes you feel full longer), and lowers blood sugar.

B. Tirzepatide (The Premium / "Dual Action")

- **Common Brand Names:** Known on the market as **Mounjaro®** or **Zepbound®**.
- **Mechanism:** Mimics **GLP-1 AND GIP** hormones simultaneously.
- **Action:** Provides all the benefits of Semaglutide **PLUS** enhanced insulin response and further appetite suppression.
- **Result:** Often leads to more significant and faster weight loss due to this "double punch."

Important Note: Our Focus

While we use brand names like Ozempic or Mounjaro as reference points because patients recognize them, **our goal is NOT to sell the name-brand medications.**

We focus exclusively on the **compounded versions** of these medications. This allows us to offer the same active ingredients (Semaglutide or Tirzepatide) at a more accessible price point and with precise, micro-dosed tailoring that isn't always possible with pre-filled commercial pens.

2. Main Benefits (The Pitch)

-  **Appetite Control:** Significantly reduces hunger and food cravings.
-  **Satiety:** Makes you feel full faster and stay full longer.
-  **Blood Sugar:** Improves insulin sensitivity and helps reverse insulin resistance.

-  **Safe Weight Loss:** Promotes gradual, sustainable weight reduction.
 -  **Metabolic Health:** Improves markers like cholesterol and triglycerides.
-

3. Eligibility Criteria (BMI Rules)

To qualify, a patient must meet strict BMI and Age requirements.

- **Age:** Must be **18+**.
- **BMI < 25:**  **Not Approved** (Unless Asian descent, see below).
- **BMI ≥ 30:**  **Automatically Eligible.**
- **BMI 25 – 29.9:**  **Conditional Eligibility.**
 - *Must have at least ONE weight-related condition:*
 - High Blood Pressure (Hypertension)
 - High Cholesterol (Dyslipidemia)
 - Type 2 Diabetes / Prediabetes
 - PCOS (Polycystic Ovarian Syndrome)
 - Fatty Liver (NAFLD)
 - Sleep Apnea
 - GERD / Osteoarthritis
- **Asian Descent:** Eligible with **BMI between 23 – 29.9.**

 **Switch Rule:** If a patient is *already* using a GLP-1 and provides a previous prescription (with dose/date), approval can be granted even if their current BMI has dropped below the threshold.

4. Absolute Contraindications (NOT ELIGIBLE)

*If the patient reports ANY of the following, they are **NOT** eligible. Do not sell.*

Thyroid & Cancer

- **MEN 2:** Multiple Endocrine Neoplasia, Type 2.
- **Thyroid Cancer:** Personal or family history of **Medullary Thyroid Cancer**.
- **Active Cancer.**

Heart & Organ Health

- **Heart Failure:** Symptomatic, unstable, or untreated.
- **Arrhythmias:** Unstable/untreated Tachycardia or Atrial Fibrillation.
- **Kidney Disease:** Chronic (Stage 3 or greater).
- **Liver Disease:** Cirrhosis or end-stage liver disease.
- **Pancreas:** History of Pancreatitis or Pancreatic Cancer.

- **Gallbladder:** Current Gallstones or active Gallbladder disease.

Digestive & Surgical

- **Gastroparesis:** History of delayed gastric emptying.
- **Barrett's Esophagus.**
- **Recent Surgery:** Gastric Bypass or Sleeve within the last **12 months**.

Mental Health & Other

- **Eating Disorders:** Current or prior Anorexia or Bulimia.
- **Suicide/Homicide:** History of attempts or active ideation.
- **Transplant:** History of organ transplant with anti-rejection meds.
- **Diabetes: Type 1 Diabetes** is a disqualification (Type 2 is OK).
- **Hypoglycemia.**

Pregnancy & Female Health

- **Pregnant or Breastfeeding.**
- **Planning Pregnancy:** In the near future.
- **Recently Pregnant:** Within the past 9 months (requires OB clearance).

5. Disqualifying Medications

Do not offer treatment if the patient is taking:

- **Insulin**
- **Sulfonylureas:** (Glyburide, Glipizide, Glimepiride)
- **Meglitinides:** (Repaglinide, Nateglinide)
- **St. John's Wort**

6. Common Side Effects

Be transparent to manage expectations.

- Nausea
 - Fatigue
 - Headache
 - Constipation
-

7. Final Reminders for Agents

1. **Do Not Diagnose:** Your job is to facilitate the sale and screen for eligibility. Only the Medical Team determines final approval and dosing.
2. **Identify Red Flags:** If you hear any condition listed in the Contraindications, you must stop and escalate or disqualify.
3. **Medical Advice:** Never give specific medical advice. If a patient asks strictly medical questions, refer them to the Provider Team.

GLP-1 Microdosing

GLP-1 Microdosing Program

1. What is Microdosing?

The Microdosing Program is a specialized, low-dose protocol designed for clients who want to lose **stubborn fat** without the intensity of a full medical dose. It is a **gentler, more affordable option** that prioritizes comfort and steady results over rapid, drastic weight loss.

2. 🎯 Eligibility & The "BMI Gap"

This is the only program available for clients with a lower BMI.

- **Target BMI: 18.5 to 29.**
 - **The Key Advantage:** Unlike the standard program, Microdosing **does NOT require** a weight-related medical condition (comorbidity) to qualify.
 - **Best For:** Clients who just want to lose "the last 10-15 pounds" or tone up.
-

3. Expected Results (2-Month Goals)

Set realistic expectations based on the medication chosen.

- 📈 **Tirzepatide Microdose:** Expect weight loss of up to **12 pounds** in two months.
 - 🎯 **Semaglutide Microdose:** Expect weight loss of up to **10 pounds** in two months.
-

4. Why Choose Microdosing? (The Sales Pitch)

Use these points to sell the "Experience" of the program.

A. Gentle Adaptation 😊

- "We use a slow, steady dose to let your body adapt gently."
- "This prioritizes your comfort and helps minimize side effects like nausea or GI distress."
- **Result:** Clients are much more likely to stay consistent and finish the treatment!

B. Sustainable Lifestyle 🌱

- "This isn't a crash diet; it's a lifestyle tool."

- "It works alongside your gym and diet efforts to facilitate a long-term approach to weight management."
- **Metabolic Wins:** You still get improved insulin sensitivity and better blood sugar control.

C. Health & Wellness Benefits ✨

- 🚫 **Calmer Food Noise:** Silences constant cravings and thoughts about food.
- 🔥 **Reduces Inflammation:** great for overall joint and gut health.
- 🩺 **Heart & Liver:** May improve cholesterol levels and support fatty liver health.

5. Who is the Perfect Client?

Pitch this program specifically to these groups:

1. **Sensitive Stomachs:** Clients terrified of nausea or side effects.
2. **Hormonal Changes:** Excellent choice for **Pre- or Peri-Menopause** clients dealing with hormonal weight shifts. ⚖️♀️
3. **Budget Conscious:** A more affordable entry point into GLP-1s.

6. 🛑 Critical Dosing Protocol

You must set this expectation upfront:

- **Fixed Dosage:** This microdosing plan **does NOT include dosage increases**.
- The medication level will remain steady throughout the treatment to ensure comfort and safety.
- *If a client wants to aggressively increase doses later, they must switch to the Standard Medical Program (and meet those BMI requirements).*

NAD⁺

NAD+ Injection (Energy & Cellular Repair)

1. What is NAD+? (The Elevator Pitch)

NAD+ is a natural molecule found in every cell of your body that powers energy, focus, repair, and resilience.

- **The Problem:** As we age, our natural NAD+ levels drop significantly, which contributes to fatigue, brain fog, and a slower metabolism.
- **The Solution:** This injection replenishes those levels to help you feel sharper, younger, and more energized.
- **Product Specs:**
 - **Concentration:** 200mg/mL
 - **Volume:** 6mL Vial

2. Main Benefits (Why Buy It?)

Position this as the ultimate "Anti-Aging" and "Brain Fog" solution.

- ⚡ **Energy Boost:** Enhances natural energy levels and significantly reduces fatigue.
- 🧠 **Mental Clarity:** Supports sharp focus and eliminates "brain fog."
- 🧬 **Cellular Repair:** Improves metabolic function and promotes cellular health (Anti-Aging).
- 🧘 **Well-Being:** Contributes to an overall sense of vitality and wellness.

3. ⚠️ Contraindications (Do Not Sell)

You **CANNOT** sell NAD+ if the patient reports ANY of the following conditions:

Category	Specific Conditions
Cardiovascular	Uncontrolled Hypertension (High Blood Pressure) or Heart Disease. History of Stroke or Heart Attack .

	History of Thromboembolism (Blood Clots).
Organs	Cirrhosis (Liver scarring). Severe Kidney or Liver Disease .
Neurological	Seizure Disorders .
Reproductive	Pregnant, planning pregnancy, or breastfeeding.
Other	Active Cancer . Active Infection . Behçet Syndrome (unless cleared by a rheumatologist).

4. Potential Side Effects

NAD+ is potent. Be transparent about the "flushing" sensation, which is a common reaction.

Common Side Effects:

- **The "Flush":** A sensation of warmth or flushing immediately after injection.
- Nausea or stomach upset (usually passes quickly).
- Fatigue or Muscle Soreness.
- Injection-site discomfort.

Rare/Serious (Stop immediately):

- Significant Heart Rate or Blood Pressure fluctuations.
- Allergic reactions (swelling/anaphylaxis).

5. Sales Tip: Who is this for?

- **The Tired Parent:** "This will help you get that energy back without the jitters of caffeine."
- **The Professional:** "If you feel brain fog during the workday, this helps sharpen your focus."
- **The Athlete:** "Great for recovery and muscle repair."

Lipo-Mino Injection

Lipo-Mino Injection (Fat Burning Mix)

1. What is Lipo-Mino? (The Elevator Pitch)

Lipo-Mino is a powerful "Fat Burning" injection mix.

This formula helps the body break down and eliminate fat more efficiently, supports liver function, and boosts natural energy and focus. It is the perfect add-on to accelerate weight loss results alongside GLP-1 treatments.

- **Composition (10 mL Vial):** Methionine, Inositol, Choline Chloride, Cyanocobalamin (B12), L-Carnitine, Thiamine (B1), Pyridoxine (B6), Riboflavin (B2).
- **Concentration:** 2 / 12.4 / 25 / 25 / 1 / 125 / 50 / 5 mg/mL.

2. Main Benefits (Why Buy It?)

Use these points to upsell the product.

-  **Fat Burning:** Boosts metabolism and aids in the reduction of stubborn fat.
-  **Energy & Focus:** Increases natural energy levels and mental clarity.
-  **Weight Loss Support:** Synergizes with weight loss efforts to improve results.
-  **Detox:** Enhances liver function and overall detoxification.

3. ⚠️ Disqualifying Conditions (Red Flags)

You **CANNOT** sell Lipo-Mino if the patient reports ANY of the following:

Category	Specific Conditions
Mental Health	Schizophrenia, Bipolar Disorder.
Organs	Liver Disease or Kidney Disease.
Neurological	Seizure disorder, Parkinson’s disease, Leber’s Hereditary Optic Neuropathy (LHON).

Metabolic	Current/History of Metabolic Acidosis, Trimethylaminuria.
Genetic	Homocystinuria.
Reproductive	Pregnant, planning pregnancy, or breastfeeding.
Allergies	Allergy to Methionine, Inositol, Choline, B Vitamins, or L-Carnitine.

The Cancer Protocol

- **Active Cancer: DISQUALIFIED.**
- **History of Cancer: ONLY Eligible** with a signed clearance from their treating physician confirming:
 1. Complete remission.
 2. No active cancer or malignancy.

4. Disqualifying Medications

Do not sell if the patient is currently taking:

- **Levodopa** (Parkinson's)
- **MAO Inhibitors** (e.g., phenelzine, tranylcypromine)
- **Mood Stabilizers** (e.g., Lithium)
- **Anticoagulants** (e.g., Warfarin)
- **Thyroid Medication** (e.g., Levothyroxine)
- **Insulin Sulfonylureas** (e.g., glyburide, glipizide)
- **Anticholinergics** (e.g., benztropine)
- **Nitroprusside**

5. Allowed Conditions (Green Light)

*Do not confuse these with the disqualifications. Patients with these conditions **CAN** and often **SHOULD** take Lipo-Mino:*

- **Fatty Liver (Hepatic Steatosis)** (Note: This is different from "Liver Disease")
- Insulin Resistance
- Metabolic Syndrome
- Chronic Fatigue
- Low Exercise Performance / Athletes seeking longevity.

6. Potential Side Effects

Be transparent if asked, but emphasize these are potential, not guaranteed.

- **Common:** Nausea, abdominal discomfort, diarrhea, headache, mild sleep disturbance.
- **Injection Site:** Redness, itching, or swelling.
- **Specific Note:** Choline may occasionally cause a "fishy" body odor.
- **Rare/Serious:** Allergic reaction (anaphylaxis), sensory neuropathy.

7. Final Reminders for Agents

1. **Do Not Diagnose:** You are a salesperson, not a doctor. Never tell a client they "need" this for a medical condition.
2. **Screen Carefully:** Review the Disqualifying Medications list slowly with the client.
3. **When in Doubt:** Consult the Provider Team if anything is unclear regarding a patient's history.

GHK-Cu

GHK-Cu Troche (Copper Peptide)

1. What is GHK-Cu? (The Elevator Pitch)

Classification: A naturally occurring **Copper Peptide** (a fragment of protein attached to a copper molecule).

- **The Science:** It is a signaling peptide found in human plasma that "reprograms" genes to a more youthful state. It acts as a "reset button" for your cells, signaling them to repair and regenerate.
- **The Problem:** As we age, our GHK levels drop by over **60%**, leading to thin skin, slow healing, and inflammation.
- **The Solution:** These troches deliver high-absorption copper peptides directly into the bloodstream to stimulate collagen and promote systemic repair.

2. Main Benefits (Why Buy It?)

Position this as the "**Cellular Regeneration**" and "**Youth Molecule**" solution.

- 🧬 **Tissue Repair:** Promotes wound healing and activates the body's natural regenerative pathways.
- ✨ **Skin Vitality:** Stimulates collagen and elastin production for firmer, younger-looking skin.
- 🛡️ **Anti-Inflammatory:** Reduces oxidative stress and protects cells from free radical damage.

3. ⚠️ Contraindications (Do Not Sell)

You **CANNOT** sell GHK-Cu if the patient reports **ANY** of the following conditions or medications:

Medical Conditions:

- Age: Under 18 years old.
- Reproductive: Pregnant, planning pregnancy, or breastfeeding.
- Oncology: Active Cancer or History of Cancer.
- Cardiac: Symptomatic heart failure (unstable/untreated)
- Cardiac: Dysrhythmia, tachycardia, or atrial fibrillation (unstable/untreated)
- Liver: Liver cirrhosis or end-stage liver disease
- Kidney: Chronic kidney disease stage 3 or greater
- Blood: Blood clotting disorder
- Recovery: Recent surgery or hospitalization

Medication Interference:

- Nitroglycerine/Nitrates or Steroids
- Blood thinners (Warfarin, Coumadin, etc.)
- Supplements: St. John's Wort, Grapefruit Seed Extract, Quercetin, or Ginseng.

4. Potential Side Effects

- **Common:** Metallic taste, mild nausea, or mouth irritation.
- **Rare:** Headaches or fatigue as the body adjusts to increased peptide levels.

5. Sales Tip: Who is this for?

- **The Beauty Enthusiast:** "Think of this as an internal fountain of youth for your skin and hair."

Glutathione Injection

Glutathione Injection (The Master Antioxidant)

1. What is Glutathione? (The Elevator Pitch)

Classification: A **Tripeptide** made of three essential **Amino Acids** (Cysteine, Glutamate, and Glycine).

- **The Science:** Known as the body's "**Master Antioxidant**," it is found in every single cell. It protects cells from "rusting" (oxidation) and is the primary fuel for liver detoxification.
- **The Problem:** Stress, toxins, and aging deplete your glutathione stores faster than your liver can recreate them, leading to "oxidative stress."
- **The Solution:** This injection bypasses the gut—where oral glutathione is often broken down—for 100% absorption to brighten the skin and detox the blood.
- **Product Specs:** 200mg/mL | 30mL or 60mL Vials (Strive - Except CA/MS)

2. Main Benefits (Why Buy It?)

-  **Detoxification:** Flushes heavy metals and environmental toxins from the liver.
-  **Skin Brightening:** Inhibits melanin production, resulting in an even, glowing skin tone.
-  **Immune Support:** Powers the white blood cells that fight off illness.

3. Contraindications (Do Not Sell)

You **CANNOT** sell Glutathione if the patient reports **ANY** of the following:

- Age: Under 18 years old.
- Reproductive: Pregnant, planning pregnancy, or breastfeeding.
- Oncology: Active Cancer or History of Cancer.
- Cardiac: Symptomatic heart failure (unstable/untreated)
- Cardiac: Dysrhythmia, tachycardia, or atrial fibrillation (unstable/untreated)
- Liver: Liver cirrhosis or end-stage liver disease
- Kidney: Chronic kidney disease stage 3 or greater
- Blood: Blood clotting disorder
- Recovery: Recent surgery or hospitalization

Medication Interference:

- Nitroglycerine/Nitrates or Steroids
- Blood thinners (Warfarin, Coumadin, etc.)
- Supplements: St. John's Wort, Grapefruit Seed Extract, Quercetin, or Ginseng.

4. Potential Side Effects

- **Common:** Temporary sulfur odor (breath/sweat).
- **Injection Site:** Minor redness or stinging.

5. Sales Tip: Who is this for?

- **The Social Butterfly:** "Had a few too many drinks lately? This is the best way to flush your liver and get your energy back."
- **The 'Lit-From-Within' Glow Seeker:** "This is the 'secret weapon' for clearing up hyperpigmentation and getting that bright, even skin tone."
- **The Immune-Conscious:** "If you're always catching every bug that goes around, this strengthens your cellular defense."

Sermorelin Injection

Sermorelin Injection (Growth Hormone Secretagogue)

1. What is Sermorelin? (The Elevator Pitch)

Classification: A **Peptide** (GHRH analogue) consisting of **29 Amino Acids**.

- **The Science:** Mimics the signal your brain sends to the pituitary gland. It tells your body to produce more of its own natural Growth Hormone safely.
- **Product Specs:** 1mg/mL | 9mL or 18mL (Monthly/Bi-Monthly)

2. Main Benefits (Why Buy It?)

- 🔥 **Metabolism:** Helps burn stubborn body fat and build lean muscle.
- 😴 **Deep Sleep:** Significantly improves REM and recovery sleep cycles.
- 💪 **Vitality:** Increases overall strength, stamina, and recovery speed.

3. ⚠️ Contraindications (Do Not Sell)

You CANNOT sell Sermorelin if the patient reports ANY of the following:

- **Age:** Under 18 years old.
- **Reproductive:** Pregnant, planning pregnancy, or breastfeeding.
- **Oncology:** Active malignancy or a history of cancer.
- **Hypersensitivity:** Known allergy to Sermorelin or its components.
- **Cardiovascular:** Unstable/untreated heart failure, tachycardia, atrial fibrillation, or dysrhythmia.
- **Hepatic:** Liver cirrhosis or end-stage liver disease.
- **Renal:** Chronic Kidney Disease (CKD) Stage 3 or greater.
- **Hematological:** Diagnosed blood clotting or coagulation disorders.
- **Acute Status:** Recent surgery or hospitalization.
- **Neurological:** History of idiopathic intracranial hypertension, elevated intracranial pressure, or severe papilledema.

Medication Interference:

- Nitroglycerine/Nitrates or Steroids
- Blood thinners (Warfarin, Coumadin, etc.)
- Supplements: St. John's Wort, Grapefruit Seed Extract, Quercetin, or Ginseng.

4. Potential Side Effects

- **Common:** Itching at injection site.
- **Rare:** Water retention or tingling in the fingers.

5. Sales Tip: Who is this for?

- **The 'Stuck' Fitness Enthusiast:** "If you're working out hard but not seeing changes in your body fat or muscle tone, your GH levels might be the missing link."
- **The Sleep-Deprived Professional:** "It doesn't just help you sleep; it helps you reach that deep recovery sleep where your brain and body actually repair."
- **The 'Anti-Aging' Male/Female:** "This is for anyone over 35 who feels like their 'get up and go' has got up and gone."

Dharma Supplements

Dharma Supplements (Add-Ons & Alternatives)

1. Brand Positioning

Dharma Supplements is our premium line of professional-grade wellness products. Agents are trained to identify client **pain points** and **goals** to position these supplements as essential tools for success.

- **The Accelerator:** Used to enhance the efficacy of prescribed medications or nutrition plans.
- **The Alternative:** The primary solution for clients in **Restricted States** where clinical prescriptions cannot be shipped.

2. Workflow A: Goal-Oriented Solutions (The Pivot)

Introduce Dharma Supplements the moment a client identifies a specific struggle or health objective.

- **The Trigger:** The client mentions a "Pain Point" (e.g., *"I'm always tired," "My digestion is off," "I'm hitting a plateau"*).
- **The Goal:** Connect their specific struggle to a Dharma Supplement product.
- **The Script:** > "I completely understand that [Pain Point] can be frustrating. To help you reach your goal of [Client Goal], I highly recommend adding **Dharma Supplements** to your routine. They are designed to work synergistically with your [Prescribed Medication/Nutrition Plan] to bridge that gap and get you results faster."
-  **Link:** <https://dhasmasupplements.com/collections/all>

3. Workflow B: Restricted States

- **The Trigger:** Client is disqualified from medication due to state-specific shipping laws.
- **The Protocol:** Pivot to Dharma as the high-potency, legal alternative to ensure the client can still begin their journey toward their goals.

4. Shipping Policy & Rules

To encourage a holistic approach to health, we waive shipping fees when supplements are paired with our core professional services.

The Rule: Shipping is **FREE** if the client purchases **any** prescribed treatment
Shipping fees only apply to "Supplement-Only" orders.

Order Composition	Order Total	Shipping Cost

With Prescribed Medication	Any Amount	 FREE
Supplements Only	\$50.00 and Over	 FREE
Supplements Only	Under \$50.00	 \$5.00 Flat Rate

Slim Boost

Slim Boost Capsules

1. Product Overview

- **Product Name:** Slim Boost - Metabolism & Energy Support
- **Brand:** Dharma Nutrition
- **Price:** \$89.00
- **Format:** 180 Capsules per bottle
- **Primary Goal:** To increase the benefits of weight loss injections, enhance metabolism, and control appetite.

2. Key Selling Points

When presenting this product to patients, emphasize that it is a "revolutionary supplement designed to increase the benefits of your weight loss injections." It is specifically formulated to help patients achieve goals faster and feel more energized.

Core Benefits:

- **Boosts Metabolism:** Designed to slim down the patient and improve metabolic rate.
- **Suppresses Appetite:** Helps reduce cravings and control hunger.
- **Digestive Support:** Helps alleviate constipation and reduces bloating—common concerns for patients on weight loss medications.
- **Energy & Aesthetics:** Boosts energy levels and supports skin health.

3. Key Ingredients & Mechanisms

Staff should be able to explain *why* it works using these three main ingredients:

Ingredient	Benefit / Mechanism
Magnesium	Helps alleviate constipation, promoting digestive regularity and overall intestinal health.
Chromium	Plays a key role in reducing body fat percentage, supporting those on a weight management journey.

Alpha-Lipoic	Contributes to overall health improvement, acting as a valuable addition to a wellness routine.
---------------------	---

4. Target Patient Profile

This product is ideal for patients who are:

- Currently taking weight loss injections and want to maximize their results.
- Struggling to lose weight or hitting a plateau.
- Experiencing constipation or bloating (common GLP-1 side effects).
- Needing an energy boost during their weight loss journey.

The Discovery Call Workflow

The Discovery Call Workflow

The 6-Step Framework for a Perfect Call

Objective: Every call must follow this logical flow. We move from **Authority** → **Diagnosis** → **Prescription** → **Value Stacking** → **The Close**.

Phase 1: The Introduction (Build Authority)

You have 30 seconds to establish trust. Do not sound like a telemarketer; sound like a specialist.

1. **Identity:** State your Name and your Role clearly.
2. **The Clinic's Prestige (The "Why Us"):**
 - **The Team:** Mention we are a full medical staff (Doctors, Nutrition Coaches, Support).
 - **Reach:** "We serve patients across **43 states**."
 - **Certifications:** Highlight our **LegitScript Certification** (the highest standard for telemedicine) and Google Certification.
 - **Social Proof:** Mention we have served **20,000+ patients** and hold **1,500+ 5-Star Google Reviews**.

Phase 2: Discovery (The "Specialist" Phase)

We give solutions; we do not push products. You must understand the patient before you can sell to them.

1. **Build Rapport:** Establish a human connection.
2. **Verify Eligibility (Critical):**
 - **State:** Confirm their location immediately (ensure we serve their state).
 - **Biometrics:** Ask for **Height & Weight** to calculate BMI eligibility.
 - **Contraindications:** Screen for medical conditions that disqualify them (Safety First).
3. **The "Pain" Point:** Ask probing questions to find their specific goal. (e.g., *"How much weight are you looking to lose to feel your best?"*)

Phase 3: The Solution (Solution Presentation)

Tailor the product to the pain points discovered in Phase 2.

1. **The Solution:** Present the GLP-1 (Semaglutide/Tirzepatide) or the appropriate treatment.

2. **The Science:** Briefly explain *what* it is and *how* it works in simple terms.
3. **The Benefits:** Connect the features to their goals (e.g., "This will quiet the food noise so you can stick to your diet easily").
4. **Application & Logistics:**
 - Explain the injection process (how it works, simple application, weekly).
 - Explain the "Cold Chain" delivery (how it arrives safe and refrigerated).
 - List exactly what is included in the box.

Phase 4: The Value Stack (Differentiation)

This is where we justify the price. We are not just selling a vial; we are selling a complete support ecosystem.

1. **Nutritional Support:** Explain that every consultation includes access to our Nutrition Coaches (30 days of support per consult).
2. **The Patient Portal:** Highlight this as their control center—track orders, view dosages, and **chat directly with doctors**.
3. **Slim Boost:** Introduce the supplement as an accelerator for their results.
4. **Additional Resources:** Mention "Be Mindful" resources and upsell opportunities like **NAD+** if applicable.
5. **The Medical Form:** Explain to them about the importance and necessity to complete the medical intake form required for the prescription.

Phase 5: The Transition & Close

Smoothly pivot from education to transaction. Do not hesitate.

1. **Top-Down Selling:** Always present the **Highest Tier/Longest Term** package first (Anchor Pricing).
2. **Payment Options:** Clearly explain credit/debit card options.
3. **The Ask:** Ask for the sale confidently.
 - *Script:* "To get you started on the [Program Name], which card would you like to use today?"
4. **Objection Handling:** Resolve any final hesitations immediately.

Phase 6: Post-Call Actions

1. **Assertive Mindset:** Ensure you maintained a confident, "Consultative" tone throughout.
2. **Refine:** If you lost the sale, analyze *why* immediately. Trust? Eligibility?
3. **Log It:** Update the CRM (HubSpot), Respond.io and the Sales Spreadsheet immediately.

The Master Call Script - Bullet Points

The Master Call Script - Bullet Points

Phase 1: Introduction & Credibility (1 min)

- “Hi, I’m [Name] from Dharma Nutrition Clinic. It’s a pleasure to speak with you! 😊”
- “We’re LegitScript certified, work in 43 states, and have helped over 20,000 patients across the U.S.”
- Use a warm, confident, and professional tone.

Phase 2: Discovery & Medical Qualification (4 min)

- “What’s your main goal with this treatment?”
- “Which state do you live in?” (eligibility requirement)
- “What’s your height and weight?” (calculate BMI and mention medical condition if BMI is lower than 30)
- “Do you have a specific medication in mind?”
- Mention conditions for Compounded medication

Phase 3: The Solution Presentation (4 min)

- “Our 3-Month Tirzepatide Combo includes up to 12 weeks of compounded Tirzepatide — a dual GLP-1 + GIP agonist for powerful weight loss results.” Mention about Nutrition Consultation and Slim Boost.
- “We also offer Zepbound (brand-name), but most patients choose the compounded version for the same benefits at a lower cost.”
- **Key Benefits:**
 - Suppresses appetite and cravings
 - Promotes safe, steady weight loss
 - Improves insulin response and blood sugar
 - Increases fullness with less food
 - Includes meds, doctor support, 1-month nutrition + Slim Boost

Phase 4: Pricing, Payment & Closing (9 min)

- “The 3-Month Tirzepatide Combo is 2x but as it’s your first discovery call, I can give you a discount for \$1,776.56.”
- “Would you like to proceed with a credit or debit card to secure your treatment?”
- Avoid Capital One Credit Cards
- Available HAS/FSA If Financing is Needed:
 - Start with Affirm (ideal income \$70K+, avoid Capital One)

- If denied: offer CareCredit, Klarna, Afterpay, or split into 2 cards
- Walk through payment live, keep screen open
- **Final Encouragement:**
 - Taking this step today means you're starting your transformation and taking control of your health – reinforce why they want to lose weight.
 - The sooner you begin, the sooner you'll see results.
 - We're here to support you every step of the way — let's get started now

Gap Management & Follow-Up Protocol

Gap Management & Follow-Up Protocol

Objective: Maximize agent productivity during "No-Show" windows. If a scheduled client does not attend, we immediately pivot to the **Follow-Up List** to generate spontaneous Discovery Calls.

1. The Trigger

- **When:** A scheduled appointment has not joined the call after 5 minutes (and the No-Show process has been completed).
- **Action:** Immediately open the **Follow-Up List** (Leads who previously contacted us or showed interest but did not book).

 FOLLOW UP - SALES

2. Scenario A: The Client Answers

- **Goal:** Convert the call into an **IMMEDIATE** Discovery Call.
- **The Pivot:** Do not ask for an appointment later. Assume they have time now.
- **Script Strategy:**
"Hi [Name], this is [Name] from Dharma, from the weight loss injections! I know you were interested in the weight loss program—do you have 10 minutes to go over your goals so we can get you started?"
- **Outcome:**
 - **Yes:** Proceed immediately to the Discovery Call script.
 - **No (Busy):** Schedule a firm appointment for a later date.

3. Scenario B: The Client Does Not Answer

- **Rule:** You must follow the **Double Dial** rule.
- **Action:** If they do not answer the second attempt, you are **REQUIRED** to leave a voicemail.
- **Compliance Warning:** Voicemails are recorded and reviewed for quality assurance. You must use the scripts below verbatim.

Mandatory Voicemail Scripts

English Script

"Hi [Client Name]! This is [Your Name] with Dharma Clinic. We opened a few spots today for a **100% free discovery call** about our weight loss program. Secure your spot now by calling **954-668-0123**. We'd love to chat with you!"

Spanish Script

"Hola, **[Nombre del cliente]**! Te saluda **[Tu Nombre]** de Dharma Clinic. Abrimos algunos espacios hoy para una llamada de descubrimiento 100% gratuita sobre nuestro programa de pérdida de peso. Reserva tu lugar llamando al 954-668-0123. Estaremos encantados de hablar con usted."

4. Post-Attempt Actions

- **Log It:** Note the outcome in **HubSpot** (e.g., "Left VM - Script Sent").
- **Respond.io:** Send a follow-up text message referencing the voicemail to increase visibility.

Treatment Guide

Sending the Complimentary Treatment Guide

Objective: deliver the comprehensive Treatment Guide to the client via the automated website system. **Content:** This guide includes details on the medications we offer, general nutrition & exercise plans, and critical instructions on how to maintain/store the medication.

1. The Process (Step-by-Step)

1. **Access the Portal:** Open your browser and navigate to the official company website.
2. **Navigate:** Locate the **"Weight Loss"** tab in the main navigation menu.
3. **Select the Resource:** Click on the button/link labeled **"Free Guide."**
4. **Data Entry (Critical):**
 - Enter the Client's **Full Name** and **Email Address**.
 - *Warning:* Double-check the spelling of the email address. One typo will prevent the system from delivering the guide.
5. **Execute:** Click **Submit**.
 - *Outcome:* The system will immediately trigger an automated email containing the PDF guide to the client.

2. Client Scripting (Value Pitch)

Don't just say "I sent a file." Explain what is inside to ensure they open it.

*"I have just sent our official **Treatment Guide** to your email.

It's a really helpful resource that covers the specific medications we offer, some great nutrition and exercise tips, and—most importantly—**how to properly store and maintain your medication** once it arrives.

It should be in your inbox now, but please check your Spam folder just in case!"*

Real People, Real Results

Logistics Form & Shipping Requests

Logistics Form & Shipping Requests

1. Overview & Link

The **Logistics Form** is used to manually submit shipping instructions that fall outside of our standard automation.

 **Form Link:** <https://forms.gle/3nHroTdw4p2NwRNe6>

2. When to Use This Form

Scenario A: Supplement-Only Sales (No Injections)

- **Rule:** When a client purchases **Supplements ONLY** (without medication/injections), we do not use the Brand Portal.
- **Action:** You **MUST** complete the Logistics Form to generate the shipping ticket and capture the delivery address.

Scenario B: Special Shipping Requests (Any Order)

Use this form if a client needs to deviate from the standard shipping process.

- **1. Change of Address:**
 - Use this if the client needs to update their address after the sale but *before* shipping.
 -  **Restriction:** The new address must be within the **Same State** as the medical clearance.
 - **2. Delay Delivery:**
 - Use this if the client is traveling and needs the package held until they return.
 - **3. Specific Delivery Date:**
 - Use this to request a specific arrival date.
 -  **Restriction:** The requested date must be **after** our standard 7-to-10 business day processing window.
-

3. When NOT to Use This Form

- **Standard Injection Orders:** If you are selling a medical injection (with or without supplements) and the address is standard, **do not** use this form.
 - **Process:** The shipping address for injections is captured automatically via the **Brand Portal/Medical Form**.

Nutritional Coaching

Nutritional Coaching Protocol (Sales & Scheduling)

1. Introduction & Objective

At Dharma Nutrition Clinic, we believe that **medication is the tool, but nutrition is the foundation.**

For the Sales Team, the Nutritional Consultation is a critical component of our **"Value Stack."** It is the key differentiator that separates us from competitors who simply ship medication.

This protocol outlines how to effectively **build value** for the nutritional program during the sales call and defines the operational procedures for **scheduling appointments** that align with the Nutritionist's availability. Our goal is to ensure every patient feels fully supported from the moment they purchase.

Selling Value vs. Price

Selling Value vs. Price (Market Comparison)

Objective: Overcome price objections by positioning our Nutritional Coaching as a high-value, "smart" investment compared to market competitors.

1. The Market Reality (Context for Agents)

Before you pitch the price, understand the landscape.

Most private nutrition coaches and gym-based programs charge between **\$300 and \$500 per month** for the exact same services we offer.

- **The Competitor (e.g., Private Gym Coach):** Average **\$350/month**.
- **Dharma Nutrition:** **\$199/month**.

The Advantage: We are providing **40% more value at nearly half the price**. Our pricing isn't "cheap"—it is **smart**. We position ourselves as **Premium but Accessible**.

2. The "Us vs. Them" Breakdown

Use this mental checklist when a client hesitates on cost.

Feature	Standard Private Coach	Dharma Nutrition Clinic
Monthly Cost	\$350 - \$500	\$199 (Smart Pricing)
Consultation	✔ Included	✔ Included
Meal Planning	✔ Included	✔ Included (Custom Rotational)
Accountability	Varies	✔ Weekly Follow-ups
Access	Limited Appointments	✔ Direct Messaging Support

How to build value ?

Nutritional Coaching Scope of Service

1. The Core Value (What the Patient Gains)

Use these points to explain "Why" this service is essential.

- **Expert Accountability:** The #1 driver of consistency. Real coaching provides the education and habit-building support necessary to stick to the plan.
- **Sustainability over Restriction:** We focus on mindful eating and "real life" strategies. Plans are designed to reduce stress, control portions, and cut food waste without the client feeling deprived.
- **Personalization:** Unlike generic internet diets, this is a deep dive into *their* specific eating habits, health history, and tastes.

2. The Deliverables (What is Included)

When a patient purchases a Nutritional Consultation, they receive:

- **Initial Consultation (1 Appointment):** A comprehensive 1-on-1 video call to review their routine, likes/dislikes, and goals.
- **Customized Meal Strategy:** A personalized **5-7 day meal plan**.
 - *Note:* This plan is designed to be **rotational**, meaning the patient repeats this weekly cycle for the month considering the substitutions available.
- **Supplement Guidance:** Expert advice on the best supplements to optimize your results.
 - *Clarification:* We do **not** prescribe supplements. We provide recommendations on high-quality over-the-counter options to support your specific goals.
- **30 Days of Support:** Direct access to the nutritionist via the **Respond** platform (email/message) for questions and guidance for 30 days after the consultation.

3. Managing Expectations (Scope Boundaries)

*To avoid refunds and dissatisfaction, you must be transparent about what is **NOT** included.*

✓ INCLUDED	✗ NOT INCLUDED
One Virtual Appointment	Follow-up appointments
5-7 Day Rotational Plan	A unique, different meal for every single day of the month (Full 30-Day Plan).

Supplement Recommendations	Supplement Prescriptions (We only advise, we do not prescribe).
30 Days of Messaging Support	Indefinite/Lifetime messaging access.
Dietary Guidance	Medical Advice (Must be referred to the doctor).

What is included during the nutritional coaching

What's included:

- **Initial consultation:** Deep dive into eating habits, goals & health history
- **Personalized meal plans:** Realistic, flexible, and aligned with client tastes
- **Weight-loss & mindful-eating tips:** Strategies for losing weight without feeling deprived
- **Supplement guidance:** What to take, when, and why

Key Benefits:

- **Real-time adaptability** keeps plans fresh, varied, convenient & seasonal
- **Stress-free adherence:** Plans save time, reduce stress, control portions & cut food waste
- **Expert coaching** provides education, accountability & habit-building support backed by science — accountability in coaching greatly boosts behavior consistency

Why It Works

- Personalized support yields **better results** and greater engagement than generic diets
- Flexible meal planning is **more sustainable and satisfying** long-term

- **Accountability from coaching** significantly improves consistency and drives real change

Nutritional Plans: What's Included & Not Included 🥗

It's crucial to be clear with patients about what they are getting.

- **Included:** ✅
 - A conversation about their routine, likes, and dislikes. 💬
 - A 5-7 day plan that can be rotated for 30 days. 🔄
 - 30 days of direct support via email or message on Respond. 📱
 - One appointment. 📅
- **Not Included:** ❌
 - A full 30-day meal plan.
 - Follow-up appointments.
 - Medical advice. 🏥

How to Schedule a visit ?

Scheduling Nutritional Appointments

Objective: Correctly schedule the initial nutritional consultation using the dedicated booking form, ensuring data accuracy and client preparedness.

1. Preparation & System Access

- **Browser:** Always open the booking link in an Incognito Window to prevent caching errors.
- **HubSpot Check:** Before booking, review the contact in HubSpot.
 - Email Rule: You are responsible for gathering a Real Email Address.
 - *Note:* Dummy emails are placeholders. You must update the contact with their actual email for the appointment invites to work correctly.
 - No Contact Exists? Create one immediately.

2. The Booking Process

Step 1: Access the Form

- Use this specific link:
 - https://support.dharmanutritionclinic.com/form-nutritionist?hs_preview=NjZUGBYX-191436541983

Step 2: Client Information & Email Logic

- Enter ALL client information.
- If the client absolutely has no email: Use the following Dummy Email Format:
 - 1 + (Country Prefix) + (Client Phone Number) + @dummy.com
 - *Example (Colombia):* 1573145469554@dummy.com

Step 3: Nutritionist Selection & Notes

- **Language Selection:**
 - Select the specific Nutritionist requested (e.g., Ana Sophia for English).
 - Pro Tip (Spanish): You can select "RR Nutricionist Spanish" to view ALL combined open slots for Spanish speakers.
- **Mandatory Notes Format:**
 - You MUST enter the specific purchase details in the notes so the nutritionist is prepared.
 - *Format:* Purchase Type + Medication Name + Supplements/Extras

- *Example:* Single Purchase + Tirzepatide + Slimboost + Berberine

Schedule a meeting with a Nutritionist

Name* Last Name*

maria juarez

3. Client Expectations (Scripting)

Read these requirements to the client to ensure they attend successfully.

- Platform: "We use Google Meets for the video call."
- Video Requirement: "This is a Video Required appointment."
- Environment: "Please be in a quiet space (not driving) to get the most out of your consultation."
- Timing: "Please be ready 5-10 minutes early. The nutritionist will let you in at the scheduled time. The session lasts 1 hour."
- Notifications: "You will receive an email confirmation now, and a text reminder 20 minutes before the call."

⚠ Cancellation Policy (Crucial):

"Please note: You have up to 24 hours prior to cancel or reschedule. If not cancelled on time, a \$100 No-Show Fee will be charged."

4. Post-Booking Scenarios

Scenario A: Package Sales (Multiple Appointments)

- Rule: You only book the First Appointment.
- The Customer Service team will schedule the remaining follow-ups later.

Scenario B: Nutrition-Only Purchase (No Meds)

- Rule: Schedule the appointment as normal.
- Action: Assign the Lead to Customer Service in HubSpot and Respond.io immediately.
- *Note:* Do not use the "Nutrition Consultation" shortcut for this specific scenario.

Scenario C: Unable to Schedule on Call

- If the sale is closed but the client cannot book a time right now:
 - Use the shortcut: "Nutrition Consultation" in the notes/chat.
 - Customer Service will pick this up and schedule it later.

Nutritionist Schedule

Nutritionist Schedule & Language Assignments

Objective: Ensure every patient is booked with a coach who speaks their preferred language at a time that fits their schedule.

1. Booking Rules (Language First)

- **CRITICAL:** Always verify the patient's preferred language before selecting a coach.
- **English/Portuguese Patients:** Must be booked with **Ana Sophia**.
- **Spanish Patients:** Can be booked with **Ana Sandoval, Paula, or Rosario** depending on time availability.

2. Master Schedule

Refer to this grid for standard operating hours. Times are listed in EST.

Nutritionist	Language	Mon	Tue	Wed	Thu	Fri	Sat
Ana Sandoval	 Spanish	12pm - 7pm	12pm - 7pm	12pm - 7pm	12pm - 7pm	12pm - 7pm	10am - 2pm
Ana Sophia	 English /  Port.	9am - 6pm	CLOSED	CLOSED	CLOSED	9am - 6pm	9am - 1pm
Paula	 Spanish	12pm - 7pm	9am - 4pm	12pm - 7pm	9am - 4pm	12pm - 7pm	9am - 12pm

Payments

The Payment Ladder & Processing Protocol

Objective: Secure the payment efficiently while prioritizing low-fee, direct transactions. Follow this hierarchy for every sale.

Critical Technical Requirement

- **Incognito Mode:** You must use an **Incognito/Private Window** for ALL payment processing links.
 - **Why:** This prevents caching errors, ensures security, and stops data from crossing over between different clients.
-

Step 1: The Golden Standard (Direct Payment)

Always attempt to secure the full amount via direct transfer or card first. This is the fastest method with the lowest fees.

The Script:

"How would you like to take care of that today? We can process the payment immediately with any **Credit or Debit Card**, or via **Zelle/Venmo** transfer."

Priority Order:

1. **Zelle / Venmo** (Preferred - Instant & Low Fee)
 2. **Credit / Debit Card** (Standard)
-

Step 2: Financing (Buy Now, Pay Later)

Move to this rung of the ladder ONLY if the client hesitates on the full upfront cost.

The Script:

"If you prefer to keep your cash flow open, we can split the cost into smaller monthly/bi-weekly payments. We work with **Affirm, CareCredit, Afterpay, and Klarna**. Do you use any of them?"

Approved Financing Partners:

- Affirm
 - CareCredit (*Remember to apply the Fee Pass-Through*)
 - Afterpay
 - Klarna
-

Critical Policy: NO Partial Payments

- **Effective Date:** August 30, 2025
 - **The Rule:** We do **NOT** accept partial deposits or "split payments" to hold a deal.
 - **Requirement:** The transaction must be paid in **FULL** (either by the client directly or fully funded by the financing company) before the medical form is sent to the client.
-

Step 3: Contingency (The "Hot Lead" Callback)

If the payment fails or they need time to move funds, do not let the lead go cold.

- **Trigger:** The client is **HOT** (ready to buy) but encounters a technical issue or needs to transfer money.
- **Action:**
 1. Do not leave it open-ended.
 2. **Schedule a firm Callback** immediately on the calendar.
 3. *Script:* "I'll give you some time to handle that transfer. I am scheduling a callback for [Time] to finalize the order so we don't miss the shipping window."

Stripe

Stripe Payment Management

1. Overview & Purpose

Stripe is our central financial dashboard. While it is used to generate custom payment links, its most critical function is to serve as the **Verification Hub** for all transactions when paid by Credit/Debit Card, Affirm, Afterpay, Klarna, Apple Pay, Amazon Pay.

Agents are responsible for using Stripe to both facilitate flexible payments and to **audibly confirm** that funds have been successfully captured *before* any medical protocols are initiated.

2. Core Functions

- **Transaction Verification (The "Green Light"):** You must log into Stripe to verify a "Succeeded" status on a payment before sending Medical Forms or booking appointments. A screenshot or verbal promise from a client is **not** sufficient proof.
- **Custom Invoicing:** Generating secure links for split payments, partial balances, or unique product combinations (e.g., specific medication + consult bundles).

Creating Payment Links

Creating Custom & Partial Payment Links (Stripe)

Objective: Create unique, one-time payment links for split payments, custom balances, or specific medication orders.

1. Configuration Rules (Data Entry)

Before creating the link, ensure you have the correct details.

- **Product Naming Convention:**
 - You **MUST** use "MG" (in all caps) at the start of the product name if it is a medication.
 - Include the Exact Name and Exact Amount (e.g., "MG - Tirzepatide 52MG - Split 1/2").
- **Required Collection Fields:**
 - The link settings must be configured to collect:
 - Client Full Name
 - Phone Number
 - Shipping Address + Billing Address

2. Creation Process (Step-by-Step)

1. Open Dashboard: Go to [Stripe Dashboard](#).
2. Initiate: Click the + Create button (top right) or select Payment Links.
3. Add Product:
 - Click Add product.
 - Enter the specific name (following the "MG" rule) and the custom price amount.
4. Configure Options:
 - Ensure "Collect Phone Number" and "Collect Address" are checked.
5. Finalize: Click Create Link.
6. Share: Copy the generated URL and send it to the client.

Visual Example:

Options

☒ Collect tax automatically

☒ Collect customers' addresses

☐ Billing addresses only

☒ Billing and shipping addresses

Ship to:

 United States

[Edit countries](#)

 Add shipping rates

Optional

☒ Require customers to provide a phone number ⓘ

PAYMENT LINK

Tirzepatide 52 mg and 1 more for \$3,151.88 USD

Copy and share to start accepting payments with this link.

<https://buy.stripe.com/fZufZg8rB5p19Zj8xX0JJ0c>

+ URL parameters

 Buy button

3. Post-Payment Protocol (Security & Cleanup)

Critical: Custom links are for one-time use only.

A. Immediate Deactivation

- The Rule: Once the payment is confirmed, you must deactivate the link immediately so it cannot be used again or shared.
- How to Deactivate:
 1. Go to the Payment Links list in Stripe.
 2. Click the Three Dots (...) next to the specific link.
 3. Select Deactivate.

4. Confirm by clicking Deactivate in the pop-up window.

B. End-of-Shift Reconciliation *Before logging off, you must verify all custom links sent that day:*

1. Verify: Check by Email or Client Name in Stripe to confirm the payment went through.
2. Register: Ensure the sale is properly registered in HubSpot.
3. Cleanup: Double-check that all used links have been deactivated.

Affirm

Affirm Financing Protocol

Objective: Maximize approval rates for clients seeking financing through Affirm by adhering to strict data entry requirements.

1. Critical Eligibility Requirements

Before starting the application, confirm the following:

- **SSN is Mandatory:** The client **MUST** have a valid Social Security Number.
 - *Hard Stop:* Affirm does not accept ITIN numbers. If they only have an ITIN, do not proceed with Affirm.
- **Payment Source:** The client must have a Debit Card or Checking Account.
 - *Note:* Credit Cards are not accepted for recurring Affirm payments.

2. Optimization Strategies (For High Approval)

Use these guidelines when helping the client input their data to ensure the best chance of success.

- **Income Input:**
 - **Affirm favors an annual income of \$60,000 - \$108,000+.**
 - **Internal Tip:** Affirm does not verify income against a database. If the client's income is below \$60k, input \$60,000 to prevent an automatic decline based on income threshold.
- **Address Verification:**
 - The billing address entered **MUST** match the address on their current ID.

3. The Application Process

Advise the client to have their ID ready before you start the process.

Step 1: Open the payment link the Link

- **Use the Stripe payment link and start the process filling all the information required.**

Step 2: Client Verification (KYC)

- **Warn the client that Affirm may request identity verification. They must be prepared to provide:**
 - **Full Legal Name & DOB.**
 - **Last 4 digits of SSN (or full SSN).**
 - **A Selfie (Live face verification).**
 - **Photo of Government ID.**

Step 3: Approval Outcomes

-  **Full Approval:** No payment is due today. The first payment will be drafted in 30 days.
-  **Partial Approval:** Affirm approves the loan, but requires a Down Payment to be paid immediately.
-  **Not Approved:** The application is denied.

4. Technical Pointers & Troubleshooting

- **Auto-Pay:** You do not need to activate auto-pay during the sale. The client can set this up later in the Affirm app.
- **Managing Payments:** Inform the client that all future payments and schedules are managed directly through the Affirm App.
- **Diagnosing Denials:**
 - **If the client is not approved, ALWAYS click the "Details" or "Click Here" link on the decline screen.**
 - **Why? It will tell you if the denial was due to Identity Verification issues (which can be fixed by retrying carefully) or Credit Issues (which cannot be fixed).**

Visual Reference:

Thank you for your interest in a loan through Affirm issued by Affirm Loan Services, 650 California Street San Francisco, CA 94108 USA. Affirm Loan Services can't approve the loan you requested based on your credit score.

Our decision was based in whole or in part on information obtained from the following consumer reporting agency:

Experian's National Consumer Assistance Center
P.O. Box 4500
Allen, TX 75013
(888) 397-3742

This consumer reporting agency played no part in our decision and is unable to supply specific reasons why we have denied credit to you. You have a right under the Fair Credit Reporting Act to know the information contained in your credit file at the consumer reporting agency. You also have a right to a free copy of your report from the reporting agency, if you request it no later than 60 days after you receive this notice. In addition, if you find that any information contained in the report you receive is inaccurate or incomplete, you have the right to dispute the matter with the reporting agency. Any questions regarding such information should be directed to the reporting agency listed above.

We also obtained your credit score from this consumer reporting agency and used it in making our credit decision. Your credit score is a number that reflects the information in your consumer report. Your credit score can change, depending on how the information in your consumer report changes.

Your credit score: 489

Date: 11/20/25

Scores range from a low of 300 to a high of 850.

Key factors that adversely affected your credit score:

- SERIOUS DELINQUENCY
- RATIO OF BALANCE TO LIMIT ON BANK REVOLVING OR OTHER REV ACCTS TOO HIGH
- TIME SINCE DELINQUENCY IS TOO RECENT OR UNKNOWN
- TOO FEW ACCOUNTS CURRENTLY PAID AS AGREED

If you have any questions regarding your credit score, you should contact Experian directly at (888) 397-3742.

If you have any questions regarding this letter, you should contact us at:

Affirm, Inc.
650 California St, Fl 12
San Francisco, CA 94108

Afterpay & Klarna

Afterpay & Klarna Processing

Objective: Effectively manage "Pay-in-4" transactions and handle approval limits for first-time users.

1. Afterpay Protocol

Best for clients who want to split payments without a hard credit check (for the Pay-in-4 option).

A. Eligibility & Plan Types

- **Pay-in-4 (Standard):** No SSN or ITIN required. The first payment (25%) is due **today**.
- **Monthly Plans:** May require SSN.
- **Payment Card:** Client must use a Debit or Credit card. This card will be saved for future automatic debits.

B. The "First-Time User" Strategy (Limit Management) *New Afterpay users often have a spending limit around \$600.*

- **The Goal:** Reduce the transaction amount until it fits within their approval limit.
- **The Process:**
 1. Go to the **Sales Status Spreadsheet** to find active Coupon Codes.
 2. **Apply Discounts:** Start with the **Highest Discount** → If denied, try the next lowest discount.
 3. **Split Payment:** If the approved amount covers only part of the treatment (e.g., \$600 approved, Total is \$900), the client **MUST** pay the remaining balance (\$300) via a separate Credit/Debit card transaction.
 4. **Rule:** Only process one Afterpay transaction at a time.
 5. **Affordability Check:** If they cannot cover the difference, downsell them to a cheaper treatment plan.
 6. **Medical Form:** Do **not** send the medical form until the *entire* balance (Afterpay + Remaining Cash) is paid.

C. Client Explanation Script *Use this to set expectations before sending the link.*

"To move forward with Afterpay, here is how the process works:

1. **Down Payment:** A payment is required today to start the plan.
2. **Schedule:** The remaining balance is split into payments charged every two weeks.

3. **Outcome:** If the system denies the application, **no money** will be charged to your card.
4. **Card on File:** We need a debit or credit card for the pre-approval, which will be used for the future automatic payments."

2. Klarna Protocol

Best for smaller amounts or tech-savvy clients.

A. Eligibility

- **Pay-in-4:** Standard option (4 installments).
- **Monthly Financing:** Requires **SSN** and usually a photo **ID** for verification.

B. The "Live" Workflow (Technical Constraint)

- **The Challenge:** Klarna's security token/information refreshes every **15 seconds**.
- **The Strategy:** Do **not** try to do this for them.
 1. **Guide Them:** Instruct the client to complete the process on their own screen while you stay on the line.
 2. **Stay Live:** "I will stay on the line with you while you fill that out in case you have any questions."
 3. **The Golden Rule:** Do **not** hang up until the payment is fully confirmed on your end.

C. Payment Structure

- Like Afterpay, Klarna works best for smaller portions. If the total exceeds their limit, collect the difference via a direct card payment.

Missed payments are subject to late fees. For CA residents, loans made or arranged by Klarna, Inc. pursuant to a California

HSA / FSA

HSA & FSA Payment Protocols

Objective: Clarify the acceptance of pre-tax health accounts and define the fees associated with administrative documentation.

1. Acceptance Policy

- **We Accept:** Yes, we accept payments via **Health Savings Account (HSA)** and **Flexible Spending Account (FSA)** cards.
- **Processing:** These cards generally function exactly like a standard Visa or Mastercard Debit card. Process them through the normal card terminal/system.

2. Documentation Fee (Letter of Medical Necessity)

Sometimes, an HSA/FSA provider will flag a transaction and ask the patient for proof that the treatment was medically necessary.

- **The Rule:** If a patient requests a formal **Letter of Medical Necessity (LOMN)** or specific itemized documentation for their provider, there is an **Administrative Fee of \$50.00**.
- **Payment Timing:**
 - The patient does **NOT** need to pay this at the time of the initial sale.
 - The fee is charged **ONLY** if and when the patient requests the document.
- **Script:**
"We absolutely accept HSA/FSA cards. If your provider ever requires a specific Letter of Medical Necessity to validate the purchase later on, we can draft that for you for a standard \$50 administrative fee."

3. Agent Knowledge Base: HSA vs. FSA (2026)

Use this cheat sheet to educate clients who are unsure about using their pre-tax funds. Many clients need to spend FSA funds before the year ends.

Feature	HSA (Health Savings Account)	FSA (Flexible Spending Account)
Eligibility	Must have a High Deductible Health Plan (HDHP).	Available with any plan (if the employer offers it).
Ownership	You own it. The money stays with you even if you change jobs.	Employer owns it. Usually lost if you quit the job.

Rollover	Full Rollover. Funds never expire.	"Use-it-or-lose-it." (Only small carryovers allowed).
2026 Limits	\$4,400 (Self) / \$8,750 (Family)	\$3,400 (Individual)
Sales Tip	"This is a great long-term investment in your health."	"You should use these funds now so you don't lose them at year-end."

Care credit

CareCredit Financing & Processing

Objective: Correctly process CareCredit applications, ensure all compliance documentation is signed, and accurately calculate financing fees.

1. Eligibility & Data Requirements

- **Identity Requirement:**
 - SSN (Social Security Number) OR ITIN (Individual Taxpayer Identification Number).
 - **Hard Stop:** If the client has neither, they cannot use CareCredit. Request a Credit/Debit card instead.
- **Income Verification:**
 - CareCredit verifies monthly income. The amount entered must be accurate to avoid denial.
- **Name & Address:**
 - Enter the name exactly as it appears on their ID (including middle initials, hyphens, etc.).
 - Verify the billing address (ensure Unit/Apartment numbers are included).

2. Pre-Check Protocol (Existing Accounts)

Always ask this first to save time.

"Do you already have a CareCredit account?"

- **IF YES:**
 - Use the Account Lookup tool to check their available balance.
 - *Scenario:* If their balance is too low, request a Credit Limit Increase immediately.
- **IF NO:** Proceed to the Application Process.

3. Fee Calculation & Term Options

You must add the financing fee to the total treatment price before running the transaction.

Fee Schedule:

(Minimum Purchase for these terms: \$200)

Term Length	Fee to Add	Calculation Factor
6 Months	6%	Multiply Price x 1.06

12 Months	10%	Multiply Price x 1.10
18 Months	14%	Multiply Price x 1.14
24 Months	16%	Multiply Price x 1.16

💡 **Calculation Examples (Base Price: \$1,299)**

- **6 Months:** $\$1,299 \times 1.06 = \$1,376.94$
- **12 Months:** $\$1,299 \times 1.10 = \$1,428.90$
- **18 Months:** $\$1,299 \times 1.14 = \$1,480.86$
- **24 Months:** $\$1,299 \times 1.16 = \$1,506.84$

Note: Be precise with the final amount requested in the application (include exact cents, e.g., \$1,506.84) to improve approval chances.

4. Application & ID Verification Tips

- **Green Cards:** Add 0000 at the start of the document number to bypass system errors.
- **Passports:** Use the 3-letter Country Code + ID Number.
 - *Examples:* **HND-G151512** (Honduras), **NIC-** (Nicaragua), **MEX-** (Mexico).

5. Approval Outcomes & Next Steps

Scenario A: Fully Approved

- 1. Download the Receipt:** Once approved, process the transaction, download the transaction receipt from CareCredit.
- 2. Get Client Signature:** The client **MUST** sign this receipt.
 - **Note:** No signature is needed for the online approval step, only for the final receipt.
- 3. Upload to Drive:** Save the signed receipt to the Shared Drive.
 - **File Name Format:** MM-DD-YY – Patient Name – Phone Number
 - **Link:**  Care Credit
- 4. Medical Form:** You cannot send the medical form until this signed receipt is uploaded. No Exceptions.

Scenario B: Pre-Qualified (Needs Verification)

The client is approved but CareCredit requires a phone verification.

1. **Action:** Redirect the client to call CareCredit immediately.
2. **Support:** Stay on the line (or share screen) to provide them with the Application Key and Merchant Number.
 - *Merchant ID Security:* If asked, explain we can only provide the last 4 digits for security reasons.
3. **Phone Prompts for Client:** Select **Option 4** → **Option 1** → **Option 1**.
4. **Hold:** Wait for a representative to verify their identity.

Applicant Name	Application Key	Merchant Number	Ap
[REDACTED]	60780092	*****2445	10/

Almost there...

Please call Synchrony now at 800-859-9975 and:

- Provide this Application Key: 60780092.
- Ask the applicant to have their mobile phone and driver's license ready.

We will walk the applicant through the process of verifying their identity in less than 5 minutes. For additional linked below.

Important Notice: If the box was checked indicating they do not have a phone number because of a disability contacted to complete the application process.

Please do not resubmit the application. Thank you for using the Synchrony online application system and we applicant needs to contact Synchrony regarding the application, please have them call 800-924-2927.

Scenario C: Adding a Co-Applicant (Joint Application) Use this option if the primary client is **Denied** or receives a **Credit Limit** that is too low to cover the treatment.

1. **When to offer:** If the client says, "My husband/wife/parent wants to pay for this," or if their own income/credit score is insufficient.
2. **The Process:**
 - On the denial or insufficient limit screen, select **"Add Co-Applicant."**
 - Enter the Co-Applicant's details (Full Name, SSN, DOB, Income).
 - **Consent:** The Co-Applicant must be present (or available) to consent to the credit check.
3. **Income Strategy:** When applying with a Co-Applicant, you can often list **Household Income** (combined income of both parties) to increase the chances of a higher credit limit approval.

Scenario D: Unable to Pre-Qualify

- **Action:** Pivot immediately to another payment method (Debit/Credit Card).

6. Post-Sale: How Clients Pay CareCredit

Inform the client on how to pay their bill to avoid confusion.

- **Online (Recommended):** Log in to the CareCredit/Synchrony website.
- **Pay as Guest:** Use [This Link](#) (Requires Card Number, Last 4 SSN, Zip Code).
- **Mobile App:** Download the CareCredit app.
- **Phone/Mail:** Call the number on the statement or mail a check.

Important Reminder for Clients:

- Payments made before 11:59 PM ET post the same day.
- Paying only the minimum due may not pay off the full balance before the promo period ends (risk of deferred interest).
- They cannot pay a CareCredit bill using another credit card.

7. Hubspot Processing

- When finalizing the sale in our CRM Hubspot, ensure the Account Holder Name matches exactly what is shown on the CareCredit approval.

Zelle, Venmo & CashApp

Direct Transfer Platforms (Zelle, Venmo, Cash App)

Objective: Prioritize these payment methods to reduce processing fees and offer immediate confirmation.

1. No Dispute

- Why this is a preferred method: Unlike credit cards or installment plans, Zelle, Venmo, and CashApp are considered "cash equivalents." Once sent, the transaction is secured and cannot be disputed by the bank.

2. Discount Incentives

Encourage clients to use these methods by offering a "Cash Discount."

A. Standard Discount

- **Scenario:** The client has NO other active promotions or codes.
- **Action:** Offer \$10.00 OFF the total.

B. Stacked Discount

- **Scenario:** The client is already using a promo (e.g., Free Slim Boost, Seasonal Sale).
- **Action:** Offer \$5.00 OFF the total.

C. Referral Code Limitation

- **Rule:** The 5% OFF Referral Promo applies ONLY to the GLP-1 Standard Dose. It cannot be applied to other treatments.

3. Account Details & Handles

Provide these details exactly as written to ensure the funds go to the correct corporate account.

Zelle

Direct Bank-to-Bank Transfer.

- **Name: Dharma Nutrition Clinic**
- **Email: admin@dharmanutritionclinic.com**
- **Phone: [954-668-0123](tel:954-668-0123)**

Venmo

App-based. Works with connected cards/balance.

- **Name: Dharma Nutrition Clinic**
- **Username: [@dharmanutritionclinic](#)**

Cash App

Instant Transfer.

- **Name: Dharma Nutrition Clinic**
- **Username: [@dharmanutrition](#)**

Money order

Money Order Payment Protocol

Objective: Guide clients who prefer to pay via cash-equivalent mail options. **Timeline Warning:** You must explicitly inform the client that this is the **slowest method**. Services will **not** begin until the check is physically received and cleared.

1. Client Instructions (The "How-To")

Read these steps to the client or send them via text/email to ensure the Money Order is valid.

Step 1: Purchase the Money Order

- Visit a provider (e.g., Publix, Walmart, USPS, Western Union).
- Request a Money Order for the **exact amount** of the treatment.
- *Note:* You will need to pay for this upfront using Cash or a Debit Card at the store.

Step 2: Fill Out Details (Crucial)

- **Pay to the Order of:** Write exactly "**DHARMA NUTRITION CLINIC**".
- **Memo/Note Field:** You **MUST** write your **Full Name** and **Phone Number** so we can identify your payment.

Step 3: Mail the Payment

- Send the completed Money Order to our processing center:
Dharma Nutrition Clinic 902 Clint Moore Rd, Suite 146 Boca Raton, FL 33487

2. Activation Protocol (The "Red Light" Rule)

Strict adherence required.

- **Status: PENDING**
 - Until the Money Order is received and cashed by our finance team, the patient's status remains **Pending**.
- **Action Block:**
 -  Do **NOT** send Medical Forms.
 -  Do **NOT** schedule Nutritional Appointments.
- **Service Activation:**
 - Once the finance team confirms receipt, you may proceed to send the Medical Forms and book the Nutritionist.

Combination of payments

Hybrid Payments (Split & Combinations)

Objective: Never lose a sale due to a single card limit or low balance. We are fully flexible and can split the total cost across multiple payment methods.

1. The Policy: "No Limits"

- **Multiple Methods:** We can combine **ANY** accepted payment methods to complete a transaction.
 - *Example:* A client can use 3 different credit cards, or combine Cash App with Financing.
- **No Cap:** There is no limit to the number of split payments required to finalize a purchase.

2. Execution: How to Process Split Payments

To ensure accuracy, use one of the following methods:

Method A: Custom Payment Links

- Create exact payment links for the specific dollar amounts the client wants to pay on each method.
 - *Step 1:* Calculate the specific amount (e.g., \$500 on Visa).
 - *Step 2:* Generate a link for \$500.
 - *Step 3:* Repeat for the remaining balance on the next method.
- For step-by-step instructions on generating custom URL amounts, please consult the **"Creating Payment Links" SOP**

Method B: Percentage Splits (Coupon Method)

- Use internal percentage coupons to adjust the total if the client wants to pay a fraction (e.g., "Half now, half on the other card").
 - *Action:* Apply a 50% "Split" code to lower the total for the first transaction, then process the second half separately.

3. Common Split Scenarios (Examples)

Use these examples to suggest solutions to clients who say "I don't have enough on this card."

- **The "Credit Builder" Split:**
 - **\$1,000** approved on CareCredit + **Remaining Balance** paid via Credit/Debit Card.
- **The "Cash Flow" Split:**

- **50%** via Zelle (Cash) + **50%** Financed via Affirm.
- **The "Multi-Card" Split:**
 - **60%** on Debit Card + **30%** on Credit Card + **10%** Financed.

Respond.io

Respond.io (Communication Hub)

1. Overview

Respond.io is our centralized messaging platform. It unifies all client communication channels—WhatsApp, SMS, Facebook Messenger, and Instagram Direct—into a single "Team Inbox."

While HubSpot stores the *data*, Respond.io is where the *conversation* happens. It is the primary tool for real-time engagement, allowing us to maintain a fast "Speed to Lead" and a consistent professional tone across all platforms.

2. Core Functions

- Unified Messaging: View and reply to messages from any channel in one place.
- Snippets & Templates: Use pre-approved "Quick Replies" to answer common questions (Pricing, Ingredients, Shipping) instantly and accurately.
- Team Collaboration: Tag managers or other departments (e.g., Customer Service) within a chat for assistance without the client seeing the internal discussion.

3. The Golden Rule

"Clear Inbox, Happy Client." Our goal is to keep response times under 5 minutes during business hours. A prompt reply in Respond.io is often the difference between a closed sale and a lost lead.

Post-Call Documentation (Comments)

Post-Call Documentation (Comments)

1. Objective

After every connected call, it is **mandatory** to take detailed notes. These notes are the foundation of our workflow. They ensure that any team member can pick up the file, understand the client's goals, and provide a consistent experience without asking the client to repeat themselves.

Think of your notes as the key that unlocks a smooth client journey.

2. The Standard Template (Required Data)

When documenting a call, you must capture the following "Vital Signs" of the lead:

- **Main reason to lose weight:** (e.g., Health, Wedding, Post-partum)
- **Current Weight:**
- **Desired Weight:** (Goal)
- **Height:**
- **BMI:**
- **Other Relevant Info:** (e.g., Medications, specific health conditions)

The image shows a screenshot of a comment template form. The form is orange and contains the following fields:

- Main reason to lose weight:TEST
- Desired weight:TEST
- Current weight:TEST
- Height:TEST
- BMI TEST
- Other relevant information:TEST

At the bottom of the form, there are icons for a person, a speech bubble, a plus sign, and a play button. A close button (X) is located in the top right corner.

3. The Workflow

1. **Click:** Select the **"Add a Comment"** button in the lead's profile.
2. **Input:** Enter the information using the template above.
3. **Timing:** Ideally, add these comments **while you are on the phone** to ensure accuracy. Do not wait until the end of the day.

4. Special Protocol: Scheduling Callbacks

If a client requests a callback, a simple note is not enough. You must follow this two-step process:

1. **The Note:** Clearly write the agreed-upon **Date and Time** in the comment section.
2. **The Action:** You must **set this appointment on your calendar** immediately to ensure the follow-up actually happens.

Whatsapp Line

Authorized WhatsApp Lines

1. Overview

The following phone numbers are fully integrated into our **Respond.io** workspace. These are the official lines used to send and receive WhatsApp messages with clients.

2. Available Lines

Please ensure you are familiar with these numbers, as clients may have them saved in their contacts.

- +1 (954) 668-0123 - online currently
- +1 (954) 243-2034 - online currently
- +1 (954) 901-4960
- +1 (561) 344-8408

3. Operational Note

While all incoming messages from these lines arrive in the **Team Inbox**, be aware that a client might text a specific number they have used previously. Always check the **"Channel"** icon next to the client's name to see which specific line they are messaging.

The screenshot displays a WhatsApp chat interface. At the top, there is a list of contacts, each with a WhatsApp icon and a text label: "SP - 8408 - to: 13475815874", "0123 - to: 13475815874", "PT - 2034 - to: 13475815874", "EN - 4960 - to: +13475815874", "GMAIL - CS - to: 13475815874@dummy.com", and "GMAIL - ADMIN - to: 13475815874@dummy.com". Below this list, a message from "PT - 2034 - to: +19179154502" is visible, stating: "WhatsApp's customer service window closed. WhatsApp **doesn't allow sending messages after 24 hours** since the last Contact reply. To continue, send an approved Message Template by subscribing to a plan and adding funds to your WhatsApp Business Account. [Learn more](#)".

Shortcuts & Templates

Respond.io Templates & Shortcuts

1. Overview & Definitions

To ensure speed and consistency, we use two key features in Respond.io after every interaction:

- **Templates:** Pre-written, approved messages sent to the client (e.g., Treatment details, payment links).
- **Shortcuts:** Internal triggers used to categorize the conversation status (e.g., "Sold," "No Answer," "Pending").

2. Post-Call Protocol (The Checklist)

Immediately after finishing a call, you must complete the following actions:

1. **Log Comments:** Add relevant notes to the profile (Weight, Goals, Medical Info).
2. **Send Template:** Send the treatment details and Payment Link discussed.
3. **Send Photos:** Share 3 relevant "Before & After" photos.
4. **Apply Shortcut:** Select the correct status shortcut based on the call outcome.

3. Scenario Logic: Which Shortcut to Use?

Choose the status that matches the outcome of your call:

Call Outcome	Action / Shortcut
Client Purchased	✅ Select " Completed Purchase "
No Answer	❌ Select " {SL/CS} No Ans Call "
Promised to Pay (e.g., "I'll pay tonight")	🕒 Select " Pending Payment "
Undecided / Callback Scheduled	😞 Select " Considering Purchase "

⚠️ **Critical Rule:** For *Pending* or *Considering* clients, you **MUST** send the Treatment Template + 3 Photos to reinforce the sale visually.

Visual reference:

4. Step-by-Step Instructions

A. Sending a Message Template

1. Click on the **Message Template** icon (usually a clipboard or paper symbol).
2. **Select Language:** Filter by English or Spanish.
3. **Search & Select:** Type the name of the medication/treatment discussed (e.g., "Tirzepatide Info").
4. **Send:** Verify the content and hit send.
 - Resource: [Sales Tool](#)

B. Sharing Before & After Photos

Visual proof builds trust. Do not just send random images; match the client's demographic.

- **Male Client:** Send Male results.
- **Female Client:** Send Female results.
- **Blond Client:** Select photos of blond patients (relatability matters).
- **Latina Client:** Select photos of Latina patients.
 - Resource: Refer to the **"Before & After Photos"** folder in the SOP drive.

C. Applying the Shortcut

1. Click the **"Shortcuts"** button (⚡ icon or command list).
2. Select the **Best Option** based on the interaction (e.g., *Considering Purchase*).
3. This will automatically tag the conversation and move it to the correct folder for follow-up.

Completed Purchase Shortcut

Sending the Medical Form (Post-Sale)

1. Objective

Once a sale is officially completed, the most critical step is sending the correct **Medical Form (Survey Link)**. This link allows the medical team to approve the patient for treatment.

CRITICAL RULE: Patient Identity

The **Medical Form** must **ALWAYS** be filled out under the name of the person receiving the treatment.

- *Example:* If a mother pays for her son's treatment, the Medical Form/Account must be filled out with the **Son's Name** and **Son's Medical Info**.
 - *Why?* The prescription is a legal document and must match the patient exactly.
-

2. Locating the Correct Form

You must ensure you are sending the specific link that matches the client's location and purchase.

1. Open your **Status Sales Sheet**.
 2. Navigate to the **SURVEY** tab.
 3. Select the correct link based on:
 - The **State/Pharmacy** the client resides in.
 - The **Product** purchased.
-

3. Respond.io Workflow

Once you have the correct link, update the client's profile in Respond.io immediately.

Step 1: Update Client Fields (Right Sidebar)

- Navigate to the **Contact Details** panel on the right side of the screen.
- **Desired Treatment:** Enter the exact treatment sold (e.g., *Semaglutide, if sold GLP-1 plus another medication select only the Glp-1*).
- **Survey Link Field:** Paste the specific Medical Form link you retrieved from your spreadsheet.

Step 2: Send & Categorize

1. **Apply Shortcut:** Select the **"Completed Purchase"** shortcut.
 - *Note:* This tags the conversation correctly as a closed sale and moves it to the customer service pipeline.

[illegible]

Opening conversation

Re-Opening the Conversation (The 24-Hour Rule)

1. The Rule Explained

WhatsApp strictly enforces a **24-hour interaction window**.

- **The Clock:** The timer starts the moment the *client* sends us a message.
- **The Restriction:** After 24 hours of inactivity, **we cannot send free-form messages** (text, images, or links) unless the client replies again to "re-open" the window.

2. Why This is Critical

- **Delivery Failure:** If you do not use a template or get the client to reply first, your follow-up messages **will not be delivered**. You might think you sent the info, but the client never received it.
- **Customer Experience:** Clients expect speed. If you reply after 24 hours without a professional re-opener, it looks like you ignored them, or worse—they simply never hear from you again.
- **Policy Compliance:** This rule exists to prevent businesses from spamming users. By following this protocol, you protect our phone lines from being flagged or banned.

3. How to Request the "Re-Open"

The easiest way to reset the 24-hour clock is to ask the client to perform a simple action while you are on the phone with them.

Instructions to the Client: Ask the client to open their WhatsApp and do one of the following:

1. Reply with a **"Thumbs Up"** 👍 or any emoji.
2. Reply with a simple **"Hello"** or **"OK"**.
3. Reply confirming they received your previous message.

Hubspost

HubSpot CRM Management

1. Overview

HubSpot is the "central nervous system" of our sales and patient management operations. It serves as the single source of truth for all patient data, communication history, and sales pipeline tracking.

2. Objective

The purpose of this protocol is to ensure 100% data integrity. Effective use of HubSpot ensures that no lead is left behind, every patient interaction is documented, and the sales team operates with efficiency and transparency.

3. The Golden Rule

"If it isn't logged in HubSpot, it didn't happen." Every call, voicemail, status change, and note must be recorded immediately. This ensures that any team member can pick up a file and understand the exact status of the patient without guesswork.

Scheduling an appointment

Appointment Scheduling Protocol

1. **Sales Team:** Schedule with the Sales Team using the link below

Sales

Scheduling

Link:

https://support.dharmanutritionclinic.com/sellers?hs_preview=yOrvQGsl-192775277694

Please ensure all fields are completed accurately according to the guidelines below:

- **First Name / Last Name:** Enter the client's full name exactly as it appears in **Respond.io**.
- **Email:** Use the standard dummy format based on their phone number (e.g., 1234567890@dummy.com).
- **Phone Number:** Enter the client's valid US phone number.
- **Preferred Language:** Select the language the client prefers for communication.
- **State:** Select the US State where the client currently resides.
- **Agent:** Select your own name from the dropdown list.
- **Channel:** Indicate the method used to schedule the appointment (**Phone Call** or **Messages**).
- **Source:** Verify the source in Respond.io and select accordingly (e.g., **Facebook/Meta Ad** or **TikTok Ad**).
- **Type of Meeting:** Select the specific **Sales Agent** you are assigning to take this appointment.
- **Agent Notes:** Include any context that will help the closer (e.g., "Client mentioned using similar products in the past" or specific weight loss goals).

Cancel

Start

Protocol for Closed Conversations: If the messaging window is closed, you cannot send standard shortcuts immediately. Please follow this order:

1. **Send Template:** Use the template `sp_open_conversation` to re-engage the client.
2. **Wait for Reply:** The client must answer this message to re-open the session.
3. **Send Info:** Once the conversation is active again, you can proceed to send the standard shortcut/information.

Double-Booking Procedure

When a seller needs two appointments at the same time, follow these steps to bypass the standard scheduling restrictions:

Step-by-Step Instructions

1. **Create a new appointment:** The new appointment will be created with a random available time and in the last page of the booking page the check box for Don't Send a notification will be selected.

2. **On Hubspot locate the Client:** Search for and open the specific **Contact Record**.
3. **Access Meetings:** Navigate to the **Meetings** tab/activity section within that contact.

4. **Initiate Edit:** Find the existing meeting and select **Edit** on the scheduled time.

5. **Adjust Schedule:** Manually change the **Date** and **Time** to match the desired slot.

- **Note:** This allows you to overlap with an existing appointment already on the seller's calendar.

6. **Commit Changes:** Click **Save** to finalize the double-booking.

- Example on how the calendar looks like once its double booked:

Payment registration

We are migrating from Square to Hubspot , currently please register payments on both systems.

Pointers :

- ALL payments should be registered , the amount MUST match the amount charged .
- Both systems should also match , what was registered on Square , should be equal to Hubspot registration
- If under charged , please review with supervisor
- If overcharged , we can adjust with supplements to avoid a refund or register as a Tip(square) Other (Hubspot)
- Payments must be registered after each sale

Hubspot

Payment Registration on HubSpot

1. Objective

Once a payment is captured, it must be registered immediately on the Client's Deal. This updates the pipeline and triggers the next steps for fulfillment.

2. Step 1: Locate the Deal

You can access the deal using one of two routes:

Route A: Via Deals Tab (Recommended)

1. Go to **CRM** > Click on **Deals**.
2. Search by the **Client's Name**.
3. Click on the specific deal to open it.

Route B: Via Contacts Tab

1. Go to **CRM** > Click on **Contacts**.
 2. Search for the client (using their Name or Email).
 3. Once in the contact profile, look for the "Deals" section (usually on the right sidebar) and click the deal name.
-

3. Step 2: Add Line Items (The Product)

You must specify exactly what was sold.

1. Inside the Deal, look at the **Right Sidebar**.
 2. Scroll down to the **Line Items** section.
 3. Click **Add**.
 4. Search for and select the specific **Purchase Items** (e.g., Semaglutide 3 Month, Lipo-Mino).
 5. Click **Save**.
-

4. Step 3: Update Deal Information

Now, update the status and payment details to close the file.

1. **Change Deal Status:** Update the stage to **PAID**.
2. **Enter Payment Details:** You must fill in the following fields:
 - **Account Holder:** (Who actually paid? e.g., if Mom paid for Son).
 - **Payment Method:** Select **Credit Card** or **Financing** (e.g., Affirm).

5. Step 4: Lead Classification (Critical)

Every time a sale is made, the lead is proven to be active and valuable.

- **Action:** Change the **Lead Classification** field to **HOT**.
- **Note:** This must be done for every sale, regardless of product type.

Visual reference:

The screenshot displays a CRM interface for a lead named Gina Collazos. The 'Activities' tab is selected, showing a timeline of events. A yellow circle highlights the 'Deals (1)' section, which contains a deal named 'Sellers - Gina Collazos'. The deal's status is 'NEW LEADS - OPEN DEAL' and its stage is 'EVALUATION SCHEDULED'. The deal is associated with the contact 'Gina Collazos'.

Medical Form & Patient Portal

Medical Form & Patient Portal (Brand Portal)

1. Summary & Objective

The **Medical Form** and the **Patient Portal** serve as the bridge between a "Sale" and "Medical Treatment."

While the Sales Team collects the payment, the **Medical Form** collects the health data required by law to prescribe the medication. Without a completed form and an active portal account, the medical team cannot review the patient, and no medication can be shipped.

2. The Components

A. The Medical Form (The Intake)

- **What it is:** A comprehensive health survey (questionnaire) that the client must fill out immediately after purchasing.
- **Purpose:** It provides our doctors with the medical history, BMI, and contraindication checks necessary to issue a prescription.
- **Trigger:** This is sent to the client via the **Survey Link** immediately after the sale is closed.

B. The Patient Portal (The Dashboard)

- **What it is:** The secure account created by the client while filling out the Medical Form.
- **Purpose:** This is the client's permanent home for their medical profile.
- **Critical Function (Shipping):** For all injection orders, the **Shipping Address** is pulled directly from this portal (Unlike supplements, which may use the Logistics Form).
- **Key Features:**
 - **Order Tracking:** Clients can log in to view their specific tracking number as soon as the medication ships.
 - **Doctor Access:** Clients can message the medical team directly through the portal at any time to ask questions.
 - *Note:* The standard response time for medical inquiries is **within 24 hours**.

[Patient Portal Login Link](#)

3. The Golden Rule: Patient Identity

" The Patient is the Priority, not the Payer."

The Medical Form/ Portal Account must **ALWAYS** be created under the name and legal identity of the person **receiving the treatment**.

- **Scenario:** A mother pays for her son's treatment.
- **Action:** The Medical Form must be filled out with the **Son's Name**, **Son's DOB**, and **Son's Medical History**.
- **Risk:** If the form is filled out under the Payer's name (the mother) but intended for the son, the prescription will be invalid, and the process will be halted.

Medical Form

Post-Sale Medical Clearance Procedure

The Process Flow

To ensure timely delivery, all clients must follow this sequence immediately after a sale:

1. **Complete Medical Forms:** Necessary for doctor review.
2. **Doctor Review:** Forms are sent to the doctor for prescription approval.
3. **Pharmacy Fulfillment:** Prescription is sent to the pharmacy for shipping.

Completion Methods

Clients have two options for completing their paperwork:

- **Self-Service:** The client fills out the digital form on their own.
- **Assisted Support:** Our **Customer Service Team** provides guided support to fill out the form.

Seller Requirement (Crucial)

[IMPORTANT] **Immediate Transfer:** Sellers are required to transfer the client to the **Customer Service Team** immediately after the sale is finalized to complete the medical form.

Example :

- **Medical form for Tirzepatide 8mg:**

How it works

-  Complete a short medical survey to help us understand your health and treatment goals.
-  A licensed medical provider will review your responses and determine your treatment plan.
-  If approved, your prescription will be sent to the pharmacy and mailed discreetly to your doorstep.

Personalized Tirzepatide+ 8mg

Continue >

The Instruction

Once the patient opens the link you sent, guide them through the landing screen using the following scripts.

2. Scenarios & Scripts

Scenario A: New Patients (First Time) *Explain that this step creates their secure profile.*

"On the screen, you will see a prompt to enter your email. Since this is your first time, please enter your email and create a new password. This will set up your secure account and take you directly to the medical form."

Scenario B: Existing Patients (Returning) *Clarify that they do not need to register again.*

"Since you have been with us before, you already have an account. Please simply Log In using your email and existing password to access your file."

Ensure the patient is looking at this specific screen:

Your data stays with you, always.

- Note to Agent: If the patient is new but tries to "Log In," they will get an error. If an existing patient tries to "Sign Up" again, the system will say the email is taken. Please guide them accordingly.

Once the patient has logged in, guide them through the data entry screens using the instructions below.

Step 1: Personal Identification

- Instruction: "Please enter your full legal Name and Date of Birth exactly as they appear on your ID."

Tell us about you

This information will help your healthcare provider determine if you're eligible for treatment.

First name

Enter your first name

Last name

Enter your last name

Date of birth

mm/dd/yyyy

Next >

Step 2: Contact Information

- **Instruction:** "Enter your current Address and Phone Number. Please ensure this address is correct, as this is where we will ship your medication."

Some contact details

This information helps us ensure the accurate and timely delivery of your treatment.

Street address

Enter your address

Apartment, etc... (Optional)

Apartment number, unit...

City

City

State

ZIP code

ZIP code

Phone number

+1 Phone number

Next >

Step 3: Location (Critical)

- **Instruction:** "Please select the State where you currently reside. This confirms you are within our licensed service area."

Please select your state of residence (Por favor, selecciona su Estado de residencia).

Step 4: Language Preference

- **Instruction:** "Select your preferred language (English or Spanish for example)"

Please select your preferred language for medical information communication (Por favor, seleccione su idioma preferido para recibir información médica).

☐ Arabic

☒ English

☐ French

☐ German

☐ Hindi

☐ Italian

☐ Japanese

☐ Korean

[< Previous](#)

[Next >](#)

Step 5: Goals & Biometrics

- **Weight Loss Goal:** "Select your primary motivation/goal for this treatment."

What are your primary weight loss goals? (¿Cuáles son sus principales objetivos con respecto a la pérdida de peso?)

☐ Enhanced physical appearance (Mejorar la apariencia física)

☐ Improved overall health (Mejorar la salud en general)

☐ Increased confidence (Elevar la confianza)

☐ Boost energy levels (Elevar niveles de energía)

☐ Improved chronic conditions (Mejorar condiciones crónicas)

- **Gender:** "Select your gender."

What is your gender as assigned at birth? (¿Cuál es su género asignado al nacer?)

☐ Male (Hombre)

☐ Female (Mujer)

- **Height & Weight: "Enter your accurate height and current weight."**

What is your height? (¿Cuál es su estatura?)

Please add height in feet and inches (e.g 5'9) (Por favor, ingresa tu estatura en pies y pulgadas)

Feet

Inches

What is your current weight? (¿Cuál es su peso actual?)

Weight in pounds (lbs) (Peso en libras)

150

- *System Logic:* The form automatically calculates BMI.
- IF BMI < 30: The system will prompt the patient to select a related medical condition (comorbidity) to justify eligibility.

- IF BMI > 30: The form will proceed automatically.

For patients with a BMI between 25-29 (overweight), a weight-related health condition must be present to qualify for treatment, unless you are already taking a GLP-1. Do you have any of the following medical conditions?

Para los pacientes con un IMC entre 25 y 29 (sobrepeso), debe existir una condición de salud relacionada con el peso para calificar para el tratamiento, a menos que ya estén tomando un GLP-1. ¿Presenta alguna de las siguientes condiciones médicas?

☐ High blood pressure (hypertension) (Presión sanguínea alta (hipertensión))

☐ Hyperlipidemia (high cholesterol) (Hiperlipidemia (colesterol alto))

☐ Obstructive sleep apnea (OSA) (Apnea del sueño obstructiva (ASO))

☐ Non-alcoholic fatty liver disease (NAFLD) (Enfermedad del hígado graso no alcohólico (EHNA))

☐ Osteoarthritis (Osteoarthritis)

[< Previous](#) [Next >](#)

Step 6: Medical Safety Checks (Contraindications)

- **Major Contraindications:** "Please review this list carefully. You must confirm that you do **NOT** have any of these specific conditions (e.g., Medullary Thyroid Cancer or MEN 2)."

Do you currently have or have been previously diagnosed with any of the following medical conditions? (¿Actualmente tiene o ha sido diagnosticado/a con alguna de las siguientes condiciones médicas?)

☐ Symptomatic heart failure (unstable/untreated) (Insuficiencia cardíaca sintomática (inestable/no tratada))

☐ Dysrhythmia, tachycardia or atrial fibrillation (unstable/untreated) (Disritmia, taquicardia o fibrilación auricular (inestable/no tratada))

☐ Heart failure (Fallo cardíaco)

☐ Multiple endocrine neoplasia, type 2 (MEN 2) (Neoplasia endocrina múltiple tipo 2 (NEM 2))

☐ Personal or family history of medullary thyroid cancer (Historial personal o familiar de cáncer medular de tiroides)

☐ Liver cirrhosis or end-stage liver disease (Cirrosis hepática o enfermedad del hígado en etapa terminal)

[< Previous](#) [Next >](#)

Step 7: Allergies

- **Instruction:** "Please enter **any** known allergies you have in the designated field. It is critical for your safety that you list everything here. If you have no allergies, please confirm that you have none to proceed."
- **System Logic:** If the patient selects "Yes," they will be required to type the specific allergies.

Do you have any allergies? (¿Padece usted alguna alergia?)

☐ Yes (Si)

☐ No (No)

Please list your allergies (Por favor, enumere sus alergias).

N/A

Type here

+ Add

Step 8: Current GLP-1 Usage

- **Instruction:** "Please indicate if you are currently using any GLP-1 medications (like Ozempic, Wegovy, Mounjaro, Semaglutide, Tirzepatide). If you select 'Yes,' enter your current dosage and date of last application so the doctor can adjust your treatment plan."

Are you currently taking a GLP-1 medication like Semaglutide or Tirzepatide? (¿Está tomando actualmente algún medicamento GLP-1, como Semaglutida o Tirzepatida?)

☐ Yes (Si)

☐ No (No)

What is the name of the GLP-1 you are currently taking and what's your current weekly dosage in milligrams (mg)? (¿Cuál es el nombre del medicamento GLP-1 que está tomando actualmente y cuál es su dosis semanal en miligramos?)

(Example: Wegovy 0.25mg)

Step 9: GLP-1 Allergy Verification

- **Instruction:** "Confirm whether you have any known allergies specifically to GLP-1 medications by selecting the appropriate option on the screen."

Do you have any known allergy to GLP-1 agonist medications? (¿Tiene alguna alergia a medicamentos agonistas GLP-1?)

☐ Yes (Si)

☐ No (No)

Step 10: Medication & Health History

- **Instruction:** "Review the list of restricted medications on the screen and confirm you are not taking any of them. Then, enter **all** other medications you are currently taking and list any past or present medical conditions in the fields provided."

Do you currently take any of the following medications?
(¿Actualmente toma alguno de los siguientes medicamentos?)

- ☐ Sulfonylureas including glyburide (glynase), glipizide (glucotrol), glimepiride (amaryl) (Sulfonilureas inclida glibenclamida)
- ☐ Meglitinides (repaglinide or nateglinide) (Meglitinidas)
- ☐ St. John's Wort (Mosto San Juan)
- ☐ Insulin (Insulina)
- ☐ None of the above (Ninguno de los anteriores)

Please list any medications or dietary supplements you are currently taking (Por favor, enumere cualquier medicamento o suplemento dietético que esté tomando).

REQUIRED: PLEASE ADD THE DOSES AND FREQUENCY OF EACH CURRENT MEDICATION. (REQUERIDO: POR FAVOR ENUMERE LAS DOSIS Y LA FRECUENCIA DE CADA MEDICAMENTO).

N/A

Type here

+ Add

Please list any medical conditions you are currently being treated for (Por favor, enumere las condiciones médicas por las cuales usted está siendo tratado).

N/A

+ Add

Step 11: Compounding Eligibility (Mandatory)

- **Instruction:** "Select **at least one** factor from the displayed list to validate your eligibility for compounded medication. **Note:** You may select a condition even if it is **not currently active** (e.g., a past history), or general factors like 'Stress'."

Las respuestas serán revisadas como parte de su plan de atención.

☐ Blood sugar concerns or insulin resistance (Preocupaciones sobre la glucosa o resistencia a la insulina)

☐ High blood pressure (Hipertensión)

☐ Gut health issues (e.g., bloating, nausea, poor digestion) (Problemas de salud intestinal (por ejemplo, hinchazón, náuseas, mala digestión))

☐ Daily alcohol use (Consumo diario de alcohol)

☐ Muscle cramps or spasms (Calambres o espasmos musculares)

☐ Nausea and/or vomiting (with GLP-1 therapy) (Náuseas y/o vómitos (con terapia de GLP-1))

☐ Stress, anxiety, or depression (Estrés, ansiedad o depresión)

☐ Exercise intolerance or slow recovery (Intolerancia al ejercicio o recuperación lenta)

☐ Premenstrual syndrome (PMS) (Síndrome premenstrual)

☐ Skin conditions (acne, rosacea, eczema) (Condiciones de la piel (acné, rosácea, eczema etc.))

☐ Joint pain or arthritis (Dolor en las articulaciones o artritis)

☐ Low energy or fatigue (Baja energía o fatiga)

☐ Hormonal imbalances (e.g., PCOS, thyroid issues, hormonal weight gain) (Desórdenes hormonales (por ejemplo, SOP, problemas de tiroides, aumento de peso hormonal))

☐ Nerve issues (e.g., numbness, tingling, nerve pain) (Problemas nerviosos (e.g. entumecimiento, hormigueo, dolor nervioso))

Cognitive or mood issues (e.g., brain fog, memory problems, mood

[< Previous](#)

☐ Cognitive or mood issues (e.g., brain fog, memory problems, mood swings) (Problemas cognitivos (e.g. niebla mental, problemas de memoria, cambios de humor))

METFORMIN, WEGOVY® OR ZEPBOUND® PURCHASES ONLY: I confirm that I did not select a compounded GLP-1 medication.

☐ SOLO COMPRAS DE METFORMINA, WEGOVY® O ZEPBOUND®: Confirmo que no he seleccionado un medicamento GLP-1 compuesto.

☐ None of the listed conditions currently apply to me (Ninguna de las condiciones enumeradas se aplica a mí actualmente)

[< Previous](#)

[Next >](#)

Step 12: Identity Verification

- **Instruction:** "Upload a clear, legible photo of your **Government-Issued ID** (Driver's License or Passport) to complete the verification process. It can be from your home country"

Please upload a government-issued photo ID (Por favor, suba una foto de una identificación válida emitida por el gobierno).

Such as a U.S. driver's license (not expired), a government issued ID card, U.S. passport, or passport card. (Como una licencia de conducir de U.S. (no vencida), una tarjeta de identificación emitida por el gobierno, pasaporte de U.S. o tarjeta de pasaporte.)

A few tips for taking the picture

- ☑ Ensure the room is well-lit. Natural light or bright, even lighting will help avoid shadows.
- ☑ Your image should have a good resolution and can only be .jpg, .jpeg, .png, .bmp, .pdf
- ☑ Ensure the image is clear and not blurry.

No file chosen

Step 13: Consent & Finalization

- **Instruction:** "Check the box to confirm you have read and understood the treatment information. Then, provide your **digital signature** at the bottom of the screen to authorize the consent form."

Please confirm the following to attest that all the information you have provided to us is true and complete (Por favor, confirme lo siguiente para atestiguar que toda la información que nos ha proporcionado es verdadera y completa).

CONSENT (ENGLISH)

I verify that I am the individual completing this survey and have personally answered all questions. I have carefully reviewed the content and understand the information being requested. I affirm that the information provided is truthful and complete to the best of my knowledge. I acknowledge the importance of honesty regarding my health and accept responsibility for any omissions or inaccuracies. I will not hold my healthcare provider or any associated parties liable for issues arising from information I have not disclosed. By signing below, I signify my agreement to the above statements and confirm the accuracy of the information provided.

CONSENTIMIENTO (ESPAÑOL)

Confirmo que soy la persona que está completando esta encuesta y que he respondido personalmente a todas las preguntas. He revisado cuidadosamente el contenido y entiendo la información solicitada. Afirmo que la información proporcionada es veraz y completa según mi mejor conocimiento. Reconozco la importancia de la honestidad en relación con mi salud y acepto la responsabilidad por cualquier omisión o inexactitud. No responsabilizaré a mi proveedor de atención médica ni a ninguna parte asociada por problemas que surjan debido a información que no haya revelado. Al firmar a continuación, manifiesto mi conformidad con las declaraciones anteriores y confirmo la exactitud de la información proporcionada.

☒ I have read the above, I do consent, and wish to move forward (He leído la información anterior, doy mi consentimiento, y deseo continuar)

☐ I DO NOT wish to continue (No deseo continuar)

GLP-1 Consent (Consentimiento para GLP-1)

INDICATION FOR USE (ENGLISH)

You are requesting treatment with a GLP-1 (Ozempic, Wegovy, or compounded semaglutide) or GIP/GLP-1 receptor agonist (Mounjaro, Zepbound, or compounded tirzepatide) medication as part of your treatment plan for the management of weight or obesity. These medications work by mimicking the action of incretin hormones, which help regulate blood sugar levels, promote feeling full, and reduce food intake.

POTENTIAL BENEFITS

- Weight loss or weight management
- Improved blood glucose control
- Reduced cardiovascular risk
- Potential improvement in overall metabolic health

POTENTIAL SIDE EFFECTS

While these medications can be beneficial, they may also cause side effects. Although not common, these medications can result in emergency room visits, hospitalizations, or even death. Common and serious side effects include, but are not limited to:

Common Side Effects:

- Nausea
- Vomiting
- Diarrhea
- Constipation
- Decreased appetite

[< Previous](#)

[Next >](#)

Serious Side Effects:

- Pancreatitis (inflammation of the pancreas)
- Hypoglycemia (low blood sugar), especially when used with other diabetes medications
- Gallbladder disease (e.g., gallstones)
- Kidney problems
- Allergic reactions (e.g., rash, itching, swelling)
- Gastroparesis (paralysis of the bowels)

RISKS AND CONSIDERATIONS

- Pancreatitis: There is a risk of developing pancreatitis. If you experience severe abdominal pain, nausea, or vomiting, you should contact your healthcare provider immediately.
- Thyroid Tumors: Animal studies have shown an increased risk of thyroid tumors with certain GLP-1 medications. Although this has not been confirmed in humans, please inform your healthcare provider if you have a history of thyroid cancer.
- Hypoglycemia: When taken with other diabetes medications, particularly insulin or sulfonylureas, there is a risk of low blood sugar. It is important that your provider knows if any of these medications are added to your regimen.
- Kidney Function: This medication may affect kidney function, particularly in patients with existing kidney disease. Regular monitoring of kidney function may be required.

FOR GLP-1 THERAPY USERS

By proceeding with this survey, I confirm that I have a qualifying condition that could benefit from the inclusion of Vitamin B12 (cyanocobalamin), Vitamin B6 (pyridoxine), Vitamin B3 (niacinamide), or Glucine (an amino acid), which I plan

[< Previous](#)

[Next >](#)

FOR GLP-1 THERAPY USERS

By proceeding with this survey, I confirm that I have a qualifying condition that could benefit from the inclusion of Vitamin B12 (cyanocobalamin), Vitamin B6 (pyridoxine), Vitamin B3 (niacinamide), or Glycine (an amino acid), which I plan to discuss with my doctor.

MONITORING AND CHECK-INS

You will require regular check-ins to monitor your response to the medication and to assess for any side effects. We may intermittently ask for full-body selfie images to ensure that your reported weight is consistent.

ACKNOWLEDGMENT

I acknowledge the uses, potential benefits, risks, and side effects of GLP-1 or GIP/GLP-1 receptor agonist medications. I understand the importance of regular monitoring and check-ins. I consent to the use of GLP-1 or GIP/GLP-1 receptor agonist medications as part of my treatment plan for overweight or obesity.

INDICACIÓN DE USO (ESPAÑOL)

Está solicitando tratamiento con un medicamento GLP-1 (Ozempic, Wegovy o semaglutida compuesta) o un agonista del receptor GIP/GLP-1 (Mounjaro, Zepbound o tirzepatida compuesta) como parte de su plan de tratamiento para el manejo del peso o la obesidad. Estos medicamentos funcionan imitando la acción de las hormonas incretinas, que ayudan a regular los niveles de azúcar en la sangre, promueven la sensación de saciedad y reducen la ingesta de alimentos.

[< Previous](#)

[Next >](#)

BENEFICIOS POTENCIALES:

- Pérdida de peso o manejo del peso
- Mejor control de la glucosa en sangre
- Reducción del riesgo cardiovascular
- Potencial mejora en la salud metabólica general

EFFECTOS SECUNDARIOS POTENCIALES:

Aunque estos medicamentos pueden ser beneficiosos, también pueden causar efectos secundarios. Aunque no es común, estos medicamentos pueden resultar en visitas a la sala de emergencias, hospitalizaciones o incluso la muerte. Los efectos secundarios comunes y graves incluyen, pero no se limitan a:

Efectos secundarios comunes:

- Náuseas
- Vómitos
- Diarrea
- Estreñimiento
- Disminución del apetito
- Indigestión

Efectos secundarios graves:

- Pancreatitis (inflamación del páncreas)
- Hipoglucemia (bajo nivel de azúcar en sangre), especialmente cuando se usa con otros medicamentos para la diabetes
- Enfermedad de la vesícula biliar (p. ej., cálculos biliares)
- Problemas renales
- Reacciones alérgicas (p. ej., sarpullido, picazón, hinchazón)

[< Previous](#)[Next >](#)

EFECTOS SECUNDARIOS

- Reacciones alérgicas (p. ej., sarpullido, picazón, hinchazón)
- Gastroparesia (parálisis de los intestinos)

RIESGOS Y CONSIDERACIONES:

- Pancreatitis: Existe el riesgo de desarrollar pancreatitis. Si experimenta dolor abdominal severo, náuseas o vómitos, debe contactar a su proveedor de atención médica de inmediato.
- Tumores en la tiroides: Los estudios en animales han mostrado un mayor riesgo de tumores tiroideos con ciertos medicamentos GLP-1. Aunque esto no se ha confirmado en humanos, infórmele a su proveedor de atención médica si tiene antecedentes de cáncer de tiroides.
- Hipoglucemia: Cuando se toma con otros medicamentos para la diabetes, especialmente insulina o sulfonilureas, existe el riesgo de hipoglucemia. Es importante que su proveedor sepa si se agregan estos medicamentos a su tratamiento.
- Función renal: Este medicamento puede afectar la función renal, especialmente en pacientes con enfermedad renal preexistente. Puede ser necesario un monitoreo regular de la función renal.

PARA USUARIOS DE TERAPIA CON GLP-1

Al continuar con esta encuesta, confirmo que tengo una condición calificante que podría beneficiarse de la inclusión de la vitamina B12 (cianocobalamina), vitamina B6 (piridoxina), vitamina B3 (niacinamida) o glicina (un aminoácido), que planeo discutir con mi médico.

MONITOREO Y SEGUIMIENTO:

MONITOREO Y SEGUIMIENTO:

Será necesario realizar chequeos regulares para monitorear su respuesta al medicamento y evaluar posibles efectos secundarios. De manera ocasional, se puede solicitar que envíe imágenes de su cuerpo completo para asegurarnos de que su peso informado sea consistente.

RECONOCIMIENTO

Reconozco los usos, los beneficios potenciales, los riesgos y los efectos secundarios de los medicamentos GLP-1 o GIP/GLP-1. Entiendo la importancia del monitoreo regular y los chequeos. Consiento el uso de medicamentos GLP-1 o GIP/GLP-1 como parte de mi plan de tratamiento para el sobrepeso o la obesidad.

Soft Skills Training

Soft Skills & Communication Standards

1. Objective

In sales and patient care, **how** you say something is just as important as **what** you say. Since we operate remotely, our voice and written messages are the only tools we have to build trust. This protocol outlines the standards for professional interaction.

2. Audio & Voice Quality

Your voice is your storefront. It must be clear, professional, and easy to understand.

- **Pace & Clarity:** Speak at a moderate, steady pace. Do not rush through the script. Articulate your words clearly so the client does not have to ask you to repeat yourself.
- **Microphone Position:**
 - **Distance:** Maintain a consistent distance from your microphone.
 - **Avoid Distortion:** Do not speak too close to the mic, as this causes audio distortion and is unpleasant for the client.
 - **Background Noise:** Ensure you are in a quiet environment with no echo or background chatter.
- **The "One-Second" Rule (Recordings):** When sending voice notes or starting a recorded line, wait **one full second** after hitting "record" before you start speaking. This prevents your greeting from being cut off.

3. Written Communication (Text/Chat)

Written messages must be grammatically perfect while maintaining a warm, human connection.

- **Mechanics Matter:** Always use proper **Capitalization** at the beginning of sentences and correct **punctuation**. Avoid all-lowercase typing or "text speak".
- **Tone & Emojis:** Use emojis strategically to soften the tone and build rapport (e.g., "Good morning! 🌞"). The tone should be helpful and professional.
- **Completeness:** When answering a question, provide **complete information**. Do not make the client ask follow-up questions; anticipate what they need to know next and include it.

4. Active Listening & Confidence

- **Listen to Solve:** Do not just wait for your turn to speak. Listen to the client's specific objection (e.g., financing confusion) and guide them to the solution confidently.

- **Process Knowledge:** Confidence comes from knowing your SOPs. If a client is confused (e.g., about how to pay an installment), you must be able to explain the process clearly without hesitation.

Empathy & Advanced Objection Handling

Empathy & Advanced Objection Handling

1. Objective

Clients do not buy products; they buy solutions to their problems. To understand their problem, you must first connect with them emotionally. **Rule #1:** Never rush past an emotion. If a client shares a struggle, fear, or hesitation, stop and validate it before moving back to the script.

2. Empathy Scripts: What to Say

A. When a Client Shares a Struggle or Pain Point 💔

Use these phrases to build immediate trust when a client opens up about their weight, health, or personal life.

- "Thank you for sharing that with me. I really appreciate your honesty."
- "That sounds incredibly difficult to deal with on your own."
- "I am so sorry to hear you are going through that."
- "It is completely understandable that you are feeling that way."
- "I can only imagine how frustrating that must be for you."

B. When a Client is Frustrated by Past Failures 😞

Use these when a client says, "I've tried everything," or "Nothing works for me."

- "It sounds like you've been on a really tough journey already."
- "What I hear you saying is that you've felt let down in the past, and you need this experience to be different."
- "I appreciate you telling me that. My goal is to make sure your experience with us is completely different."
- "I am sorry that was your experience before. That is exactly why we focus so much on **[Insert Benefit: e.g., Weekly Accountability/Medical Supervision]**."

C. When a Client Expresses Fear or Uncertainty 😟

Use these to reassure a client who is scared of needles, side effects, or spending money.

- "I completely understand your concern. Many of our most successful patients felt the exact same way at the start."
- "Thank you for bringing that up. That is a very important question."
- "That's a great point. What specifically are you worried about so I can address it?"

- "It sounds like you want to be 100% sure you are making a safe decision, which is very smart."
 - "I can reassure you that we take **[Safety/Health]** very seriously."
-

3. The "Spouse/Partner" Objection Protocol 🤝

*A common objection is: "I need to ask my husband/wife." Do not accept this as a "No." Use the **Validate, Collaborate, & Solve** method.*

Step 1: Validate (Don't Fight It)

- "I completely understand. You and your husband are a team, and you make decisions together."
- "I understand that he wants the best for you. That is very common with our patients."
- "I'm sure he just wants to make sure you are safe."

Step 2: The Pivot (The Knowledge Gap)

- "The only issue is that he doesn't have the information that **you** have right now. He hasn't seen the science or the success stories yet."
- "Sometimes, when we try to explain it ourselves, it can raise more doubts because we don't have all the answers yet."

Step 3: The Solution (Add Him to the Call)

- **The "Team" Approach:** "Let's do this—let's add him to the call right now. I can answer his questions directly so he feels comfortable with the investment too."
- **The "Investment" Angle:** "I totally agree he should be involved. Let's get him on the line. This isn't an expense; it's an investment in your future health, and I want him to see that."
- **The "Support" Angle:** "We are going to do this. I know how important this is to you. Let's get him on the phone to clear up any doubts he has so he can support you fully."

Step 4: Confirming Readiness

- "I'm glad **you** want to do this. Aside from speaking with him, do you have any other doubts?"
- "Thank you for telling me you are ready. I want to help you get started. Let's get him on board."

Building Rapport & Intentional Questions

Building Rapport & Intentional Questioning

1. Objective

A sales conversation is a relationship, not an interrogation.

- **Step 1:** Build Rapport (Make them like you and trust you).
 - **Step 2:** Intentional Questioning (Guide them to admit they need help).
-

2. Phase 1: Building Rapport & Validation 🤝

Use these phrases early in the call or whenever the client shares a personal detail. This proves you are listening as a human being, not just a robot reading a script.

- **"That's wonderful! It sounds like you've been working hard on your health."**
 - 🇪🇸 *¡Eso es maravilloso! Se nota que has estado trabajando duro en tu salud.*
 - **"I appreciate you taking the time to talk with me today."**
 - 🇪🇸 *Te agradezco mucho el tiempo que te estás tomando para hablar conmigo hoy.*
 - **"That's a great point. I'm glad you brought that up."**
 - 🇪🇸 *Ese es un excelente punto. Me alegra que lo hayas mencionado.*
 - **"It's great to hear that you're celebrating [Birthday / New Home / Event]!"**
 - 🇪🇸 *¡Qué bueno escuchar que estás celebrando [tu cumpleaños / tu nueva casa]!*
 - **"I completely understand that. It sounds like you're looking for a partner who can support you on this journey."**
 - 🇪🇸 *Te entiendo perfectamente. Se escucha que estás buscando un aliado que te apoye en este proceso.*
-

3. Phase 2: Uncovering the "Why Now?" (Motivation) 🎯

Your goal is to understand the trigger. Why are they calling us today instead of next month?

- **"What made you decide to look into this right now?"**
 - 🇪🇸 *¿Qué te motivó a buscar esto justo ahora?*
- **"What is the main reason you are looking to make a change?"**
 - 🇪🇸 *¿Cuál es la razón principal por la que quieres hacer un cambio?*

- "If you could achieve just one thing with our program, what would it be?"
 - 🇪🇸 *Si pudieras lograr una sola cosa con nuestro programa, ¿cuál sería?*
-

4. Phase 3: The History (Past Experiences) 🏡

You must understand what they have tried before so you can explain why we are different.

- "Tell me, for how long have you been trying, and what kind of diets have you tried?"
 - 🇪🇸 *Cuéntame por cuánto tiempo y qué clases de dietas intentaste.*
 - "Have you done it alone, or did you have professional help?"
 - 🇪🇸 *¿Lo has hecho sola o acompañada?*
 - "What has been the biggest challenge for you so far?"
 - 🇪🇸 *Hasta ahora, ¿cuál ha sido el mayor desafío para ti?*
 - "What did you invest in previously (time/money)?"
 - 🇪🇸 *¿En qué invertiste anteriormente?*
-

5. Phase 4: The Gap (Why It Failed) 🤔

This is the most critical phase. You need them to admit that their previous methods were incomplete.

- "When you tried [Previous Method], what specifically didn't work for you?"
 - 🇪🇸 *Cuando intentaste [Método Anterior], ¿qué fue lo que no funcionó para ti?*
 - "What do you think you were missing to be successful?"
 - 🇪🇸 *¿Qué crees que te faltó para tener éxito?*
 - "Tell me more in-depth about how that process felt."
 - 🇪🇸 *Cuéntame más a fondo cómo fue ese proceso.*
-

6. Phase 5: Proactive Objection Handling & Commitment 🛡️

Before pitching the price, identify the roadblocks and get a verbal commitment.

- "If you had a definitive solution right now, would you do it?"
 - 🇪🇸 *Si tuvieras una solución definitiva, ¿la harías?*
- "What would be the one thing that would prevent you from moving forward today?"
 - 🇪🇸 *¿Qué sería lo único que te impediría seguir adelante hoy?*
- "What questions or concerns do you have about this so far?"

-  *Hasta ahora, ¿qué preguntas o preocupaciones tienes sobre esto?*
- **"It sounds like [Specific Concern] is important to you. Can you tell me more about that?"**
 -  *Me da la impresión de que [Preocupación] es importante para ti. ¿Podrías contarme un poco más sobre eso?*

Active Listening

Active Listening & Empathy Building

1. Objective

Active listening is not just hearing the words; it is making the client feel **felt**. When a client shares an emotion, you must stop, validate it, and show them you are on their side before moving to the next step of the sale.

2. When a Client Shares a Personal Struggle 🙄

Use these phrases when a client opens up about their weight, health issues, or emotional pain.

- **"Thank you for sharing that with me. I really appreciate your honesty."**
 - 🇪🇸 *Gracias por compartir eso conmigo. De verdad valoro tu sinceridad.*
 - **"That sounds incredibly difficult."**
 - 🇪🇸 *Eso suena increíblemente difícil.*
 - **"I am so sorry to hear that you are going through that."**
 - 🇪🇸 *Siento mucho que estés pasando por eso.*
 - **"It is completely understandable that you feel that way."**
 - 🇪🇸 *Es completamente comprensible que te sientas así.*
 - **"I can only imagine how frustrating that must be."**
 - 🇪🇸 *Solo puedo imaginar lo frustrante que debe ser.*
-

3. When a Client is Frustrated with Past Experiences 😡

Use these when a client is angry or disappointed because previous diets or programs failed them.

- **"It sounds like you've been on a really tough journey already."**
 - 🇪🇸 *Suena como si ya hubieras pasado por un camino bastante difícil.*
- **"What I hear you saying is that you've felt let down in the past, and you're looking for a different experience."**
 - 🇪🇸 *Lo que entiendo es que te has sentido defraudado en el pasado y buscas una experiencia diferente.*
- **"I appreciate you sharing that with me. We want to make sure your experience with us is completely different."**
 - 🇪🇸 *Te agradezco que compartas eso conmigo. Queremos asegurarnos de que tu experiencia con nosotros sea distinta.*

- **"I am sorry that was your experience. That is exactly why we focus so much on [Specific Benefit]."**
 - 🇪🇸 *Lamento mucho que esa haya sido tu experiencia. Justamente por eso nos enfocamos tanto en [menciona un beneficio específico].*
-

4. When a Client Expresses Fear or Uncertainty 😞

Use these to de-escalate fear regarding side effects, needles, or cost.

- **"I completely understand your concern. Many people feel that way."**
 - 🇪🇸 *Entiendo perfectamente tu preocupación. Muchas personas se sienten así.*
- **"Thank you for bringing that up. It's a very important question."**
 - 🇪🇸 *Gracias por traer eso a colación. Es una pregunta muy importante.*
- **"That is a great point. What specifically are you worried about?"**
 - 🇪🇸 *Es un excelente punto. ¿Qué es lo que te preocupa específicamente?*
- **"It sounds like you want to be sure you are making a safe and secure decision."**
 - 🇪🇸 *Me da la impresión de que quieres estar seguro de que estás tomando una decisión segura y confiable.*
- **"I can assure you that we take [Concern] very seriously."**
 - 🇪🇸 *Te puedo asegurar que nos tomamos [menciona su preocupación] muy en serio.*

Address & Time zones

US Address Validation & Time Zone Standards

1. Address Verification Protocol

*Shipping errors trigger fraud alerts and may cause the **denial of installment plan applications**. Follow these 4 steps to ensure accuracy.*

1. **Get it in Writing:** Instead of trying to spell complex street names over the phone, ask the client to **text the address** via WhatsApp or Email.
2. **The "Google Maps" Check:** Before saving, quickly type the address into Google Maps to verify it exists and is formatted correctly.
3. **Payment Validation:** When entering the address into **Stripe**, let the system validate it. If Stripe flags it as "Invalid," do not force it through—ask the client again.
4. **The Final Read-Back:** Always read the full address back to the client for confirmation before ending the call.

2. Abbreviations Cheat Sheet

Use these standard abbreviations to keep client profiles clean and professional.

Street Type	Abbreviation	Unit / Building	Abbreviation	Direction	Abbreviation
Street	St.	Apartment	Apt.	North	N
Avenue	Ave.	Suite	Ste.	South	S
Boulevard	Blvd.	Building	Bldg.	East	E
Drive	Dr.	Floor	Fl.	West	W
Road	Rd.	Number	No.	North West	NW

Lane	Ln.	Unit	Unit	North East	NE
Circle	Cir.	Post Office Box	P.O. Box	South West	SW
Court	Ct.			South East	SE

3. Time Zone Management

The US has 4 main time zones. Mixing them up causes missed appointments.

- **The Golden Rule:** When scheduling, **specify the time zone** explicitly (e.g., "Is that 2:00 PM your time or my time?").
- **Calendar Sync:** Always ensure the appointment is booked in the **Client's Local Time** so the automated reminders are correct.

 Main US Time Zones:

- **ET (Eastern Time):** New York, Florida (Our HQ)
- **CT (Central Time):** Texas, Chicago
- **MT (Mountain Time):** Colorado, Arizona
- **PT (Pacific Time):** California, Nevada

Social Network

Digital Ecosystem & Official Channels

Objective: Use these official links when sharing resources with clients, verifying brand presence, or requesting reviews.

1. Official Websites

- Dharma Nutrition Clinic: dharmanutritionclinic.com (Main Clinic Portal)
- La Lola Vitamins: lalolavitamins.com (E-commerce & Supplements)

2. Social Media Handles

Encourage clients to follow us for updates, recipes, and community support.

Instagram

- Clinic (Main): [@dharma.clinic](https://www.instagram.com/dharma.clinic) & [@dharmanutritionclinic.com](https://www.instagram.com/dharmanutritionclinic)
- Supplements: [@lalola.wellness](https://www.instagram.com/lalola.wellness)

Facebook

- Main Page: [Dharma Nutrition Clinic](https://www.facebook.com/DharmaNutritionClinic)
- Secondary/SP: [Dharma Clinic](https://www.facebook.com/DharmaClinic)

TikTok

- Clinic: [@dharmaclinic](https://www.tiktok.com/@dharmaclinic)
- Supplements: [@lalola.vitamins](https://www.tiktok.com/@lalola.vitamins)

3. Reputation Management

Use this link to request 5-Star reviews from happy patients after a successful consultation or delivery.

- ★ Google Review Link: [Click Here to Review Us](#)

Commission Eligibility & Financing Fee Protocol

Commission Eligibility & Financing Fee Protocol

Objective: To ensure financial accuracy when processing payments and to define the strict eligibility rules for commission payouts and clawbacks.

1. Commission Payout Policy

- **Agreement:** Commissions are paid strictly according to the terms outlined in your Employment Agreement.
- **Full Payment Rule:** Commissions are earned only on **FULL** payments.
- **Partial Deposits:** If a client makes a partial deposit, no commission is released until the balance is paid in full.
- **Square Registration:** You must register sales in Square accurately to ensure they are tracked correctly.
- **Refunds & Commission Clawbacks:** If a transaction is refunded—in full or in part—at a later date after a commission has already been paid out, the corresponding commission amount for that refunded transaction will be **clawed back and deducted/withdrawn** from your subsequent commission payout or paycheck.

2. Financing Fee Pass-Through Protocol

- **The Rule:** When a client uses a third-party financing option (Affirm, Afterpay, Klarna, or CareCredit), the platform charges a merchant fee. This fee must be passed on to the patient.
- **Calculation:** You must calculate the fee based on the total transaction amount and add it to the final price before processing the charge.

3. Fee Schedule

Refer to this chart before processing **ANY** financing payment.

A. Standard Financing (Affirm, Afterpay, Klarna)

- **Fee:** Add **6%** to the total price amount.

B. CareCredit Promotional Financing

CareCredit fees vary by the length of the term selected. Minimum purchase for these terms is \$200.

Term Length	Fee to Add	Minimum Purchase
6 Months	6%	\$200
12 Months	10%	\$200
18 Months	14%	\$200
24 Months	16%	\$200

4. Financial Accountability (Critical)

- **Precision Required:** You are responsible for calculating the correct total.
- **Undercharging Penalty:** If you fail to charge the patient the correct financing fee, the difference will be deducted directly from your commission.
Example: If the required financing fee was \$50 and you forgot to add it, \$50 will be deducted from your paycheck.
- **Refund Adjustments:** Any commissions paid on sales that are later refunded will be automatically deducted from your future earnings.
- **Action:** Double-check your math and payment terms before finalizing any transaction. Discrepancies directly impact your pay.

Before & After Photos

Visual Evidence Strategy (Before & After Photos)

Objective: Use real patient results to build belief, overcome skepticism, and help the prospective patient visualize their own future transformation.

1. The Strategy: "Mirror Matching"

Do not send random photos. For maximum impact, the patient must identify with the success story.

- **The Rule:** Select a "Before & After" photo that resembles the current client in terms of:
 - **Age Range** (e.g., Don't send a 20-year-old's result to a 55-year-old client).
 - **Starting Body Type/BMI.**
 - **Gender.**
- **The Goal:** We want the client to look at the photo and think, *"If they did it, I can do it too."*

2. Scenario A: During the Call (Closing Tool)

- **When:** Use this during the **Solution Presentation** or when handling skepticism about whether the medication works.
- **Action:** Send the photo via **Respond.io** while you are on the phone.
- **Script:**
"I'm sending you a photo right now to your WhatsApp. This is a patient who started at a very similar weight to you. Look at her result after just 12 weeks—this is the kind of transformation we are aiming for with you."

3. Scenario B: Post-Call Follow-Up (Re-Engagement)

- **Target:** Clients who did **not** purchase during the initial call (Warm/Thinking about it).
- **When:** Send this after the call to reignite emotion.
- **Action:** Send a high-impact photo with a text that focuses on the result.
